NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 51793-34" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

KEEP OUT OF REACH OF CHILDREN

CAUTION

See side panel for additional precautions

Do not transport or store below 32° F.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This Product is For External Use On Humans Only

APPLICATION USE:

- Apply undiluted to infested areas until entirely wet. DO NOT USE ON EYELASHES OR EYEBROWS.
- Allow treatment to remain 10 minutes, but no longer.
- Then wash thoroughly with warm water and shampoo or soap.
- Dead lice and eggs may require removal with a fine comb.
- A second treatment must be made in 7 to 10 days to kill any newly hatched lice.

TO PREVENT REINFESTATION:

To avoid reinfestation with head, pubic or body lice, all clothing and bed linen should be washed in hot water and drying, using the hot cycle for at least 20 minutes, or by dry cleaning. Personal articles of clothing or bedding that cannot be washed may be placed in a plastic bag for a period of about 2 weeks. Personal combs and brushes may be disinfected in hot water, above 130° F, for 5 to 10 minutes. Thorough vacuuming of rooms inhabited by infested persons should be simultaneously recommended.

GENERAL INFORMATION

Head Lice, live on the scalp, laying small white eggs (nits) on the hair shaft close to the skin. They are most easily found on the nape of the neck or behind the ears. All personal hairgear, scarves, hats, and hairbrushes should be disinfected by machine washing in hot water and drying, using the hot cycle for at least 20 minutes. Personal articles of clothing or bedding that cannot be washed may be placed in a plastic bag for a period of about 2 weeks. Personal combs and brushes may be disinfected in hot water, above 130° F, for 5 to 10 minutes. Thorough vacuuming of rooms inhabited by infested persons should be simultaneously recommended.

Crab or pubic lice, generally transmitted by sexual contacts, are very small and look almost like fleas on the skin. Crab lice usually cause intense itching and lay small white eggs (nits) on the skin surface. In hairy individuals the crab louse may be present on the short hairs of the trunk, underarms, and occasionally on the beard and mustache. Sexual partners should be treated simultaneously to avoid reinfestation. All underwear should be disinfected by machine washing and drying, using the hot cycle for at least 20 minutes.

Body Lice, and their eggs are generally found in the seams of clothing, particularly in the armpits. They move to the skin to feed, then return to the seams of the clothing, where they lay their eggs. Clothing should be disinfected by the same procedure outlined for head lice. Clothing should be placed in a plastic bag for at least 30 days for body lice because the nits (eggs) can remain dormant for that long.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Do not transport or store below 32° F. Do not reuse container. Wrap container and put in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Causes eye irritation. Do not get in eyes. Harmful if swallowed. Do not inhale. Avoid contact with skin and mucous membranes. In case of infection or skin irritation, discontinue use and consult a physician. If irritation of eyebrows and eyelashes occurs, avoid contamination of face or foodstuffs.

THIS PRODUCT IS FOR EXTERNAL USE ONLY.

STATEMENT OF PRACTICAL TREATMENT:

If swallowed — Call a physician or Poison Control Center immediately. Drink one or two glasses of water to induce vomiting by touching the back of the throat with finger. Repeat until vomit fluid is clear. Do not vomit or give anything by mouth to an unconscious person.

If inhaled — Remove victim to fresh air. Apply respiration if indicated.

If in eyes — Flush eyes with plenty of water. Call a physician if irritation persists.

IMPORTANT — Should be used with caution by ragweed sensitized persons.
