U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
Registration Division (7504P)
Ariel Rios Building
1200 Pennsylvania Ave., NW
Washington, D.C. 20460

EPA Reg. Number:
51873-7

Date of Issuance:
JUL 19 2010

NOTICE OF PESTICIDE:
 Registration
 Reregistration
(under FIFRA, as amended)

Term of Issuance:

Name of Pesticide Product:
Fair 85

Name and Address of Registrant (include ZIP Code):

Fair Products, Inc. USA
Agri-Specialties Division
P.O. Box 386
Cary, NC 27512

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is reregistered in accordance with FIFRA provided that you:

- 1) Submit and/or cite all data required for registration/reregistration review of your product when the Agency requires all registrants of similar products to submit data.

Signature of Approving Official:

Tony Kish
Product Manager 22
Fungicide Branch
Registration Division (7504P)

Date:

JUL 19 2010

2) The signal word currently on the label "WARNING" must be revised to read "DANGER" and the Spanish signal word "AVISO" must be changed to read "PELIGRO."

3) A Note to Physician must be added to the label and must read:

"Probable mucosal damage may contraindicate the use of gastric lavage."

4) Per the acute toxicity review, the Hazards to Humans and Domestic Animals must be revised to read:

"DANGER

Corrosive. Causes irreversible eye damage. Causes skin irritation. Do not get in eyes, on skin, or on clothing."

5) The PPE section must be revised to read:

"Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are made of barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride or viton. If you want more options, follow the instructions for Category C on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators, and other handlers must wear:

- Goggles or faceshield,
- Long sleeved shirt and long pants,
- Shoes and socks, and
- Chemical resistant gloves."

6) Per the RED label table, the text in **bold type** below must be added to the following User Safety Requirements:

"...If no such instructions for washables **exist**, use detergent and hot water..."

7) The REI must be revised to read:

"Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours."

EPA Reg. 51873-7

Page 3

-The text "coveralls over long sleeved shirt and long pants" must be revised to read "coveralls."

8) Change "inert ingredients" to "other ingredients". Update the container disposal language to comply with PR Notice 2007-4. To the Warranty section, add "to the extent consistent with applicable law" in front of "sellers guarantee shall".

A stamped copy of the label is enclosed for your records. You must submit one copy of the final printed label before you release the product for shipment. Products shipped after 12 months from the date of this letter or the next round of printing must bear the new revised label. If these EPA conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA. Your release for shipment of the product constitutes acceptance of these EPA Reg. conditions. This label supersedes all other previously accepted labels. If you have any questions please call Erik Kraft at 703-308-9358 or email at Kraft.Erik@epa.gov.

CONTACT TOBACCO SUCKER CONTROL AGENT

KEEP OUT OF REACH OF CHILDREN

WARNING - AVISO

Do not inhale mist. Avoid contact with eyes, skin and clothing

PRECAUCION AL USUARIO: Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail)

READ ENTIRE LABEL CAREFULLY BEFORE USING THIS PRODUCT.

ACTIVE INGREDIENTS:

Fatty Alcohols.....	85%
(C6 - 0.5%, C8 - 42%, C10 - 56%, C-12 - 1.5%.....)	100%

INERT INGREDIENTS:.....15%

TOTAL.....100%

This product contains 6.01 lbs. of fatty alcohols per gallon
If not used in accordance with directions, plant injury,
excessive residues, or other undesirable results may occur.

PRECAUTIONARY STATEMENTS

Hazards to humans and domestic animals

WARNING

Causes substantial but temporary eye injury. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles or face shield). Causes skin irritation. Harmful if swallowed. Avoid inhalation of mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply this product through any type of irrigation system. Do not contaminate water by cleaning of equipment or disposal of wastes.

FIRST AID

FATTY ALCOHOLS (ALIPHATIC ALCOHOLS)

If In Eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye • Call a poison control center or doctor for treatment advice.
If On Skin or Clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
If Swallowed	<ul style="list-style-type: none"> • Call a poison control center or doctor for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person
If Inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for treatment advice.

Hot Line Number

Fatty Alcohols (aliphatic alcohols)

Have the container or label with you when calling a poison control center or doctor or going for treatment.*** For emergency information on product call (919) 467-8352, Monday through Friday 9 am to 5 PM EST. After 5 PM call your poison control center or call the National Poison Control Hotline at 1-800-222-1222 for additional information.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or persons, either directly or indirectly through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

*Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System(NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the Restricted Entry Interval (REI) of 24 hours.

PPE required for early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical resistant gloves made of any waterproof material
- Shoes plus socks
- Protective eyewear.

USE PRECAUTIONS

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for **CATEGORY C** on an EPA chemical resistance category selection chart.

MIXERS, LOADERS, APPLICATORS AND OTHER HANDLERS MUST WEAR:

- Long-sleeved shirt and long pants
- Chemical resistant gloves made of any waterproof material
- Shoes plus socks
- Protective eyewear.

USER SAFETY REQUIREMENTS

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using toilet.
- Remove clothing /PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. Wash outside of gloves before removing.

As soon as possible, wash thoroughly and change into clean clothing.

FAIR 85/Right side panel

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

1. **PESTICIDE STORAGE** - Do not stack over 2 pallets high. Store original containers in cool dry place away from food, water and feed.
2. **PESTICIDE DISPOSAL** - Pesticide wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
3. **CONTAINER DISPOSAL** - Do not reuse empty container. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration or if allowed by state and local authorities, by burning. If burned stay out of smoke.
4. **GENERAL** - Consult federal, state or local disposal authorities for approved alternative procedures in your area.

FAIR-85/Rear panel, p.1

Fair 85 is a carefully balanced combination of active ingredients and wetting agents to be used for the control of sucker growth on Burley, Flue-Cured, Dark, Maryland and Cigar tobacco. The concentrated product is diluted with water to form a creamy emulsion which is applied as a coarse spray. The emulsion is effective only when it comes in direct contact with suckers, therefore, the material is applied so that maximum contact is made with the suckers. For maximum sucker control FAIR 85 applications are followed within 7-10 days by systematic maleic hydrazide (MH) sucker control agents such as FST-7, FAIR 80 SP, FAIR 30 or FAIR PLUS applied in accordance with directions.

WHEN TO APPLY:

FAIR 85 can be applied before or after topping. Best results are usually obtained by spraying the tobacco with FAIR 85 before topping in the early to late button stage and then topping the tobacco one week later, removing any suckers that were missed. If you top the tobacco before spraying, remove any suckers over one inch in length as you top and apply FAIR 85 after topping. Because FAIR 85 is a contact type agent, it is necessary to straighten any plants that are leaning so that the emulsion flows down the stalk evenly and contacts each sucker.

FAIR 85 can be applied anytime during the day. For best results, it is recommended that you wait until the dew dries before spraying. Do not spray after the leaves begin to close in the evening. Because the underside of the leaves may be injured by contact with FAIR 85, do not apply when the wind is high enough to turn the top leaves over. Do not apply during the rain or when plants are wet. If however, it rains after FAIR 85 has been on the plants for over an hour, you should not have to apply FAIR 85 again. Do not apply during periods of high heat or if plants are under excessive stress.

HOW MUCH FAIR 85 TO APPLY:

Flue-Cured: *For power sprayer* - use 1.5 to 2 gallons (5.68-7.57 liters) in 50 gallons (189 liters) of water, or 2.5 gallons (9.4 liters) in 50 gallons (189 liters) of water.
 For hand sprayer - use 4 to 5 ounces (118-148 milliliters) per gallon (3.785 liters) of water, or 6 ounces (177 milliliters) per gallon (3.785 liters) of water.

In the event of an extended season and to avoid excessive MH residues, a later season application of 2.5 gallons FAIR 85 in 47.5 gallons water (5% concentration) may be made 3 to 4 weeks after MH application.

Burley: *For power sprayer* - use 1.75 to 2 gallons (6.62-7.57 liters) in 50 gallons (189 liters) of water.

Dark: *For hand sprayer*, use 6 to 8 ounces per gallon (177-237 milliliters per gallon (3.785 liters) of water.

Cigar: Use 4 to 5 ounces per gallon (118-148 milliliters per 3.785 liters) of water to apply with a hand sprayer.

FAIR 85/Rear panel,p.2

Maryland: Use 4 to 4.5 ounces per gallon (118-133 milliliters per 3.785 liters) of water to apply with a hand sprayer.

When applied by hand, 1 gallon (3.785 liters) of diluted FAIR 85 will treat approximately 190 plants. If a power sprayer is used, 50 gallons (189 liters) of diluted product should be applied per acre of tobacco.

HOW TO APPLY:

The diluted emulsion is most easily prepared by adding the required amount of FAIR 85 to your spray tank and then adding the water. In order to obtain the best results, it is important that the water be added to the FAIR 85 rather than the FAIR 85 to the water.

If you use a hand-held or backpack sprayer, the diluted emulsion should be applied at a rate of 2/3 to 1 ounce (20-30 milliliters) per plant (or enough to insure rundown to the bottom of the plant). A coarse spray is recommended, directed downward at the top of the stalk from 6-8 inches above the top leaves, very little tank pressure is required, and in no case should more than 20 pounds be used.

When applied with power equipment, three nozzles per row should be used (TG full cone tips, or larger, are satisfactory). One TG-5 nozzle should be directed downward over the center of the row and two TG-3s should be positioned approximately 11 inches on either side directed at or slightly above the top of the stalk. The diluted FAIR 85 should be applied to the tobacco as a coarse spray from a height of 12 to 16 inches above the top of the stalk. It is recommended that boom pressure be kept at 20 to 25 lbs., and should never exceed 25 lbs. By using the recommended spray tips, spraying at approximately 20 lbs. pressure, and operating a tractor speed of 2.5 to 3 mph, you will apply approximately 50 gallons of diluted emulsion per acre of tobacco.

HOW OFTEN TO APPLY:

Usually one application of FAIR 85 will give good control of both primary and secondary suckers and produce excellent leaf quality. However, in most cases a dual treatment of FAIR 85 is recommended 7 to 10 days apart to allow time for uneven crops to become uniform. For season long sucker control, these treatments should be followed by a maleic hydrazide (MH) product (such as FST-7, FAIR 80 SP, FAIR 30 or FAIR PLUS) treatment applied within 7-14 days of the last FAIR 85 treatment in accordance with label instructions. In the event of an extended season and to avoid excessive MH residues, a later season application of 2.5 gallons FAIR 85 in 47.5 gallons water, (5% concentration) may be made 3 to 4 weeks after MH application.

NOTES:

1. Mix well prior to use and, if allowed to stand during the use, mix again before applying since the diluted emulsion may separate on standing.
2. Do not use on Burley tobacco during periods of high heat and high humidity.
3. Usage according to the directions outlined has resulted in adequate sucker control with very little or no leaf injury. Application not in accordance with the directions may lead to injury of leaves or improper sucker control.
4. Make sure spray equipment is clean before using.

WARRANTY STATEMENT: Seller's guarantee shall be limited to the terms of the label, and subject thereto the buyer assumes any risk to persons or property arising out of use or handling and accepts the product on these conditions.
