

US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. ()	DATE OF ISSUANCE
	TERM OF ISSUANCE <i>Until Reregistration</i>	NAME OF PESTICIDE PRODUCT <i>2,4-Dichlorophenoxyacetic acid</i>

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
 (Under the Federal Insecticide, Fungicide and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

North Carolina
 North Carolina

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

- This product is registered under EPA Registration No. 51793-132.
1. Submit to the Agency a copy of your registration data for your product under section 3(c)(3) with the Agency registration data of registrants of similar products to submit such data.
 2. Add the phrase "EPA Registration No. 51793-132" to your label for you release to the public for sale.
 3. Submit to the Agency a copy of your label for the product which you release to the public for sale and which complies with the product label requirements of section 3(c)(3) and the Agency registration data of registrants of similar products to submit such data.
- If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 3(c). Your label for shipment of the product constitutes acceptance of these conditions.
- A statement of the conditions is enclosed for your records.

NET CONTENTS __ OZ

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a
manner inconsistent with its labeling.

Apply granules uniformly to home lawns and other ornamental
and recreational turf areas using any hand or power operated
gravity or rotary type spreader designed for application of
granular materials. Treat when insects first appear, using
granules at the rate of 40 pounds per acre.

To help obtain uniform distribution, apply one-half the required amount of product in one direction; then apply the balance at a right angle. Immediately after application, sprinkle the turf with 1300 gallons of water per acre so as to wash the granules into the zone of insect infestation. Consult the following table to determine the amount of granules and water needed for small sized areas. Re-treat as necessary.

RATES TO USE

Area to be Treated	Pounds DURSBAN* 2.5xG	Gals. of Water to Sprinkle on Turf after Treatment
1,000 sq. ft.	1	30
5,000 sq. ft.	5	150
10,700 sq. ft.	10	325

FLEAS and BROWN DOG TICKS: Thoroughly apply granules as a spot treatment to infested areas such as:
PETS BEDS: Old bedding of pets should be removed and replaced with clean, fresh bedding after treatment. Do not apply this product indoors. To control the source of your flea infestation, treat pets with an E.P.A. approved product registered for direct application to pets.
YARD AREAS: Apply granules uniformly to home lawns, under shrubbery and other ornamental recreational turf grass areas. Treat when insects first appear using Granules at the rate of one pound per 1,000 sq. ft. To help obtain uniform distribution, apply one-half required amount of product in one direction, then apply the balance at a right angle. Immediately after application, sprinkle the turf with 50 gallons of water per 1,000 sq ft. so as to wash the granules into the zone of insect infestation. Re-treat as necessary.

DO NOT TREAT PETS WITH THIS PRODUCT

COCKROACHES: To help prevent infestation of buildings by cockroaches, treat a band 6 to 10 feet wide around and adjacent to the building where pets are active and may find entrance. Treat at a rate of one pound per 1,000 square feet.

****TO CONTROL CERTAIN WHITE GRUBS** (larvae of European chafer and Japanese beetle) use two to four times the amounts of granules shown in the table (i.e., 2-4 lbs. per 1,000 sq. ft.). After application, apply enough water to thoroughly wash the insecticide into the turf. For best results, treat when grubs are young and actively feeding near the soil surface, usually during late July and August.

Consult your local Agricultural Extension Service for proper time to treat in your area.

***TO CONTROL HYPERODES (TURFGRASS) WEEVILS, use twice the rate of granules shown in the table. Treat suspected problem areas in mid-April and again in mid-May. Consult your local Agricultural Extension Service specialist for best time to treat in your area.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry area inaccessible to children and domestic animals.

Disposal: Do not re-use container. Wrap and put in trash.

PRECAUTIONARY STATEMENTS

CAUTION

Hazards to Humans and Domestic Animals

Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Flush contaminated eyes with plenty of water and get medical attention if irritation persists. Wash thoroughly after handling. Wash contaminated clothing before reuse. Keep away from food, feedstuffs and domestic water supplies. Keep children and pets off treated areas until this material is washed into the soil and grass is dry.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Birds feeding on treated areas may be killed. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

If In Eyes: Flush with plenty of water. Call a physician if irritation persists.

If On Skin: In case of contact, remove contaminated clothing and immediately wash skin with plenty of soap and water. Thoroughly launder clothing before wearing again.

Note To Physician: Chlorpyrifos is a Cholinesterase inhibitor. Treat symptomatically. Atropine, by injection, is antidote of choice. Oximes, such as 2-PAM/protopam, may be therapeutic if used early; however, use only in conjunction with atropine.

Notice: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, express or implied extends to the use of this product contrary to label instruction or under abnormal conditions or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
