is based on a highly-active mixture of three *Twin Chain* quaternary ammonium compounds together with an effective fabric softener.

Soiled and contaminated fabrics such as diapers, hospital and institutional linen and athletic equipment is a major housekeeping problem not only in hospitals but in institutions, hotels, restaurants and schools. **DIRECTIONS FOR USE**

**GENERAL CLASSIFICATION**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**DIRECTIONS FOR SWIMMING POOL CHLORINATION**

For a new pool or for spring start-up, superchlorinate with one (1) pint (16 flu. ozs.) of sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 3 ppm available chlorine by weight.

**FOR POOL MAINTENANCE**

A) Adjust pool water pH to 7.6 - 7.2 range and maintain.  
B) Add manually or by a feeder device, sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One half pint (8 flu. ozs.) of sodium hypochlorite solution for each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend on temperature and number of swimmers. Use test kit to maintain the pH and chlorine residual are in the proper range.

**NOTE:** This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

**STORAGE AND DISPOSAL:** Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved land fill. Product or rinsate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
