Biopesticides and Pollution Prevention Division
(7511C)
1200 Pennsylvania Avenue NW
Washington, DC 20460

EPA Reg. Number:
51934-~~0~~⁹

Date of Issuance:
MAY 27 2008

Term of Issuance: **UNCONDITIONAL**

NOTICE OF PESTICIDE:

XX Registration (under FIFRA, as amended)

Name of Pesticide Product:
CIDETRAK IMM

Name and Address of Registrant (include ZIP Code):

TRECE INCORPORATED
P.O. Box 129
Adair, Oklahoma 74330

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Biopesticides and Pollution Prevention Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA Sec. 3(c) provided you:

1. Submit and/or cite all data required for registration of your product under FIFRA section 3(c)(5) and section 4 when the Agency requires all registrants of similar products to submit such data.
2. Submit--within 12 months-- a data package for Guideline Study: OPPTS 830.6317 (Storage Stability).
3. Make the following label change before you release the product for shipment: Revise the EPA Registration Number to read, "**EPA Reg. No. 51934-9**"
4. Submit three (3) copies of the revised final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.
5. This registration is effective for 1 year from the date of issuance.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records.

CIDETRAK[®] IMM

A Mating Disruption Formulation for Indian meal moth, *Plodia interpunctella*, tobacco moth, *Ephesia elutella*, raisin moth, *Cadra figulilella*, almond moth, *Cadra cautella*, and Mediterranean flour moth, *Ephesia kuehniella*

ACTIVE INGREDIENT:	
(9Z,12E)-9,12-tetradecadien-1-yl acetate	3.2 %
OTHER INGREDIENTS:	96.8 %
TOTAL:	100.00 %

NET CONTENTS:

Dispensers per package; 50 units
One dispenser contains: 160 mgs, active ingredient

EPA Registration No. 51934-~~xx~~ 9
EPA Establishment No. 51934-OK-1
Batch Code _____

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

**PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals**

Caution Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, and clothing. Avoid breathing vapors. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove contaminated clothing and wash before reuse.

FIRST AID	
If inhaled	If Inhaled: <ul style="list-style-type: none"> - Move person to fresh air. - If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth to-mouth if possible. - Call a poison control center or doctor for treatment advice
IF ON SKIN OR CLOTHING:	If on skin or clothing: <ul style="list-style-type: none"> - Take off contaminated clothing. - Rinse skin immediately with plenty of water for 15-20 minutes. - Call poison control center or doctor for treatment advice.
IF IN EYES:	If in eyes: <ul style="list-style-type: none"> - Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. - Call poison control center or doctor for treatment advice.
HOT LINE NUMBER:	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact Trécé, Inc. at 1-866-785-1313 between 8am and 6pm CST for emergency medical treatment information.	

ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL BEFORE USING

CIDETRAK® IMM disrupts the mating communication between adult male and female moths, reduces fertile egg laying, suppresses subsequent larval infestation, and reduces the need for applying insecticides.

For maximum effectiveness, remove and destroy infested commodities and clean infested areas. Continuously monitor their facilities and commodities and maintain accurate records of target moth populations and larval damage within and near their facilities. Consult your local extension specialist, food safety consultant, pest management specialist, or Trece representative for assistance in designing the best CIDETRAK® IMM program for your commodities and facilities.

Facilities and commodities	Apply CIDETRAK IMM in and around storage and manufacturing facilities containing raw grains and bean seeds and products including but not limited to wheat, barley, rye, oats, corn, popcorn, rice, all edible bean varieties, soybeans, cocoa beans; tobacco; birdseed; all spices; nuts including but not limited to peanuts, walnuts, almonds, pecans, hazelnuts, Brazil nuts and pistachios; dried commodities including but not limited to all fruits, vegetables, spices, nuts, and herbs, all animal and/or pet food, such as dog and cat food, cattle, hog, sheep and other animals in and around storage and manufacturing facilities including but not limited to raw, intermediate/in-process goods and finished goods facilities; mills, bakeries, drying areas.
Targeted Pests	Indian meal moth (<i>Plodia interpunctella</i>), Mediterranean flour moth (<i>Ephestia kuehniella</i>), tobacco moth (<i>Ephestia elutella</i>), raisin moth (<i>Cadra figulilella</i>), and almond moth (<i>Cadra cautella</i>).
Rate	Apply 1 dispenser per 3,531 to 10,594 Cu.Ft. (100 to 300 Cu.Meters) or 160 to 480 mgs. a.i. respectively depending on the infestation level. Apply 1 dispenser per 7,063 Cu.Ft. (200 Cu.Meters) to areas of moderate infestation. Apply the maximum dispenser rate to all buildings that are heavily infested with one or more target species, or adjacent to an untreated building, where access is evident. Do not exceed 200 grams of active ingredient per 7,063 Cu.Ft. (200 Cu.Meters) year.
Application	Place dispensers at a height of 5 to 16 feet (1.5 to 4.8 Meters) in a grid pattern over each floor of treated buildings. Attach dispensers securely to walls, pallets, columns, or ceiling hangers.
Timing	Apply prior to moth emergence in early spring or between any generation, in year round programs. Monitor moth activity using STORGARD II, PHEROCON IC traps and lures or STORGARD IMM oviposition traps. Begin monitoring in early spring and continue throughout the season to assess treatment effectiveness. Depending on temperature, CIDETRAK IMM dispensers will release pheromone for 130-150 days. In areas with long field season (i.e. more than 120 days) a second application may be necessary, based on monitoring results, prior to subsequent IMM flights. Note – CIDETRAK IMM will not prevent stored commodity damage from immigration of mated female moths into treated buildings. Nearby (500 yards) untreated buildings can be a source of these mated females. Treatment with pheromone is recommended only when all buildings within or near treated buildings have been treated with CIDETRAK IMM.
Treatment Tips	CIDETRAK IMM suppresses mating of target insects. Immigration of mated female moths from adjacent, infested buildings can reduce the level of control. Area-wide treatment of entire sets of related buildings is the most effective strategy. To supplement CIDETRAK IMM, use insecticides to control high populations. Monitor all pest populations to determine timely use of insecticides. To manage immigration and high population pressures, consider: <ol style="list-style-type: none"> 1. Treatment of external sources of infestation with CIDETRAK IMM 2. Treatment of external sources of infestation with an insecticide. 3. Treatment of pheromone treated buildings with insecticide. Consult your local extension specialist, certified consultant, or Trece representative for local management strategies.
