RK-403 has been formulated to aid in the reduction of cross-contamination in institutions, schools and hospitals.

RK-403 is a one-step disinfectant-cleanser that is effective against a broad spectrum of bacteria, is virucidal, fungicidal, and will prevent the growth of mold and mildew and their odors when used as directed. RK-403 is an effective one-step sanitizer-cleanser for use on non-food contact surfaces.

When used as directed, RK-403 will deodorize surfaces in toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause malodors.
