Global Bug Stop Outdoor Mosquito Repellent Evaporator		

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Global Werk GmbH
 Anna-von-Phillip-Str. 33
 Postfach 1360
 D-8858 Neuburg-Donau
 West Germany

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) or 4(a) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 52969-3" to the label before releasing the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Richard F. Mountfort
 Product Manager (10)

BUG STOP

52969-3

OUTDOOR MOSQUITO REPELLANT EVAPORATOR

HOW THIS BUG STOP
MOSQUITO REPELLER WORKS

The enclosed Catalytic Evaporator becomes warm when the unit is filled with lighter fluid and lit. Also enclosed are special repellent pads which are activated when inserted into the unit. It operates without a flame, ash or fumes. It simply vaporizes the active ingredient in the pads to keep mosquitoes away.

Every pad vaporizes for up to 6 hours. It is extremely economical and easy to use. Try it camping, swimming, boating, hunting, fishing, on a picnic, a barbecue or just around the patio.

CONTENTS

One catalytic evaporator and 4 repellent pads. (Net wt. 0.55 g ea.)

ACTIVE INGREDIENTS IN BUG STOP PADS:

d-cis/trans allethrin 21.46%

INERT INGREDIENTS. 78.54%

OUTDOOR MOSQUITO REPELLANT EVAPORATOR

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Push the aluminum base down and out of the plastic cap.
2. Carefully remove the catalytic burner from the small plastic bag without touching the wire mesh. Set aside.
3. Fill the lower half of the plastic measuring cup with lighter fluid. Bring the cup to the opening while holding the aluminum base diagonally and gradually lay it flat while filling the unit. Do not over fill. Wipe off any spillage. Snap the burner onto the base without touching the wire mesh.
4. Hold the aluminum base diagonally and heat the wire mesh with a lighter for 15 - 20 seconds. Put out any flame that may appear. In a short time, the burner will reach operating temperature and be ready for use. If the burner goes out, relight. Do not light in tents or other enclosures.
5. First insert one repellent pad under the protective grill. Then snap the plastic cap onto the aluminum base making sure that the round openings of the plastic fit the raised areas of the base.
6. The BUG STOP catalytic unit should be placed up-wind and close to the area where you need protection against mosquitoes. Insects will be repelled from a radius of 12 feet for up to 6 hours. The repellent pad should be changed when its color changes to almost white.
7. To stop the catalytic evaporator, push the aluminum base down and out of the plastic cap. Extinguish the burner by covering it with the measuring cup for 1 to 2 minutes.
8. To change the pad, allow the base to cool and then remove the wire mesh burner. Fill the base reservoir with lighter fluid and snap the burner back on. Insert another repellent pad under the protective grill. The used pad will automatically fall out when you push the new pad in. To activate the new pad, just relight the burner and snap the plastic cap back onto the base.

FOR BEST RESULTS

FOR OUTDOOR USE ONLY

1. Use only lighter fluid.
2. Keep the burner clean and protected from moisture.
3. Use the Bug Stop protective mat under the aluminum base.

HOW BUG STOP MOSQUITO DESTROYER PADS WORK

When these pads are properly used in the Bug Stop Catalytic Evaporator, they produce an invisible vapor which repels mosquitoes. Each pad will burn up to 6 hours.

Mosquitoes will be repelled from a radius of 12 feet. Try it camping, swimming, boating, hunting, fishing, on a picnic, a barbecue or just around the patio.
