DIRECTIONS FOR USE GENERAL CLASSIFICATION
It is a violation of federal law to use this product in a manner inconsistent with its labeling.
WATER AND POULTRY PROCESSING PLANTS
Sodium hypochlorite (a solution of sodium hypochlorite equivalent per 100 gallons of water) may be used for disinfecting water, meat, ceilings and other areas. Solutions containing 200 ppm (1/2 part of each 100 gallons) sodium per 100 gallons of water may be used on food products equipment. Do not allow the solution to come directly in contact with meat or poultry. Strong concentrations of solutions must not be used without the permission of the Meat Inspection Division or Poultry Inspection Division of the United States Department of Agriculture.

WATER TREATMENT
Sodium hypochlorite solution may be used to chlorinate water supplies at an initial rate of 1/2 part of each 100 gallons of water. Apply through a filter on filter and determine the required chlorine treatment as necessary to maintain an available chlorine residual of at least 1 ppm. An average chlorine residual of at least 0.2 ppm is determined by test at 100% efficiency.

ADDITIONAL BLEACH

For 1 part sodium hypochlorite solution with 8 parts water to make a 10% bleach solution, use 1/2 part of the chlorine solution to each 100 pounds of laundry.

SWIMMING POOL EQUIPMENT

Soak vinyl coated swimming pool liners, vinyl accessories, vinyl and other equipment that are saturated by rinsing with a solution prepared by adding 3 1/2 teaspoons of sodium hypochlorite solution per 10 gallons of water. Soak such offending items, tiles, trucks and tools should be rinsed with a solution prepared by adding 2 1/2 parts of sodium hypochlorite solution per 100 gallons of water. After rinsing the equipment should be rinsed thoroughly.

NOTE: This product degrades over time. Use chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL Do not contaminate water, food, feed or other chemicals by storage, disposal or leaking of equipment. Store in a closed storage and away from children and in original containers.

PESTICIDE DISPOSAL In case of spill, soak area with large quantities of water. Collect the water for disposal. Do not allow the water and solution of this product to enter any water course or body of water.

CONTAMINATED EQUIPMENT These items simply combine thermally with water. Their return to manufacturers for recycling or remanufacturing or purchase and disposal in a sanitary container, or if allowed by State and Local Authorities by burning. Stay out of sunlight.

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The product is considered as registered in accordance with FIFRA section 4(e)(3) as a general intent to reregister. Under FIFRA section 4(e)(3), the registrant is responsible for ensuring that all new products and/or products to which the Agency has issued an order of allowances or approvals, meet the safety and effectiveness standards set forth in the original registration application or the order of allowances or approvals.

It is the responsibility of the registrant to keep the Agency informed of any changes in the product or its use which may affect its safety or effectiveness. Any change in the product or its use which may affect its safety or effectiveness must be reported to the Agency within 15 days of the change. If the registrant fails to report such changes, the Agency may take action to suspend or cancel the registration of the product.
