DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

MAB-250 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. To its use, systems must be cleaned to remove algal growth, microbial slimes, and other deposits. An initial slug addition of 4.0 to 10.1 fluid ounces of MAB-250 per 1000 g of water to provide a concentration of 32 to 80 parts per million MAB-250, based on the total weight of

in the system, is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 1.0 to 10.0 fluid ounces MAB-250 per 1000 gallons of water (8 to 80 parts per million of MAB-250) should

be employed every 2 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

MAB-250 is used to control bacteria in industrial air-washing systems that maintain effective mist eliminating components. To its use, systems should be cleaned to remove bacterial slimes and deposits. An initial slug addition of 14.8 to 24.7 fluid ounces MAB-250 per 1000 gallons of water is recommended. Repeat initial dosage until control is evident. Subsequent slug

additions of 10.1 to 24.7 fluid ounces of MAB-250 per 1000 gallons of water should be employed each 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the bacterial problem. Slug additions may be made to the sump or to the collection trays of the airwash system.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not stack more than four drums high. Leaking or damaged drums should be placed in a container for disposal. Spills should be absorbed in woodchips or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL:

PLASTIC: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose in a sanitary landfill, by incineration, or, if allowed by state and local authorities, by burning. If burned, do not breathe fumes.

METAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose in a sanitary landfill, or by other procedures approved by state and local authorities.
