<p>NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.</p>							
<p>On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.</p> <p>A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.</p> <p>Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.</p> <p>This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:</p> <ol style="list-style-type: none"> 1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(7) when the Agency requires all registrants of similar products to submit such data. 2. Make the labeling changes listed below before you release the product for shipment: <ol style="list-style-type: none"> a. Add the phrase "EPA Registration No. 52466-26." b. Expand the edible product area precautions to read: <div style="margin-left: 40px;"> <p>Do not use in food areas of food handling establishments, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas where food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms but excluding areas where foods may be prepared or held. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.</p> </div> 							
<p><input type="checkbox"/> ATTACHMENT IS APPLICABLE</p>							
<p>SIGNATURE OF APPROVING OFFICIAL</p>	<p>DATE</p> 6/19/89						

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

- c. Use in food handling establishments can imply use in U.S. Department of Agriculture (USDA) Meat and Poultry Plants. Therefore, either add the statement "Not for Use in USDA Meat and Poultry Plants," or submit an application to USDA requesting use in these areas. If granted, you can then indicate on the label that the product can be used in these areas.

- d. Since your data matrix does not give a dielectrical breakdown voltage, you must add the following to the use directions:

Do not use this product in or on electrical equipment due to the possibility of shock hazard.

- e. Please provide a Statement of Composition--a complete description of the formulation process. Describe equipment used, mixing time, temperature, etc.

- f. Although you indicate the product is "ready-to-use" is it applied directly from the container? We discourage indoor use of pesticides by the layperson unless they are ready to be applied as marketed (as in a pump spray or aerosol formulation). This prevents potential exposure to children and pets from ingesting/contacting the pesticide in containers such as coffee cans (for paint brush application) and Windex or other similar bottles which are commonly used by homeowners.

Allowing homeowners to use containers other than the product container to apply the pesticide defeats the purpose of the label instructions, precautions, and first aid treatment, since the information would not be readily available for use should exposure occur. Thus, if this product is not applied directly from the original containers but must be transferred to another container for application, add the statement "Only for Sale To, Use, and Storage by Pest Control Operators" or "Recommended for Use by Commercial Applicators" to the ~~second~~ ^{front} panel of the label.

- g. Following the instructions for bedbugs and clothes moths, add the statement "Allow all treated articles to thoroughly dry before use."

- h. The Environmental Hazards section does not include any statements regarding bees or cautions about spray drift or runoff. The Environmental Hazards statements should be changed to:

This pesticide is highly toxic to fish. Do not apply directly to water or wetlands (swamps, bogs, marshes and potholes). Drift and runoff from treated areas may be hazardous to aquatic organisms in treated areas. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

inconsistent with its labeling

SHAKE WELL BEFORE USING

SURFACE SPRAYING: To control cockroaches, waterbugs,
palmto bugs, scorpions, millipedes, centipedes, sowbugs,
pillbugs, ants, silverfish, firebrats, spiders, crickets, clover
mites, cheese mites, granary weevils, rice weevils, confused
flour beetles, rust red flour beetles, drugstore beetles, meal
worms, grain mites and cadellins. Direct the spray into hiding
places, cracks and crevices, behind shelves and drawers. For
silverfish, spray bookcases. For ants, spray trails, nests and point
of entry.

To control carpet beetles: Spray edges of carpeting and under
carpeting and rugs. Make localized application to floor and
baseboards. Spray directly into cracks, crevices and infested area
of shelving. Repeat treatment as needed.

To control bedbugs: Spray mattresses lightly, particularly around
tufts and seams. Take beds apart and spray in all joints. Treat
baseboards, moldings and floors. Repeat treatment as needed.

To control fleas and ticks (adults and larvae): Thoroughly spray
infested areas, pet beds, resting quarters, nearby cracks and
crevices, along and behind baseboards, moldings, window and door
frames, and entire areas of floor and floor covering. Fresh bedding
should be placed in animal quarters following treatment. Repeat
treatment as needed.

To control clothes moths: Remove any infested articles from
storage, brush thoroughly, and air for several hours in sunlight, if
possible. Apply spray liberally to empty closets, bureaus
and other storages directing the spray into cracks, joints and
crevices. After airing, infested articles may be treated lightly,
keeping nozzle at least three feet from fabric to avoid staining.

To kill lice and louse eggs: Spray in an inconspicuous area to test
for possible staining or discoloration. Inspect again after drying, then
proceed to spray entire area to be treated. Spray from a distance of
8 to 10 inches. Treat only those garments and parts of bedding,
including mattresses and furniture that cannot be either laundered
or dry cleaned. Allow all treated articles to dry thoroughly before
use.

ON LIVESTOCK: To protect
hogs and horses from horn
mosquitoes and gnats: Apply
surface of the hair. For face
spray into eyes.

To control stable flies, horn
2 ounces per adult animal.
Repeat treatment daily or as
protection.

To control blood-sucking
animal, using a stiff brush.
Repeat every 3 weeks if re-

To control poultry lice: Spray
thoroughly. This should be
fine mist.

To control bedbugs and mites:
roost poles, cracks in walls
and miles hide.

ON DOGS: To control fleas
tail, moving the dispenser
entire body is covered, including
spraying. Buff the hair so that
Make sure spray wets thoroughly.
Avoid contact with genitalia.

NOTE: Not recommended for
old.

CONTINUED

OUTDOOR APPLICATION

FOR CONTROL OF GARDEN INSECTS: For use on roses, dahlias, asters and other ornamentals to kill Japanese beetles till by spray as well as whiteflies, aphids, exposed thrips, spiders, red mites and leafminers.

May be used on plants as a multi-purpose spray in small gardens and for spot treatments of incipient insect infestations to prevent spreading in large garden areas.

May also be used on other plants such as African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, dahlias, delphiniums, dogwoods, English ivy, euonymus, fuchsia, geraniums, crassula, grape vines, Kentia palms, laurels, marigolds, rhododendrons, roses, rubber plants, snapdragons, stocks, wandering Jews and zinnias.

Effective when used as directed against whiteflies, aphids, spider and red mites, exposed thrips, lace bugs, Japanese beetles, pavement ants, clover mites and army worms.

When spraying plants, do not operate closer than 18 inches. Use sweeping motion. Be cautious about wetting tender foliage, young plants and new growth. Do not spray plants when temperatures exceed 90°F. Contact insects directly whenever possible. Repeat treatment as infestations occur.

STORAGE AND DISPOSAL

Do not reuse empty container. Wrap container and put in trash collection.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION

Harmful if swallowed. Avoid contamination of feed and foodstuffs. Remove pets and birds, and cover fish aquaria before space spraying or surface applications.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Drink one or two glasses of water and induce vomiting by touching the back of the throat with finger. Repeat until vomit fluid is clear. Call a physician immediately. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove affected person to fresh air. Apply artificial respiration if indicated.

IF ON SKIN: Remove contaminated clothing and wash affected areas with soap and water.

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to lakes, ponds, streams, tidal marshes or estuaries. Do not contaminate water by cleaning of equipment or disposal of wastes.

Buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith
