

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

5 SEP 1995

Eliot Harrison
Agent for C-H Products
Delta Analytical Corporation
7910 Woodmont Avenue, Suite 1000
Bethesda, MD 20814

Dear Mr. Harrison:

Subject: Label Amendment and Redesignation of Basic Formulation
C-H Formula No. 15 Bug Killer
EPA Registration Number 51699-2
Submission Dated August 23, 1995

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below:

- 1. Revise the Ingredients Statement to read as follows:

ACTIVE INGREDIENTS:
Pyrethrins 0.50%
Piperonyl Butoxide, Technical. 1.00%
N-octyl Bicycloheptene Dicarboximide . 1.66%
INERT INGREDIENTS: 96.84%
Total 100.00%

- 2. The signal word "CAUTION" must appear on the front panel of the label immediately below the child hazard warning statement "Keep out of reach of children."

The Agency approves your request to redesignate the alternate formulation (dated April 26, 1994) as the new basic formulation. The previous basic formulation has been declared obsolete.

If you have any questions or comments, please contact me at (703) 305-6788.

Sincerely,

RPK

Richard P. Keigwin, Jr.

CH

FORMULA NO. 15 BUG KILLER

CAUTION

Keep Out of
Reach of Children

See side panel
for additional
precautionary statements
and practical treatment

Provides over 3,000+ sprays... one whole month of protection.

Gives effective knock down, kill and control for a
wide-range of common flying insect pests.

For use in both food and non-food areas of industrial,
institutional, commercial, residential, and medical
buildings and vehicles.

Kills: Flies, Gnat, Small Flying Moths and Mosquitoes.

Repels: Cockroaches, Fleas and Crickets.

ACTIVE INGREDIENTS:

- Pyrethrins 0.50%
- Piperonyl Butoxide Technical 1.00%
- N-octyl Bicycloheptene Dicarboximide 1.66%
- Inert Ingredients 96.84%

Contains petroleum distillates

Consists of 0.8% (butylcarbityl)(6-propylpyperonyl)ether and 0.2%
of related compounds.

EPA Reg. No. 51699-2
EPA Est. No. 11715-TN-1

NET WEIGHT 6.5 OUNCES

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. C-H Formula No. 15 Bug Killer is especially designed for Automatic Dispensers. One unit for each 6,000 cubic feet of space to be treated is recommended. A specific amount of concentrated insecticide is automatically released every 15 minutes through the periodic activation of the C-H Automatic Commercial Dispensers. After two hours of operation, enough insecticide is suspended in the air to kill a portion of the flies, gnats, or mosquitoes present thereby greatly reducing their numbers. Effectiveness of C-H Formula No. 15 Bug Killer will be noticed within one hour after the C-H Automatic Dispenser has been activated. If less than 24-hours of insect control is required, the C-H Automatic Dispenser should be set to start one hour before control is required and allowed to continue to run one hour after control is no longer necessary.

The rate of air change, shape of space to be treated, temperature, humidity, and other conditions affect insect activity. Although one C-H Automatic Dispenser per each 6,000 cubic feet of space may be considered as average, adjustments should be made if necessary depending upon the conditions under which the units are to be used. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations.

The 6.5 ounce can of C-H Formula No. 15 Bug Killer contains approximately 3,100 "shots" and will operate at 15-minute intervals for a total of 780 hours or 32 days on a continuous 24-hour basis, or 64 days on a 12 hour basis. If operating on a 24-hour basis container should be replaced once a month. If operating on a 12-hour basis container should be replaced every two months. To replace aerosol container, lift lid and snap aerosol onto mounting cup and close lid and your C-H Automatic Commercial Dispenser Unit is ready to operate.

Note: Do not operate unit in edible processing areas of food plants while processing is in operation. Start automatic dispenser equipment one hour after shutdown of processing operation and turn off until one hour before processing resumes.

Do not use in areas where infant, ill or aged persons or pets (especially birds and fish) will be continually exposed. As with any method of insect control, improved performance is achieved when good sanitary practices are followed. Find and dispose of all insect-infested foods/drinks/feeds, packaged goods, etc. in the area.

FOR USE IN: Food handling establishments, food preparation areas of restaurants and food processing plants, breweries, canneries, farm milk houses, bakeries, cheese and ice cream plants and in: homes, trash store areas, dock areas, stores, farms, dairies, barns, kennels, factories, schools, hotels, motels, offices, ships, supermarkets, food warehouses, bottling plants, hospitals, egg and milk handling areas of dairies and chicken houses, and other public buildings.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with eyes, skin, and clothing. Wash thoroughly with soap and water after using.

FIRST AID

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

IF SWALLOWED: Call a doctor or get medical attention. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Avoid alcohol.

PHYSICAL/CHEMICAL HAZARDS

Flammable. Contents under pressure. Keep away from heat, sparks and open flame. **DO NOT PUNCTURE OR INCINERATE CONTAINER.** Exposure to temperatures above 130°F may cause bursting.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Keep in a cool, dry locked area inaccessible to children.

DISPOSAL: This container may be recycled in aerosol recycling centers. At present, there are only a few such centers in the country. Before offering for recycling, empty the can by using the product according to the label (**DO NOT PUNCTURE!**). If recycling is not available, wrap the container and discard in the trash.

Contains no CFCs or other ozone depleting substances. Federal regulations prohibit CFC propellants in aerosols.
