BEST AV

AUG 18 1987

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.

**PRECAUTIONARY STATEMENT  
HAZARDS TO HUMANS  
AND DOMESTIC ANIMALS**

**DANGER:**

HIGHLY CORROSIVE CAUSES SKIN  
AND EYE DAMAGE MAY BE FATAL  
IF SWALLOWED Do not get in eyes, on  
skin or on clothing. Wear goggles or face  
shield and rubber gloves when handling.  
Irritating to nose and throat. Avoid  
breathing dust. Remove and wash all  
contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:**

This product is toxic to fish. Do not  
discharge into lakes, streams, ponds, or  
public waters unless in accordance with  
an NPDES Permit. For guidance, contact  
the regional office of EPA.

**PHYSICAL AND CHEMICAL HAZARDS**

**STRONG OXIDIZING AGENT:** Mix only  
with water. Use clean, dry utensils. Do  
not add this product to any dispensing  
device containing remnants of any other  
product. Such use may cause a violent  
reaction - leading to fire or explosion.  
Contamination with moisture, organic  
matter, or other chemicals may start a  
chemical reaction, with generation of  
heat, liberation of hazardous gases, and  
possible generation of fire and explosion.  
In case of contamination/decomposition,  
do not reuse the container. If possible,  
isolate this container in open air or  
well-ventilated area. Flood with large  
volumes of water, if necessary.

**AQUA-TAB**  
For Water Storage Tanks

Included are water storage  
tanks on boats, cars, camping  
trailers, etc.

**ACTIVE INGREDIENT:**  
Calcium Hypochlorite 70%  
**INERT INGREDIENT** 30%  
(AVL CHLORINE 70%)  
Pellet Wt 1 Gram

**KEEP OUT OF REACH OF CHILDREN  
DANGER**

**Practical Treatment - FIRST AID:**  
**IF SWALLOWED:** Feed bread soaked in  
milk, followed by olive oil or cooking oil.  
Call a physician immediately.

**IF ON SKIN:** Brush off excess chemical  
and flush skin with cold water for at  
least 15 minutes. If irritation persists, get  
medical attention.

**IF IN EYES:** Flush with cold water for at  
least 15 minutes. Get medical attention.

**DIRECTIONS FOR USE**

IT IS A VIOLATION OF FEDERAL LAW  
TO USE THIS PRODUCT IN A MANNER  
INCONSISTENT WITH ITS LABELING.

This product is intended to be used  
for treating water in all private water  
systems that require adequate sanitation  
to be safe for human consumption.

**Manual Treatment:** When relatively small  
quantities of water must be sanitized, Aqua-Tab  
dry chlorinator tablets may be applied directly.  
For the initial chlorine dosage, add one (1)  
Aqua-Tab dry chlorinator tablet for 25 gallons  
of water to provide the water with approximately  
10ppm available chlorine. This will kill many  
bacteria. Let water stand for at least 20  
minutes. Then test for chlorine residual. If a  
residual of 0.2ppm is not present, repeat the  
procedure until this level is obtained.

For routine chlorination of water storage  
tank the EPA recommends to add the required  
amount of Aqua-Tab dry chlorinator tablets to  
assure a chlorine residual of 0.2 to 0.6ppm  
available chlorine. Check water frequently with  
test kit to maintain a sanitized system.

**IF IN EYES:** Flush with cold water for at least 15 minutes. Get medical attention.

**DIRECTIONS FOR USE**

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.**

This product is intended to be used for treating water in all private water systems that require adequate sanitation to be safe for human consumption.

**Manual Treatment:** When relatively small quantities of water must be sanitized, HTH (R) dry chlorinator tablets may be applied directly. For the initial chlorine dosage, add one (1) HTH (R) dry chlorinator tablet for 20 gallons of water to provide the water with approximately 10ppm available chlorine. This will kill many bacteria. Let water stand for at least 20 minutes. Then test for chlorine residual. If a residual of 0.2ppm is not present, repeat the procedure until this level is obtained.

For routine chlorination of water storage tank the EPA recommends to add the required amount of HTH (R) dry chlorinator tablets to assure a chlorine residual of 0.2 to 0.6ppm available chlorine. Check water frequently with test kit to maintain a sanitized system.

Autotrol Corporation  
3720 N. Glen Park Road  
Milwaukee, WI 53209

**STORAGE AND DISPOSAL**

Keep this product dry in a tightly closed container. When not in use, store in cool, dry, well-ventilated area - away from heat or open flame.

In case of decomposition, isolate the container (if possible) and flood area with large amounts of water to dissolve all materials before discarding container. Do not reuse empty container, but place in trash collection. Do not contaminate food or feed by storage or disposal or cleaning of equipment.

Triple rinse (or equivalent). Then offer for recycling or reconditioning. OR puncture and dispose of in a sanitary landfill, OR incineration, OR if allowed by state and local authorities, by burning. If this container is burned, stay away from the smoke.

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for your information and guidance.

**DIRECTIONS FOR USE**

**IT IS A VIOLATION OF FEDERAL LAW  
TO USE THIS PRODUCT IN A MANNER  
INCONSISTENT WITH ITS LABELING.**

This product is intended to be used for on board marine drinking water storage tanks. Tank start up. To destroy residual chemical such as propylene glycol. Kills many bacteria and slime.

1. Drain tank. Remove all water filters.
2. Refill with fresh water.
3. Add one (1) chlorinating tablet per 20 gallon.
4. Let stand 3 to 4 hours.
5. Run water through all water lines for 5 minutes.
6. Check water with test strip. If pink color does not appear repeat starting at Step 3.
7. If pink color is present let water stand for 48 hours.
8. Add sodium bisulfite tablet and let stand for 1 hour.
9. Drain water and replace with fresh water.
10. Start sanitation with chlorinator products such as HTH (R) dry chlorinator tablets.
