APPLICATIONS TO PECANS

KEEP OUT OF REACH OF CHILDREN

CAUTION

In case of emergency involving this product call 1-800-451-8461.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, Consult the agency responsible for pesticide regulation.

Read all directions carefully before applying.

PECANS

For control of powdery mildew, leaf spot, sooty mold, silver mite, flat mite, two-spotted mite, and eriophyid mites (including pecan and hickory) apply 4 to 16 pounds per acre. Make first application when disease is first noticed. Apply at 1-2 week intervals throughout the season as needed.

Directions for Dilution**Dilute Application:**

Ground: Specified Rate in 100 to 800 gallons of water per acre

Concentrate Application:

Ground: Specified rate in 20 to 100 gallons of water per acre

Aerial Application:

Specified rate in 10 to 20 gallons of water per acre

2 7 2

Note: Some varieties of pecans are sensitive to sulfur sprays under certain conditions. Do not apply unless varieties are known to be tolerant of sulfur. Sulfur may burn foliage if temperature is above 95F degrees. Foliage must be thoroughly covered with spray. Dense leaf canopies can prevent adequate spray coverage. Micro Flo Company LLC does not have a list of recommended additives or adjuvants for use with Microspense Wettable Sulfur. Do not apply within 2 weeks of an oil spray treatment.

**Read the "Conditions of Sale" in the label booklet for
Microspense Wettable Sulfur before using.**
