RM-40 MICROBIOCIDE is used to control bacteria and fungi in recirculating commercial and industrial air wash systems. To its use, systems must be cleaned to remove slime, and other deposits. An initial slug addition of 24 fluid ounces of RM-40 MICROBIOCIDE per 1000 gallons of water to provide a concentration of 24 parts per million of RM-40 MICROBIOCIDE in the system, is recommended. Repeat initial slug additions of 0.73 fluid ounces of RM-40 MICROBIOCIDE per 1000 gallons of water should be employed every 2 to 5 days, or as needed. The frequency of addition depends upon the relative of the bacterial problem. Slug additions may be made in the surf collection trays of the airwash system.
