RAIN & SHINE POOL & PATIO

CHLORINATING SOLUTION

ACTIVE INGREDIENT: SODIUM HYPOCHLORITE
INERT INGREDIENTS: 50%

KEEP OUT OF REACH OF CHILDREN DANGER

FIRST AID: If in eyes, wash with plenty of soap and water. If in eyes, flush with plenty of water for at least 15 minutes. Get Medical Attention. If swallowed, drink large quantities of water. If on skin, wash with plenty of water. Avoid Alcohol. Do not give vinegar or other acids. Get Medical Attention. Do not induce vomiting. **Note to physician:** probable mucosal damage may contribute the use of gastric lavage.

BEST DOCUMENT AVAILABLE

DIRECTIONS FOR USE GENERAL CLASSIFICATION

BEAT AND POULTRY PROCESSING PLANTS: Surfaces or articles to be sanitized must be thoroughly pre-cleaned. Solutions containing 500 available chlorine (5 gallons of sodium hypochlorite solution per 100 gallons of water) may be used for sanitizing wire, floors, ceilings and other areas. Solutions containing 200 ppm (2 to 3 parts of available chlorine solution per 100 gallons of water) may be used on other product equipment. Do not allow the solution to come directly in contact with meat or poultry. Food contact surfaces must not be used without the permission of the local health department. Use of Fourty Infection Division of the United States Department of Agriculture.

WATER PURIFICATION: Sodium hypochlorite solution may be used to chlorinate water supplies in an amount of 1.5 to 2.5 ppm per 100 gallons of water. Apply through a solution feeder. The solution should be clear. Repeat treatment as necessary to maintain an available chlorine residual of at least 1.2 ppm. An available chlorine residual of at least 0.2 ppm as determined by test is necessary in effective dosage.

LAUNDRY BLEACH: Use 1.5 lbs of active ingredient per 100 gallons of water to make a 1% bleach solution. Use 1.5 lbs of active ingredient per 100 gallons of water to make a 1% bleach solution.

WASH PLANT AND DAIRY EQUIPMENT: Some bottling, cooling, processing, storage, and other equipment may be sanitized by using a solution prepared by adding 1.5 lbs of active ingredient of sodium hypochlorite solution per 10 gallons of water. Vessels such as milk cans, tubs, and cans should be rinsed with a solution prepared by adding 1.5 lbs of active ingredient of sodium hypochlorite solution per 100 gallons of water after sanitizing the equipment.

NOTE: This product degrades with age. Use a chlorine test kit to measure dosage. Do not use in areas where there is a fire hazard. Do not use in areas where there is a risk of explosion.

STORAGE AND DISPOSAL: Do not store in food, feed, or other containers. Store in original container. Do not store in areas where there is a fire hazard. Do not store in areas where there is a risk of explosion.

PESTICIDE DISPOSAL: In case of fire, use water to extinguish. Do not use water to extinguish. Do not use water to extinguish. Do not use water to extinguish.

NOTE: Changes in label or in differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

1. The registrant is required to file a copy of the labeling accepted in connection with this registration with the Administrator. The Administrator will issue a registration number to the registrant upon receipt of the labeling. The registration number will be placed on the label of the pesticide. The registration number is valid for one year from the date of issuance. The registrant must file a copy of the labeling with the Administrator at least 60 days before the expiration of the registration. The Administrator may, at his discretion, extend the registration for a period of up to 90 days. The Administrator may, at his discretion, suspend or cancel the registration of a pesticide if the registrant fails to file the labeling or if the labeling is found to be deficient. The Administrator may, at his discretion, require the registrant to file additional information or to conduct additional testing. The Administrator may, at his discretion, require the registrant to file a copy of the labeling with the Administrator at the time of the registration. The Administrator may, at his discretion, require the registrant to file a copy of the labeling with the Administrator at the time of the registration. The Administrator may, at his discretion, require the registrant to file a copy of the labeling with the Administrator at the time of the registration.
