Dear Mr. Gaskins:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable provided that you make the labeling changes indicated below before you release the product for shipment bearing the amended labeling:

1. On page 4 under the crops beans the maximum application rate per acre per application must be changed to 30 lbs of product since a maximum of 1.5 lbs ai/acre/application is specified.
2. On page 6 under the crop sugar beets the maximum rate per acre per application must be changed to 30 pounds for the same reason as 1 above.
3. On page 6 under the heading "Important Pre-Harvest and Grazing Use Information" you must delete the words "and cotton forage" since cotton has been deleted from all carbaryl products.
4. You must delete the crops **Alfalfa** and **Peanuts** from this label since they are not being supported for bait or granular formulations.

Submit two copies of your final printed labeling before you release the product for shipment. A copy of the labeling stamped "Accepted With Comments" is enclosed for your records. If you have any questions concerning this letter, please contact me at (703) 308-9397.

Tolerances established under the Federal Food, Drug and Cosmetic Act permit the sale of crops bearing probable Carbaryl residues when Carbaryl is used in accordance with label directions. If Carbaryl insecticide is used in accordance with label directions, these crops including bean vines, carrot tops, pea vines, sugar beet tops, grass forage, corn forage and cotton forage may be grazed or harvested for use as feed for dairy and meat animals without resulting residues in milk or meat.

LAWNS, TURF, ORNAMENTAL PLANTS & AROUND BUILDINGS

Treatments may be repeated as necessary to control Ants, Armyworms, Bluegrass billbugs, Centipedes, Chiggers, Chinch bugs, Cutworms, Darkling beetles, Earwigs, Essex skipper, European crane fly larvae, Field crickets, Fiery skipper, Firebrats, Grasshoppers, June beetles, Lawn moths (sod webworm), Lucerne moth larvae, Millipedes, Mole Crickets, Scorpions, Silverfish, Sowbugs, Spiders, Spittlebugs, Springtails, Ticks, and White grubs (such as Japanese beetle, Phyllophaga spp. and Green June beetle grubs).

LAWN & TURF - Treat entire area evenly at a dosage of 2.25 to 3 pounds per 1,000 sq.ft. Apply with a rotary spreader to obtain uniform coverage, giving particular attention to edges of sidewalks and along porch and patio foundations. For best results cut lawn and remove clippings before treatment.

ORNAMENTAL PLANTINGS - Apply evenly to soil around plants, shrubs and trees at a rate of 2.25 to 3 pounds per 1,000 sq. ft. For best results, areas to be treated should be damp. Repeat as needed for

control.

FOR CONTROL OF WHITE GRUBS (SUCH AS JAPANESE BEETLE, PHYLLOPHAGA SPP.), BLUEGRASS BILLBUGS, EUROPEAN CRANE FLY LARVAE, GREEN JUNE BEETLE GRUBS - Treat the area at a dosage of 5 pounds per 1,000 sq. ft.

AROUND BUILDINGS - Apply Car bait 5 uniformly in an 8 foot band around the building at 8 ounces per 160 square feet (8 x 20 foot band, equivalent to 3 pounds per 1,000 sq. ft.) to shrub and flower beds, foundations, ornamental plantings and lawn or soil areas immediately adjacent to the building.

ADDITIONAL APPLICATION DIRECTIONS - TURF AND ORNAMENTAL INSECTS

For Chinch bugs, Lawn moths (sod webworm), Mole crickets, and White grubs (such as Japanese beetle, Phyllophaga spp. and Green June beetle grubs) apply enough water to thoroughly wash the insecticide into the turf or soil areas to be treated.
