REGISTRATION DIVISION (7H-167)
WASHINGTON, D.C. 20460

NOTICE OF PESTICIDE: ☒ REGISTRATION
☒ REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

REGISTRATION NO. 50956-1

DATE OF ISSUANCE

March 19, 1985

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

Granular Calcium Hypochlorite

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Saskatoon Chemical
Warman Road
P.O. Box 1586
Saskatoon, Saskatchewan S7K 3R3 Canada

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA Section 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/re-registration to your product under FIFRA Section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Add the phrase "EPA Registration No. 50956-1" to your label before you release the product for shipment.

3. Submit five copies of your final printed labeling to the Agency before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER. Highly corrosive.

Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or in clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES Permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Strong oxidizing agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

KEEP OUT OF THE REACH OF CHILDREN DANGER

PRACTICAL TREATMENT (FIRST AID):

If swallowed: Feed bread soaked in milk, followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with labeling.

Seller's guarantee shall be limited to terms set out on this label and subject thereto, the buyer assumes the risk to persons or property arising from the handling of this product and accepts product on that condition.

DIRECTIONS FOR USE: Chlorox with available chlorine, is designed to disinfect quickly and provide a ready source of available chlorine in swimming pools. Used according to directions, Chlorox controls algae, kills bacteria and destroys organic contaminants. If any chlorine residual is present, adding 2 oz. per 10,000 gals. will increase the residual to approximately 1 part per million (ppm). Follow the dosages and procedures recommended below.

DIRECTIONS FOR POOL USE: Always adjust pH between 7.2 and 7.4 prior to using Chlorox.

STABILIZED CHLORINE INFORMATION OF STABILIZED POOL: For pools stabilized with cyanuric acid, periodic superchlorination is necessary to provide sufficient free available chlorine to control algae. Destroy unfettered organic contamination, minimize odours and keep your water sparkling clear. Superchlorinate by broadcasting over a large area, mainly the deep end of the pool, 10 oz. per 10,000 gals. Superchlorinate every 14 days when the temperature of the water is below 80°F. Treatment every 7 days is recommended when the temperature is higher. Bathing loads are heavy, pool water appears dull or hazy, an unpleasant chlorine like smell is present, excessive irritation occurs, or after heavy rains. Pools should not be entered until the chlorine residual is below 2.0 ppm.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Seller's guarantee shall be limited to the terms set out on this label and subject thereto, the buyer assumes the risk to persons or property arising from the use, handling of the product and accepts the product in that condition.

DIRECTIONS FOR USE: Chloryte, with 65% available chlorine, is designed to dissolve quickly and provide a ready source of available chlorine in swimming pools. Used according to directions, Chloryte controls algae, kills bacteria and destroys organic contaminants. If any chlorine residual is present, adding 2 oz. per 10,000 gals. will increase the residual by approximately 1 part per million (ppm). Follow the dosages and procedures recommended below.

DIRECTIONS FOR POOL USE: Always adjust pH between 7.2 and 7.4 prior to using Chloryte.

SUPERCHLORINATION OF STABILIZED POOLS:

For pools stabilized with cyanuric acid, periodic superchlorination is necessary to provide sufficient free available chlorine to control algae, destroy unfettered organic contaminants, minimize odours and keep your water sparkling clear. Superchlorinate by broadcasting over a large area, mainly in the deep end of the pool, 1 lb. oz. per 10,000 gals. Superchlorinate every 14 days when the temperature of the water is below 80°F. Treatment every 7 days is recommended when the temperature is higher, bathing loads are heavy, pool water appears dull or hazy, an unpleasant chlorine like smell is present, excessive irritation occurs, or after heavy rains. Pool should not be entered until the chlorine residual is below 2.0 ppm.
