SUBJECT: July 9, 2003 Amendment Application
Sodium Hypochlorite 10%
EPA Registration 52374-10

Dear Mr Cunningham:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable with the following conditions:

The Keep Out of Reach (KROC) statement must be on a separate line.

Move the signal word DANGER directly below the KROC and increase the size of the type.

Under the precautionary statements, move the word Danger in front of corrosive.

The first two sentences under the First Aid heading pertaining to emergency phone assistance must be removed from the beginning and placed at the end.

Reverse the order of Eyes and Skin on your First Aid statement.

Under Directions for Use, move word Note from end of first line to beginning of second line.

Fix the typos and misspellings as marked: other, disposal or, Inspected, from, hazards, container, and container.

Child Resistant Packaging (CRP) certification is required since you have dropped "For Industrial Use Only" from your label. Your 1 gallon container is required to be distributed in CRP containers. This certification must be submitted to the Agency within 90 days of your receipt of this letter. See 40 CFR § 157.20 for additional information.
