Rockville, MD 20853

Subject: PRIA Label Amendment and Amended Reregistration Label– PRIA amendment to add bag-on-valve packaging and label changes required in permethrin Reregistration Eligibility Decision (RED)
Product Name: CIC RESIDUAL INSECTICIDE NO. 1
EPA Registration Number: 50404-3
Application Date: 05/11/2016, 10/03/2009
Decision Numbers: 517306, 413264

Dear Dr. Dickens:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. The Agency, has also completed reviewing all of the information submitted with your application to support the reregistration of the above referenced product in connection with the permethrin RED, and has concluded that your submission is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

NOTE: This product is **not** yet being reregistered under section 4(g) of FIFRA.

Please note that the record for this product currently contains the Confidential Statements of Formulation (CSFs) listed below. Any previously dated CSFs are superseded.

- Basic CSF, dated 09/13/2016
- Alternate CSF 1, dated 09/13/2016
- Alternate CSF 2, dated 09/13/2016

A copy of your label stamped “Accepted” is enclosed. This labeling supersedes all previously accepted labeling. Products shipped after 12 months from the date of this amendment or the next printing of the label, whichever occurs first, must bear the new revised label. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. “To distribute or sell” is defined under FIFRA section 2(gg) and its

implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product bearing the amended label constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Elizabeth Fertich at fertich.elizabeth@epa.gov or (703) 347-0560.

Sincerely,

A handwritten signature in black ink, appearing to read 'L. Bacon', with a stylized flourish at the end.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. (Depending on container used in market either a trigger, pump or other type sprayer, with instructions, will be included with the product.) Do not transfer to another container. **SHAKE WELL BEFORE USING.**

INDOOR APPLICATION

USE RESTRICTIONS: For spot application only. Do not use as a space spray indoors. For home residential use only. Avoid contamination of feed and foodstuffs. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food/feed should be covered or removed. Remove pets and birds, and cover fish aquaria before making surface applications. Do not use this product in or on electrical equipment due to the possibility of shock hazard.

Do not apply as a broadcast treatment to indoor surfaces at residential sites, including nurseries, day care centers, schools, hospitals, and nursing homes.

SURFACE SPRAYING: To control cockroaches, waterbugs, palmetto bugs, scorpions, millipedes, centipedes, sowbugs, pillbugs, ants, silverfish, firebrats, spiders, crickets, clover mites, cheese mites, granary weevils, rice weevils, confused flour beetles, rust red flour beetles, drugstore beetles, meal worms, grain mites and caddisflies: Direct the spray into hiding places, cracks and crevices, behind shelves and drawers. For silverfish, spray bookcases. For ants, spray trails, nests and points of entry.

To control carpet beetles: Spray edges of carpeting and under carpeting and rugs. Make localized application to floor and baseboards. Spray directly into cracks, crevices and infested areas of shelving.

To control bedbugs: Spray mattresses lightly, particularly around tufts and seams. Take beds apart and spray in all joints. Treat baseboards, moldings and floors.

To control fleas (adults and larvae) and ticks, including Ticks which may carry Lyme disease and Rocky Mountain Spotted Fever (adults and larvae): Make localized applications to infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames, and areas of floor and floor covering. Fresh bedding should be placed in animal quarters following treatment. Allow to dry thoroughly before allowing pets to contact treated areas.

To control clothes moths: Remove any infested articles from storage, brush thoroughly, and air for several hours in sunlight, if possible. Apply spray liberally to empty chests, closets, bureaus and other storages directing spray into cracks, joints and crevices. After airing, infested articles may be treated lightly, keeping sprayer nozzle at least 18 inches from fabric to avoid staining.

To kill lice and louse eggs: spray in an inconspicuous area to test for possible staining or discoloration. Inspect again after drying, then proceed to make localized application to area to be treated. Spray from a distance of 8 to 10 inches. Treat only those garments and parts of bedding, including mattresses and furniture that cannot be either laundered or dry cleaned. Allow all treated articles to dry thoroughly before use.

Read entire label before each use. Use only on dogs. Do not use on cats--may be fatal.

ON DOGS

USE RESTRICTIONS: Except when used as an insecticide to control fleas and ticks on dogs, do not allow adults, children, or pets to enter the treated area until sprays have dried.

DO NOT USE ON CATS. May be toxic or potentially fatal if applied to or ingested by cats. Accidental application to cats and/or grooming a recently treated dog may result in tremors and/or uncoordinated muscle movements. If this occurs, immediate veterinary care should be provided.

To control fleas, ticks (including Ticks which can infect dogs with Lyme disease) and lice: Start spraying at the tail, moving the dispenser rapidly and making sure that the animals entire body is covered, including the legs and underbody. While spraying, fluff the hair so that the spray will penetrate to the skin. Make sure spray wets thoroughly, but do not saturate animal. Do not spray into eyes and face. Avoid contact with genitalia. Wear rubber gloves or mitts when applying this product. Repeat application every 5 weeks as necessary.

Do not use on puppies under twelve weeks. Consult a veterinarian before using this product on debilitated, medicated, aged, pregnant or nursing animals. Do not use on cats or kittens. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. For product questions and emergency information call 800-940-4464.

OUTDOOR APPLICATIONS

USE RESTRICTIONS: Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

- (1) Treatment to soil or vegetation around structures;
- (2) Applications to lawns, turf, and other vegetation;
- (3) Applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and crevice applications, only.”

Do not water the treated area to the point of run-off.

Do not make applications during rain.

Not for use in outdoor residential misting systems.

FOR CONTROL OF HOME GARDEN INSECTS

For use on roses, dahlias, asters and other ornamentals to kill Japanese beetles hit by spray as well as whiteflies, aphids, exposed thrips, spiders, red mites and leafminers.

May be used on plants as a multi-purpose spray in small home gardens and for spot treatments of incipient insect infestations to prevent spreading in larger home garden areas.

May also be used on other plants such as African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, dahlias, delphiniums, dogwoods, English ivy, eunonymus, fuschia, geraniums, crassula, grape vines, Kentia palms, laurels, marigolds, rhododendrons, roses, rubber plants, snapdragons, stocks, wandering jews, and zinnias.

Effective when used as directed against whiteflies, aphids, spider and red mites, exposed thrips, lace bugs, Japanese beetles, pavement ants, clover mites and army worms.

When spraying plants, do not operate closer than 18 inches. Use sweeping motion. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Contact insects directly whenever possible.

(FOR 0.5, 1 AND 1.5 GALLON SIZE ONLY)

TO CONTROL TICKS, INCLUDING TICKS WHICH MAY CARRY LYME DISEASE AND ROCKY MOUNTAIN SPOTTED FEVER (PERIMETER TREATMENT AROUND HOMES & CAMPSITES):

Use this product as a residual treatment to control Ticks including Deer Tick [(a.k.a. Black-legged Tick or Western Black-legged Tick) (*Ixodes scapularis*)], Lone Star Tick (*Amblyomma americanum*), Brown Dog Tick (*Rhipicephalus sanguineus*), American Dog Tick (*Dermacentor variabilis*), and Pacific Coast Tick (*Dermacentor occidentalis*). For each area listed below, apply until surface is wet (approximately 0.5 gal./375-500 ft² or 1 gal./750-1000 ft²).

Treat around windows and doors, porches, screens, eaves, patios, garages, under stairways and in crawl spaces where these pests may enter.

Treat a band of vegetation and leaf litter 6 to 10 feet wide around and the outside of buildings to help control ticks occurring there.

To help control ticks in outdoor activity areas, treat a band of vegetation and leaf litter 6 – 10 feet wide and adjacent to activity areas, especially where dense vegetation occurs.

(SEPARATE PACKAGING/LABELING ONLY)

ON CLOTHING

Clothing Instructions:

To repel & kill mosquitoes, chiggers, mites and ticks, including Ticks which carry Lyme Disease and Rocky Mountain Spotted Fever.

This product must not be applied to clothing while it is being worn. Under no circumstances should bare skin or clothing on the body be treated.

Do not spray directly on or otherwise allow to come in contact with skin, face, or eyes. This product is to be used as a clothing treatment only. In case of accidental spraying of skin, face or eyes, see “First Aid” on side panel. Make all applications outdoors. Do not exceed recommended spraying times. In heavily

infested areas, protection from ticks will be improved by either wearing the cuffs inside footwear or taping pant cuffs around legs. Protection from mosquitoes can be further enhanced by applying an EPA approved repellent to face, hands and other exposed areas of the body.

Initial Treatment Instructions:

[Pump and Spray Packaging Directions:] [Activate pump 5 to 10 times to spray. Completely remove pump top, use just enough repellent to cover clothing, recharging pump as needed.]

For six week [42 day] protection against ticks, chiggers, mites and mosquitoes select an outdoor area protected from the wind. Hold [pump] [spray] [container] [upright] about 6 to 8 inches from surface of clothing (while not being worn) and spray [with a slow sweeping motion] to lightly moisten the surface of the fabric. (A complete outfit consists of shirt, trousers, and socks.) Treat outer surfaces of each outfit, front and back, for 30 seconds on each side and allow to dry for at least 2 hours (4 hours under humid conditions). Pay particular attention to socks, trouser cuffs, and shirt cuffs. **DO NOT TREAT UNDERWEAR, HATS, CAPS OR INNER CLOTHING.**

[Directions for use “Option” to complement clothing treatment package size.]

e.g. 6 oz. net package: One pump bottle will treat one complete outfit.

e.g. 12 oz. net package: One pump bottle will treat two complete outfits. Use ½ of bottle for each complete outfit.

e.g. 24 oz. net package: One pump bottle will treat four complete outfits. Use 1/4 of bottle for each complete outfit.

GEAR: MOSQUITO NETTING, NETS, TENTS, CANOPIES, SCREEN ENCLOSURES, SLEEPING BAGS, BACKPACKS, GROUND CLOTHS, HAMMOCKS AND CAMPING CHAIRS: Do not treat inside of sleeping bag. Spray exterior surfaces of tent only. Select a well-ventilated outdoor area protected from wind and lay out [or hang] gear [article] to be treated. Hold pump [container] upright about 6 to 8 inches from surface of the article and spray [with a slow sweeping motion] to lightly moisten the surface of the fabric. Continue spraying over entire article, until the outer surfaces of the article are moist enough to cause a light color change [or darkening]. Hang treated gear [article] and allow to dry for at least 2 hours (4 hours under humid conditions) before using.

Re-treatment Instructions:

This product contains an active ingredient, which actually binds to the fabric being treated, providing residual protection, which lasts a minimum of six weeks [42 days], and holds up through several machine washings. Follow standard laundering procedures. Clothing should be retreated after six weeks [42 days] or after the sixth laundering to maintain adequate protection. Do not retreat gear more than once every six weeks [42 days]. For retreatment, follow instructions for initial treatment. [Do not dry clean.]

(ALTERNATE APPLICATION PROCEDURE FOR CLOTHING USING RESEALABLE BAG)

OPTION 1: 6 OZ. /3 ARTICLES

To repel & kill mosquitoes, chiggers, mites and ticks, including Ticks which carry Lyme disease and Rocky Mountain Spotted Fever.

This product must not be applied to clothing while it is being worn. Under no circumstances should bare skin or clothing on the body be treated.

To be used for treatment of clothing and bed nets only. Make all applications outdoors. In case of accidental contact of skin, face or eyes, see “First Aid” on side panel. **DO NOT TREAT UNDERWEAR, HATS, CAPS OR INNER CLOTHING.**

Components: [zip lock] [zipper] [resealable] treatment bag, 6 oz. bottle of Permethrin solution, waterproof gloves, string.

For multi-bottle packaging: **Components:** The kit includes __ [zip lock] [zipper] [resealable] treatment bags, __ 6 oz. bottles of Permethrin solution, __ pairs of waterproof gloves, and string.

SHAKE WELL BEFORE USING: Application Procedure: One kit will adequately treat 1 adult shirt, 1 adult trousers and 1 bed net. Pour the entire contents of the bottle into the [zip lock] [zipper] [resealable] treatment bag provided with the kit. Fill bottle (twice) with water and pour into bag. [For bulkier garments (denim jeans, heavy cotton shirts, etc.) fill bottle three times with water.] Lay garments [articles] (shirt, trousers and bed net) flat and on top of each other. Roll firmly [tightly] and tie with string provided. Place rolled up and tied garments [articles] (shirt, trousers and bed net) into the bag and seal the [zip lock] [zipper] [resealable] closure. Shake bag to provide uniform coverage of garments [items]. Let stand 2 hours or more. Wearing the waterproof gloves provided with kit, [unzip] [open] bag, remove garments [items], untie and hang outdoors until dry (approximately 2-3 hours). When dry, garments are ready to wear [items are ready for use]. Follow standard laundering procedures. Clothing should be retreated after six weeks [42 days] or after the sixth laundering to maintain adequate protection. Launder clothing at least once before retreating. [Do not dry clean.]

For further protection, use in conjunction with an insect repellent registered for direct application to the skin and utilize the following primary preventive measures: avoid areas where pests are found, wear appropriate clothing (light-colored, long sleeved shirt and long pants tucked into socks) and inspect body daily for ticks. Pant cuffs should be worn inside socks or footwear to ensure full protection against ticks and chiggers.

1. Lay articles (shirt, trousers or bed net) flat, fold (A) and roll tightly (B). Tie middle of roll tightly with string (C).

2. Pour the entire contents of the bottle into the bag.

3. Fill the bottle (twice) with water and pour into the bag.

4. Place rolled items into the bag and seal the closure.

5. Shake bag to provide uniform coverage of items. Let stand 2 hours or more.

6. Wearing the waterproof gloves, open bag and remove articles.

7. Untie string and hang articles outdoors until dry (2-3 hours). When dry, items are ready to wear/use.

8. If empty: Do not reuse this container. Place in trash or offer for recycling if available.

OPTION 2: 3 OZ. /SINGLE ARTICLE

To repel & kill mosquitoes, chiggers, mites and ticks, including Ticks which carry Lyme disease and Rocky Mountain Spotted Fever.

This product must not be applied to clothing while it is being worn. Under no circumstances should bare skin or clothing on the body be treated.

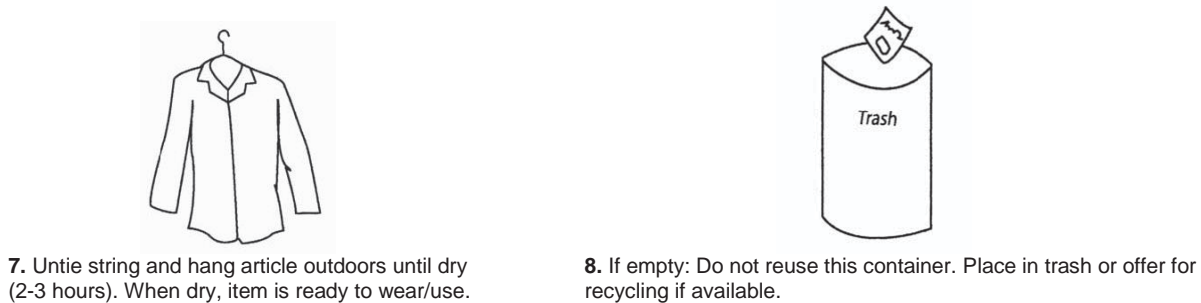

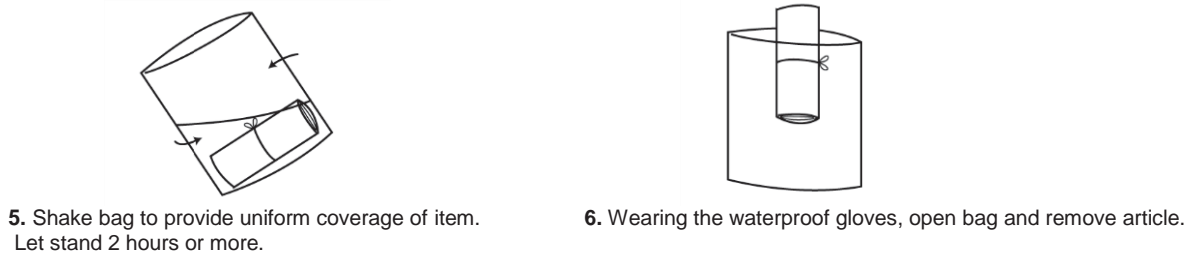

To be used for treatment of clothing or bed net only. Make all applications outdoors. In case of accidental contact of skin, face or eyes, see "First Aid" on side panel. **DO NOT TREAT UNDERWEAR, HATS, CAPS OR INNER CLOTHING.**

Components: [zip lock] [zipper] [resealable] treatment bag, 3 oz. bottle of Permethrin solution, waterproof gloves, string

SHAKE WELL BEFORE USING: Application Procedure: One kit will adequately treat one of the following: 1 adult shirt, 1 adult trousers or 1 bed net. Pour the entire contents of the bottle into the [zip lock] [zipper] [resealable] treatment bag provided with the kit. Fill bottle (twice) with water and pour into bag. [For bulkier garments [items] (denim jeans, heavy cotton shirts, etc.) fill bottle three times with water.] Lay garment [item] flat. Roll firmly [tightly] and tie with string provided. Place rolled up and tied garment [item] into the bag and seal the [zip lock] [zipper] [resealable] closure. Shake bag to provide uniform coverage of garment [article]. Let stand 2 hours or more. Wearing the waterproof gloves provided with kit, [unzip] [open] bag, remove garment [item], untie and hang outdoors until dry (approximately 2-3 hours). When dry, garment [item] is ready for use. Follow standard laundering

procedures. Clothing should be retreated after six weeks [42 days] or after the sixth laundering to maintain adequate protection. Launder clothing at least once before retreating. [Do not dry clean.]

For further protection, use in conjunction with an insect repellent registered for direct application to the skin and utilize the following primary preventive measures: avoid areas where pests are found, wear appropriate clothing (light-colored, long sleeved shirt and long pants tucked into socks) and inspect body daily for ticks. Pant cuffs should be worn inside socks or footwear to ensure full protection against ticks and chiggers.

STORAGE AND DISPOSAL

Pesticide Storage: Store in a cool, dry place inaccessible to children. **Pesticide Disposal and Container Handling:** Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID

If Swallowed	<ul style="list-style-type: none"> * Call a poison control center or doctor immediately for treatment advice. * Have person sip a glass of water if able to swallow. * Do not induce vomiting unless told to do so by a poison control center or doctor. * Do not give anything by mouth to an unconscious person.
If Inhaled	<ul style="list-style-type: none"> * Move person to fresh air. * If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. * Call a poison control center or doctor for treatment advice.
If On Skin	<ul style="list-style-type: none"> * Take off contaminated clothing. * Rinse skin immediately with plenty of water for 15-20 minutes. * Call a poison control center or doctor for treatment advice.
If In Eyes	<ul style="list-style-type: none"> * Hold eye open and rinse slowly and gently with water for 15-20 minutes. * Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. * Call a poison control center or doctor for treatment advice.
<p>Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-xxx-xxxx for emergency medical treatment information.</p>	

NOTE: The First Aid statement's grid format will be used if market label space permits; otherwise a paragraph format will be used.

ENVIRONMENTAL HAZARDS

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

Buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith.

PACKAGE INSERT

- A. For treatment of packs, tents, camp chairs, and other non washable items the application will last through 42 days of exposure to sun and air.
- B. Treating a tent and camp chairs while camping is an excellent source of bug protection.
- C. When treating clothing, Sawyer recommends 3 ounces of formula per garment. It does not matter whether the garment is a size small or extra large; you are seeking the molecules in 3 ounces of the formula to protect you. If you are treating your socks, they count in the overall application as well and the formula used is part of the 6 ounces needed to treat an outfit. Applying less than 3 ounces per garment will lead to unsatisfactory results.
- D. The more permethrin molecules in the area the greater your overall protection. Treating your shirt and pants is much more effective than just treating one of the garments. Also treating your back pack significantly adds to the protection from your shirt and pants.
- E. While ticks usually find you at the ankle level (be sure to treat the socks and pants) they can also climb bushes and find you at a higher level so be sure to treat your shirt as well if you are around bushes and concerned about ticks.
- F. Sweating and exposure to water does not significantly deteriorate the application. It is primarily the agitation of a washing machine which deteriorates the permethrin application as it knocks the molecules loose from the fabric. For best results Sawyer recommends hand washing and air drying. When using a conventional washer and dryer, use the gentle wash and dry cycles. Loss due to the dryer is limited compared to the detergent and washer agitation. Do not dry clean. Dry cleaning removes the permethrin from the fabric.
- G. Storing garments in dark plastic bags between uses helps to preserve the application.
- H. Do not expose cats to wet permethrin as it affects their central nervous system. This is not true with dogs, horses, or cows. Cats can be around permethrin treated fabrics once the application has dried.
