

PM19 51036-76

9/16

ACCEPTED
APR 27 1993
Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 51036-76

Draft to amend Louisiana sugarcane uses for 1993 season.

**RESTRICTED USE PESTICIDE
DUE TO ACUTE TOXICITY**

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicators certification

AZINPHOSMETHYL 2 EC

ACTIVE INGREDIENT:

0,0-DimethylS-[(4-oxo-1,2,3-benzotriazin-3(4H)-yl)methyl] phosphorodithioate	22.2%
INERT INGREDIENTS.....	77.8%
TOTAL	100.0%

This product contains 2 pounds Azinphosmethyl per gallon

KEEP OUT OF REACH OF CHILDREN

POISON

DANGER

PELIGRO

PRECAUCION AL USUARIO: Si usted no lee ingles, no use este producto hasta que la etiqueta haya sido explicada ampliamente.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger and repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person. Have victim lie down and keep quiet.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth to mouth. Get medical attention.

IF ON SKIN: In case of contact, remove contaminated clothing and immediately wash skin with soap and water and get medical attention.

IF IN EYES: Flush immediately with plenty of water. Get medical attention if irritation persists.

See Additional Precautionary Statements Elsewhere on Label

EPA Reg. No. 51036-76

EPA Est. No. 51036-GA-1

Manufactured By
MICRO FLO COMPANY
P.O. BOX 5948
LAKELAND, FL. 33807

WORK SAFETY RULES

If handled indoors provide mechanical exhaust ventilation. Keep all unprotected persons, children, livestock, and pets away from treated areas or where there is danger of drift. Do not rub eyes or mouth with hands. If you feel sick in any way, STOP work and get help right away. See First Aid section of the label. For questions regarding further treatment, or information about the product, call the National Pesticide Telecommunications Network at 800-858-7378.

PROTECTIVE CLOTHING AND WORK SAFETY STATEMENTS

HANDLE THE CONCENTRATE ONLY WHEN WEARING THE FOLLOWING PROTECTIVE CLOTHING AND EQUIPMENT.

Wear a protective suit of one or two pieces that covers all parts of the body except the head, hands, and feet. Wear chemical resistant gloves, chemical resistant apron, and chemical resistant shoes, shoe coverings, or boots. Wear goggles or a face shield and a pesticide respirator approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part II.

If handling the concentrate with a closed system, long sleeved shirt and long-pants may be substituted for the protective suit, and the respirator requirement is waived.

WEAR THE FOLLOWING PROTECTIVE CLOTHING DURING APPLICATION, EQUIPMENT REPAIR, EQUIPMENT CLEANING, DURING REENTRY TO TREATED AREAS, AND DISPOSAL OF THE PESTICIDE: Wear a protective suit of one or two pieces that covers all parts of the body except the head, hands, and feet. Wear chemical resistant gloves and chemical resistant shoes, shoe coverings, or boots. Wear a chemical resistant hat during airblast application. During application from an enclosed tractor cab or airplane cockpit, or other suitable vehicle in which the windows are rolled up, long sleeved shirt and long pants may be worn in place of the above protective clothing. Chemical resistant gloves must be available in the cab or cockpit and must be worn while exiting. This clothing is inadequate to protect you during equipment repair, equipment cleaning, re-entry, or during pesticide disposal.

IMPORTANT! BEFORE REMOVING GLOVES, WASH THEM WITH SOAP AND WATER. ALWAYS WASH HANDS, FACE AND ARMS WITH SOAP AND WATER BEFORE SMOKING, DRINKING, EATING OR TOILETING.

After work, take off all clothing and shoes. Shower using soap and water. Do not wear contaminated clothing. Wash protective clothing and protective equipment with soap and water after each use. Respirators must be cleaned and filters replaced according to instructions included with the respirators. Personal clothing worn during use must be laundered separately from household articles.

40210

Clothing and protective equipment heavily contaminated or drenched with Azinphosmethyl must be destroyed according to state and local regulations. HEAVILY CONTAMINATED OR DRENCHED CLOTHING CANNOT BE ADEQUATELY DECONTAMINATED.

During aerial application, human flaggers are prohibited unless in totally enclosed vehicle.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame. Do not store below 25 degrees F for extended periods of time. Do not cut or weld container when empty.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner which is inconsistent with its labeling.

CHEMIGATION PROHIBITION

Do not apply this product through any type of irrigation system.

RE-ENTRY STATEMENTS

Do not enter treated areas for 24 hours unless appropriate protective clothing is worn. Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information. Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. (Indicate specific oral warnings which inform workers of areas or fields that may not be entered without specific protective clothing, period of time field must be vacated and appropriate actions to take in case of accidental exposure). When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers. Written warnings must include the following information:

DANGER - PELIGRO, Area treated with Azinphosmethyl 2 EC on (date of application). Do not enter without appropriate protective equipment for 24 hours. If inhaled, remove victim to fresh air. If victim is not breathing, give artificial respiration. Get medical attention. If on skin, remove contaminated clothing, and wash affected areas with soap and water. If in eyes, flush eyes with plenty of water.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment. Open dumping is prohibited.

STORAGE: Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Not for use or storage in or around the home. Do not store next to food, or feed, or transport in or on vehicles containing foodstuffs or feeds. Store in a cool, dry place. Protect from heat.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

RESTRICTIONS

Do not use on other crops used for food or forage. Use only according to label directions. Applications at rates above those shown on the label may result in illegal crop residues.

ROTATIONAL CROP STATEMENT

Do not plant root crops other than those with registered Azinphosmethyl uses in Azinphosmethyl treated soil sooner than 6 months after the last application. Do not plant any other crop other than those with registered Azinphosmethyl uses in treated soil sooner than 30 days after last applications.

MIXING

Azinphosmethyl 2EC forms an emulsion when diluted with water and is suitable for use in all power-operated ground sprayers and aircraft sprayers. To mix with water pour the required amount of Azinphosmethyl 2 EC into full amount of water and then agitate. Azinphosmethyl 2 EC may also be applied undiluted as an ultra low volume spray with either ground or aircraft equipment that have been adapted and calibrated for ultra-low volume spraying as described under "Recommended Applications" for those crops specified.

DOSAGE

Use specified dosage of Azinphosmethyl 2 EC in the amount of water necessary to give complete coverage of foliage. The type of equipment used will determine the concentration required.

SPRAYING

Work to windward. Protect spray operators from drift or mist. When low volumes of spray are applied, complete coverage and thorough application are essential for most effective results. Schedule applications in accordance with local conditions. Consult your State Agricultural Extension Service or Experiment Station for specific use information in your area.

60716

FIELD CROPS

NOTE: Pre-Harvest Interval days indicated in () after each use.

ALFALFA, CLOVER: (14/16/21)

Alfalfa Weevil 1 to 3 pints. Aphids, Leafhoppers, Mites - 1 to 2 pints.

Egyptian alfalfa weevil - 1 1/2 to 3 pints.

Alfalfa plant bug, Fleahopper, Grasshoppers, Lygus bugs, Spittlebug - 2 to 3 pints.

Apply specified dosage per acre, using a minimum of 10 gallons of water per acre when applying with ground equipment, and a minimum of 5 gallons per acre for aerial applications for alfalfa weevils, and at least 1 gallon per acre for the other insects listed. It may be necessary to use 20 to 25 gallons of water per acre or heavy growth for control of alfalfa weevil or Egyptian alfalfa weevil with ground equipment. Apply twice per cutting at the 1 pint rate, at intervals of 10 to 11 days. Do not apply more than twice per cutting at the 1 pint rate. Apply only once per cutting at rates above 1 pint per acre. Do not apply within 14 days of harvest at the rates of 1 to 1 1/2 pints per acre, or within 16 days, at the rate of 2 pints per acre. Do not apply rates above 2 pints per acre within 21 days of harvest.

COTTON (Conventional or low-volume spray): (1)

Boll weevil - 1/2 to 1 pint per acre.

Aphids, Brown cotton leafworm, Cotton fleahopper, Cotton leafworm - 1 pint per acre.

Lygus bugs, Thrips, Rapid plant bug, Tarnished plant bug - 1 to 2 pints per acre.

Stinkbug - 2 pints per acre.

Bollworm, Pink bollworm - 2 to 4 pints per acre.

Apply specified dosage per acre, by air or ground equipment, in at least 1 gallon of water. For early-season control of bollworm and pink bollworm, use 2 to 3 pints, and for mid to late season applications, use 3 to 4 pints. Repeat as necessary.

Do not graze livestock in treated areas.

COTTON (1) (Ultra-low-volume spray): (2)

Boll weevil - 1/2 to 1 pint.

Azinphosmethyl 2 EC may be used undiluted in any ground or aerial spray equipment that has been adapted and calibrated for ultra-low-volume spraying. Spray machines must be equipped with accepted low-volume devices that will produce droplets within the range of 30 to 100 microns in size. ULV aerial applications should be made at altitudes of 10 to 20 feet. Repeat application as necessary, but not within 2 days of handpicking. Cotton may be machine-harvested any time after application. Do not graze livestock in treated areas.

EARLY MID-SEASON CONTROL: Apply specified dosage per acre in accordance with local recommendations.

DIAPAUSE WEEVIL CONTROL: One pint per acre rate is recommended only for control of diapausing boll weevils. Schedule applications in accordance with local recommendations. Do not graze treated fields.

BARLEY, OATS, RYE, WHEAT: (30)
Cereal leaf beetle - 1 1/2 to 2 pints.
Apply specified dosage per acre by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. Do not apply more than once per season. Do not graze within 30 days of treatment.

SOYBEANS: (14/45)
Aphids, Bean leaf beetle, Green cloverworm, Leafhoppers, Leaf miners, Leaf rollers, Stink bugs, Velvet bean caterpillar - 1 1/2 to 2 pints.
Mexican bean beetle - 2 to 3 pints.
Apply specified dosage per acre by air or ground equipment in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit applications to 5 per crop season regardless of rate used. Allow at least 7 days between applications. One or 2 applications of rates up to 2 pints per acre may be made up to 14 days of harvest. For additional applications or for use of rates above 2 pints per acre, do not apply within 45 days of harvest. Do not graze or feed treated vines to livestock.

SUGARCANE (Conventional spray) (Florida and Texas only): (30)
Sugarcane borer - 3 pints.
Apply specified dosage per acre by air, using a minimum of 2 gallons of water per acre. For best results, applications should be made at approximately cane-top level, and not more than 10 feet above cane-top level. Limit applications to 5 per crop season regardless of rate used. Bagasse from sugarcane treated with Azinphosmethyl 2EC may be used for feed of cattle, goats and sheep. Consult your State Agricultural Extension Service or Experiment Station for specific use information.

SUGARCANE (Ultra-low-volume spray) (Florida and Texas only): (30)
Sugarcane borer - 3 pints.
Apply specified dosage per acre undiluted. Azinphosmethyl 2 EC may be used undiluted in any aerial spray equipment that has been adapted and calibrated for ultra-low-volume spraying. Planes must be equipped with accepted low-volume devices that will produce droplets within the range of 30 to 100 microns in size. For best results, applications should be made at approximately cane-top level, and not more than 10 feet above cane-top level. Limit applications to 5 per crop season regardless of rate used. Bagasse from sugarcane treated with Azinphosmethyl 2EC may be used for feed

of cattle, sheep and goats. Consult your State Agricultural Extension Service or Experiment Station for specific use information.

SUGARCANE (LOUISIANA RESTRICTIONS): (30)

The following restrictions apply to sugarcane in Louisiana regardless of application method.

- 1) Do not apply more than 2 times per season.
- 2) Do not apply in the rain.
- 3) Do not make applications during temperature inversions. A temperature inversion is a stable atmospheric condition characterized by an increase in air temperature with increased height above the ground until at some height a "ceiling" or barrier of colder air is met.
- 4) Make applications when the wind velocity favors on target product deposition (approximately 3 to 10 mph). In Louisiana do not apply when the wind velocity exceeds 10 mph.
- 5) For applications, the spray boom must be mounted on the aircraft so as to minimize drift caused by wingtip or rotor vortices. Boom length must not exceed 75% of wing span or rotor diameter.
- 6) In Louisiana, do not apply within 100 feet of lakes, reservoirs, rivers, permanent streams, marshes or ponds, canals, estuaries and commercial fish farm ponds.
- 7) Do not apply if the soil is saturated with water.
- 8) Do not apply under conditions that favor runoff.
- 8) Allow at least 21 days between applications.

TOBACCO: (6)

Aphids, Grasshoppers, Tobacco hornworm, Tobacco flea beetle - 2 to 3 pints.

Tobacco budworm - 3 pints.

Apply specified dosage per acre by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. Treat for hornworms as soon as egg masses or worms are first found. Repeat as necessary. Prime before treating.

FRUIT

NOTE: Pre-Harvest Interval days indicated in () after each use.

APPLES, CRAB APPLES, QUINCES (Washington, Oregon, Idaho and Utah): (7)

Apple maggot, Codling moth, European apple sawfly, Eye-spotted bud moth, Fruit tree leafroller, Green fruitworm, Orange tortix, Plum curculio, Redbanded leafroller -2 to 4 pints per acre.

Apply specified dosage per acre by helicopter or fixed wing aircraft using equipment capable of applying ultra-low volume sprays. Limit applications to 4 per crop season regardless of rate used. Allow at least 7 days between applications. Only 2 of the 4 applications may be made aerially.

APRICOTS, NECTARINES, PEACHES: (21)

(Eastern U.S.)

Aphids, Cottony peach scale, European fruit lecanium scale, Forbes scale, Lesser peach tree borer, Mites, Oriental fruit moth, Peach tree borer, Peach twig borer, Platynota flavedana leaf roller, Plum curculio, Red-banded leaf roller, San Jose scale, Stink bug, Tarnished plant bug, Terrapin scale, Thrips, Walnut scale, White peach scale - 3 1/2 to 4 1/2 pints.

Apply specified dose per acre as a full coverage spray. Allow at least 14 days between applications. Limit applications to 13 1/2 pints per acre per crop season for nectarines and 18 pints per crop season for peaches. For control of peach tree borer, apply 2 or 3 sprays to trunk from ground to scaffold limbs, timed with moth flight. For control of scale, apply when crawlers are present. Azinphosmethyl 2E is compatible with dormant and summer oils which may be added to peach sprays in accordance with local recommendations.

APRICOTS, NECTARINES, PEACHES: (21)

(West of the Rocky Mountains)

Lesser peach tree borer, Oriental fruit moth, Peach tree borer, Peach twig borer, Platynota flavedana leaf roller, Plum curculio, Red-banded leaf roller, Stink bug, Thrips, Tarnished plant bug, - 6 to 8 pints.

Apply specified dose per acre as a full coverage spray. Allow at least 14 days between applications. Limit applications to 13 1/2 pints per acre per crop season for nectarines and 18 pints per crop season for peaches. For control of peach tree borer, apply 2 or 3 sprays to trunk from ground to scaffold limbs, timed with moth flight. For control of scale, apply when crawlers are present. Azinphosmethyl 2E is compatible with dormant and summer oils which may be added to peach sprays in accordance with local recommendations.

PLUMS AND PRUNES: (15)

(Eastern U.S.)

Aphids, Codling Moth, Eye-spotted bud moth, Forbes scale, Fruit tree leaf roller, Lesser peach tree borer, Mites, Orange tortrix, Peach tree borer, Peach twig borer, Plum curculio, Red-banded leaf roller, San Jose scale, Stink bug, Tarnished plant bug, Tussock moth - 3 1/2 to 4 1/2 pints.

American plum borer - 6 pints.

Apply specified dosage per acre as a full coverage spray. Limit applications to 13 1/2 pints per acre per crop season. Allow at least 10 days between applications. For control of peach tree borer, apply 2 or 3 sprays to trunk from ground to scaffold limbs, timed with moth flight. For control of scale, apply when crawlers are present. Azinphosmethyl 2E is compatible with dormant and summer oils which may be added to peach sprays in accordance with local recommendations.

PLUMS, PRUNES: (15)

(West of the Rocky Mountains)

Codling Moth, Eye-spotted bud moth, Fruit tree leaf roller, Lesser peach tree borer, Orange tortrix, Peach tree borer, Peach twig borer, Plum curculio, Red-banded leaf roller, Stink bug, Tarnished plant bug, Tussock moth - 4 to 8 pints.

American plum borer - 6 to 8 pints.

Apply specified dosage per acre as a full coverage spray. Limit applications to 13 1/2 pints per acre per crop season. Allow at least 10 days between applications. For control of peach tree borer, apply 2 or 3 sprays to trunk from ground to scaffold limbs, timed with moth flight. Azinphosmethyl 2E is compatible with dormant and summer oils which may be added to peach sprays in accordance with local recommendations. Allow 15 days between last application and harvest.

BLACKBERRIES, BOYSENBERRIES, LOGANBERRIES, RASPBERRIES: (14)

Leafhoppers, Leaf rollers - 3 pints.

Leaf miners - 3 3/4 pints.

Aphids - 3 3/4 to 5 pints.

Obscure root weevil - 5 pints.

Apply specified dosage per acre with aerial or ground equipment using sufficient water for good coverage. Limit applications to 4 per crop season regardless of rate used. Allow at least 10 days between applications.

Raspberry crown (root) borer - 4 to 8 pints.

Obscure root weevil - 5 pints.

For control of root weevils and borers prior to harvest, apply specified dosage per acre to lower portion of canes, and to the soil beneath the plants, using approximately 200 gallons of water. Do not apply more than twice per season. Do not make applications within 3 days of harvest at rates up to 4 pints per acre. Rates above 4 pints per acre should be applied only before fruitset, or after crop is harvested.

BLUEBERRIES (Eastern and North Central states only): (7)

Blueberry maggot, Fruitworms, Lecanium scale, Plum curculio - 2 to 3 pints.

Apply specified dosage per acre with aerial or ground equipment using sufficient water for good coverage. Limit applications to 3 per crop season regardless of rate used. Allow at least 10 days between applications.

CRANBERRIES: (21)

Cranberry fruitworm, Sparganothis sulfureana, Tipworm - 2 to 4 pints.

Fireworms - 4 pints.

Apply specified dosage per acre by air using sufficient water for good coverage. Limit applications to 3 per crop season regardless of rate used. Allow at least 14 days between applications.

CHERRIES: (15)

Eye-spotted bud moth, Forbes scale, Fruit Flies, Fruit tree leaf roller, Lesser peach tree borer, Mites, Plum curculio, San Jose scale - 3 to 4 pints.

Cherry leaf miner, Mineola moth - 3 pints.

Apply specified dosage with aerial or ground equipment in sufficient water for complete coverage. Limit applications to 6 per crop season regardless of rate used. Allow at least 7 days between applications.

CITRUS FRUITS: (7/28)

Aphids, Black scale, Brown soft scale, Chaff scale, Citricola scale, Citrus mealybug, Citrus rust mite, Citrus thrips, Cottony-cushion scale, European brown scale, Florida red scale, Fruit tree leaf rollers, Fuller rose beetle, Glover scale, Orange tortrix, Purple scale, Snow scale, Western tussock moth, Whiteflies - 5 to 8 pints.

California red scale, Texas citrus mite, Yellow scale - 8 pints.

Apply specified dosage per acre with aerial or ground equipment using sufficient water to insure complete coverage. Limit application to 2 per crop season regardless of rate used. Do not pick fruit or do other work involving contact with the tree (such as pruning) within 7 days after treatment.

NOTE: Pre-harvest interval is 7 days if one application has been made. If 2 applications are made, Pre-harvest interval is 28 days.

GRAPES: (1/10)

Grape berry moth, Grape cane girdlers, Grape mealybug, Leafhoppers, Mites, Red-banded leaf roller, Thrips - 3 to 4 pints.

Apply specified dosage with aerial or ground equipment using sufficient water to insure full coverage. Limit applications to 3 per crop season regardless of rate used. Allow at least 14 days between applications. Minimum dosage may be applied up to harvest. For maximum rate, allow at least 10 days Pre-harvest interval.

STRAWBERRIES: (5)

Aphids, Meadow spittlebug, Oblique-banded leaf roller, Obscure root weevil, Omnivorous leaf tier, Pea leaf weevil, Small black (grass) weevil, Strawberry leaf rollers, Whitefly - 2 pints.

Apply specified dosage with aerial or ground equipment using sufficient water to insure full coverage. Limit applications to 4 per crop season regardless of rate used. Allow at least 5 days between applications.

NUTS

NOTE: Pre-Harvest Interval days indicated in () after each use.

ALMONDS: (60)

Navel orangeworm, Peach twig borer - 6 to 8 pints.

Apply specified dosage with aerial or ground equipment using sufficient water to insure full coverage. Limit applications to 2 per crop season regardless of rate used. Allow at least 30 days between applications. Do not apply after husks split.

FILBERTS (Pacific Northwest only): (30)

Apple mealybug, Filbert aphid, Filbert leaf roller, Filbertworm - 6 to 8 pints.

Apply specified dosage with aerial or ground equipment using sufficient water to insure full coverage. Limit applications to 3 per crop season regardless of rate used. Allow at least 14 days between applications. Do not graze livestock in treated groves for 21 days after treatment.

PECANS:

Aphids, Fall webworm, Hickory shuckworm, Leafminers, May beetles, Mites, Pecan casebearer, Southern green stink bug, Spittlebug, Twig girdlers, Walnut Caterpillar - 6 to 8 pints.

Apply specified dosage with aerial or ground equipment using sufficient water to insure full coverage. Limit applications to 3 per crop season regardless of rate used. Allow at least 7 days between applications. Do not apply after shuck split. Do not graze livestock in treated groves for 21 days after treatment.

WALNUTS:

Codling moth, Filbertworm, Navel orangeworm, Walnut husk fly, Red-humped caterpillar - 6 to 8 pints.

Apply specified dosage with aerial or ground equipment using sufficient water to insure full coverage. Limit applications to 3 per crop season regardless of rate used. Allow at least 14 days between applications. Do not apply after husks split. Do not graze livestock in treated groves for 21 days after treatment.

VEGETABLES

NOTE: Pre-Harvest Interval days indicated in () after each use.

ARTICHOKES: (30)

Plum moth - 6 pints.

Apply specified dosage per acre by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. Limit applications to 3 per crop season regardless of rate used. Allow at least 14 days between applications. Do not feed or ensile treated forage.

BEANS, SNAP: (7)

BEANS, DRY: (30)

Leaf rollers, Mites - 1 to 2 pints.

Aphids, Bean leaf beetle, Green cloverworm, Leafhoppers, Leafminers, Stink bugs, Velvet bean caterpillar - 1 1/2 to 2 pints. Mexican bean beetle, Spotted cucumber beetle, Striped cucumber beetle, Tarnished plant bug, Western-striped-cucumber beetle - 2 pints.

Apply specified dosage per acre by air or ground equipment, in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit applications to 5 per crop season regardless of rate used. Allow at least 7 days between applications. Do not feed or ensile treated forage.

BROCCOLI: (15)

BRUSSELS SPROUTS: (7)

CABBAGE: (21)

CAULIFLOWER: (15)

Aphids, Cabbage looper, Diamondback moth, Imported cabbageworm - 2 to 3 pints.

Apply specified dosage per acre in sufficient water for complete coverage, but not less than 1 gallon per acre. Limit applications to 4 per crop season regardless of rate used. Allow at least 7 days between applications.

Cabbage maggot - 1/2 pint.

Mix specified dosage in 50 gallons of water. Apply 4 to 6 ounces of this emulsion per plant immediately after transplanting.

Cabbage maggot (Transplant fields in California only) - 3 pints.

Apply specified dosage in 300 to 400 gallons of water per acre as a soil drench in the rows when damage first appears. Additional applications may be necessary.

Cabbage maggot (Direct-seeded fields in California only) - 3 pints.

Apply specified dosage per acre, in sufficient water for uniform distribution. Mix in the upper 2 inches of soil prior to seeding, or spray in the seed row at planting time. Usually 2 to 3 additional sprays are necessary during the growing season depending upon time of year and maggot population.

CELERY: (14)

Aphids, Leaf miners, Leafhoppers, Spittlebugs, Tarnished plant bug - 2 pints.

Apply specified dosage per acre by air or ground equipment in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit applications to 4 per crop season regardless of rate used. Allow at least 5 days between applications.

BLACKEYED PEAS (Southern peas, Crowder peas): (7)

Corn earworm, Cowpea curculio - 3 to 4 pints.

Leaf miners, Stink bugs - 1 1/2 to 2 pints.

Apply specified dosage per acre, by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. Limit applications to 4 per crop season regardless of rate used. Allow at least 7 days between applications. Do not use vines for feed or forage, nor pasture treated areas.

CUCUMBERS: (1)

Spotted cucumber beetle, Striped cucumber beetle, Western-striped cucumber beetle - 2 pints.

Apply specified dosage per acre, by air or ground equipment, in

sufficient water for complete coverage, but not less than 1 gallon per acre. Limit applications to 3 per crop season regardless of rate used. Allow at least 7 days between applications.

EGGPLANT: (21)

Leaf miners - 1 1/2 to 2 pints.
European corn borer, Flea beetles - 2 pints.
Apply specified dosage per acre, by air or ground equipment, in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit applications to 3 per crop season regardless of rate used. Allow at least 7 days between applications.

ONIONS (Green): (10)

ONIONS (Dry): (28)

Thrips - 2 to 3 pints.
Apply specified dosage per acre, by air or ground equipment, in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit applications to 3 per crop season regardless of rate used. Allow at least 7 days between applications for dry bulb onions and 10 days for green onions.

PEPPERS: (21)

Leaf miners - 1 1/2 to 2 pints.
European corn borer, Flea beetles - 2 pints.
Apply specified dosage per acre, by air or ground equipment, in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit application to 3 per crop season regardless of rate used. Allow at least 7 days between applications.

POTATOES: (7)

Colorado potato beetle - 1 1/2 pint.
Banded cucumber beetle, Leaf miners - 1 1/2 to 2 pints.
European Corn borer, Flea beetle, Aphids, Leafhoppers, Spittlebugs, Tarnished plant bug - 2 to 3 pints.
Tuberworm - 2 1/4 to 3 pints.
Apply specified dosage per acre, by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. Limit application to 3 per crop season regardless of rate used. Allow at least 7 days between applications.

SPINACH: (14)

Aphids, Leaf miners, Mites - 1 1/2 to 2 pints.
Apply specified dosage per acre, by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. Limit application to 3 per crop season regardless of rate used. Allow at least 7 days between applications.

TOMATOES: (1/14)

Colorado potato beetle - 1 1/2 pint.
Banded cucumber beetle, Drosophilia, Green stink bug, Leaf miners, Whitefly - 1 1/2 to 2 pints.
Aphids, European corn borer, Flea beetles, Grasshoppers, Leafhoppers, Thrips - 2 to 3 pints.
Tuberworm - 2 1/4 to 3 pints.
Corn earworm, Fruitworm, Hornworm, Pinworm, Yellow-striped armyworm - 3 to 6 pints.

Apply specified dosage per acre, by air or ground equipment, in sufficient water for complete coverage, but not less than 1 gallon per acre. The high rates should be used where heavy infestations of late-instar lepidopterous larvæ (large worms) and pin-worms are present. Rates of 3 pints per acre or less may be applied up to day of harvest. Rates above 3 pints per acre require an interval of 14 days between application and harvest. Limit applications to 4 per crop season regardless of rate used. Allow at least 7 days between applications.

MELONS (Honeydew melons, Muskmelons (cantaloupe), Watermelons, Other melons): (7)

Leafhoppers, Leaf miners - 1 1/2 to 2 pints.
Rindworms, Spotted cucumber beetle, Striped cucumber beetle, Western-striped cucumber beetle - 2 pints.
Apply specified dosage per acre by air or ground equipment, in sufficient water to give complete coverage, but not less than 1 gallon per acre. Limit application to 3 per crop season regardless of rate used. Allow at least 5 days between applications.

ORNAMENTALS

ORNAMENTALS, NURSERY PLANTS, FOREST AND SHADE TREES:

Aphids, Cerococus scale, Euonymus scale, Juniper scale, Lace bugs, Leafhoppers, Mites, Olive scale, Oystershell scale, Pulvinaria scale, Thrips - 1 1/2 to 2 pints.
Brown soft scale, Putnam scale - 4 pints.
European elm scale, Black pine leaf scale - 3 to 4 pints.
Apply specified dosage per 100 gallons of water (2 teaspoonfuls per gallon). Spray all foliage surfaces including the underside of leaves for complete coverage.

For control of black pine leaf, brown soft, European elm, and Putnam scales, use 1 tablespoonful per gallon. Repeat as necessary.

Cone midge, Cone moth - 8 to 16 pints.
Apply specified dosage per 100 gallons of water. Time applications to coincide with moth flight when cones are open for pollination. Thorough coverage of cones is necessary for maximum control. Repeat as necessary.

European pine shoot moth, Nantucket pine tip moth - 1 1/2 to 3 pints.

Apply specified dosage per acre in sufficient water for good coverage. Time applications to coincide with moth flights. For application to individual trees, use 1 tablespoonful of Azinphosmethyl 2EC per gallon of water. Injury to Hawthorn or American linden may occur under some conditions. Do not allow children or pets on treated area until material has been washed into the soil and treated area is dry.

SOUTHERN PINE SEED ORCHARDS:

Coneworm Seedworm (See Remarks). Use 6 pints per 100 gallons of water. (0.2% dilution) as a full coverage spray*. Use 3 pints per 10 gallons of water (1% dilution) for low volume sprayers. Apply first application within 30 days following conelet closure, followed by 3 to 5 applications (at least 30 days apart). Apply approximately 5 to 10 gallons of the 0.2% dilution with high volume sprayers or approximately 1 to 2 gallons of the 1% dilution with low volume sprayers per tree. Thorough coverage of cones is necessary for maximum control. This concentration is calculated for conventional hydraulic-type sprayer. When lower volumes of spray are applied per acre with concentrate sprayers, increase the concentration of Azinphosmethyl 2EC in the spray mixture in order to apply amount of Azinphosmethyl 2EC per acre equivalent to a full coverage spray. Where conditions dictate an air application, apply dosage per acre equivalent to a full coverage ground spray in not less than one gallon of water per acre.

*This formulation, when used undiluted, may cause spotting of automobile finishes if prolonged exposure is permitted. Do not spray directly over automobiles. If accidental exposure does occur, automobile should be washed immediately.
