containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

TR-7150

ACTIVE INGREDIENT:

Potassium dimethyldithiocarbamate 16.6%

INERT INGREDIENTS 83.4%

This product contains 1.48 lb. of active ingredient per gallon and weighs 8.93 lb. per gallon.

KEEP OUT OF REACH OF CHILDREN
WARNING

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING Causes eye damage and skin irritation. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If product is swallowed, call a physician immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or far back on patient's tongue. Emetics such as 2 teaspoonful (10 mL) of ipecac syrup or 1 teaspoonful (5 mL) of dry mustard in warm water to form a paste or even soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, flour and water, or other nonoily demulcent. Never induce vomiting or give anything by mouth to an unconscious person.

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish. Do not apply in marine and/or estuarine or fields. Do not discharge treated effluent into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

NET CONTENTS

DIRECTIONS FOR USE
GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner not consistent with its labeling.

TR-7150 is used in industrial cooling tower systems and industrial air-washing systems. Prior to the use of TR-7150 in recirculating cooling tower systems, systems should be cleaned to remove microbiological slime, and other deposits. Then make an addition of 10.5 fl. oz. of TR-7150 to 60 to 90 ppm of TR-7150 of water in the system. Repeat initial dosage until control is achieved. Addition of 3.5 to 10.5 fl. oz. of TR-7150 per 100 gal. of water (30 to 90 ppm TR-7150) should be made every 1 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem in the sump of recirculating cooling tower systems.

TR-7150 is used in industrial waterflooding operations. Maintain effective mist-eliminating components. Prior to the use of TR-7150, clean to remove bacterial slime and other deposits. Then add 21.0 fl. oz. of TR-7150 to 12.3 to 21.0 fl. oz. of TR-7150 water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Additions may be made to the sump or the water collection tank. TR-7150 is used to control bacteria, including sulfate-reducing organisms, in waterflooding operations. In systems fouled with microorganisms, TR-7150 should be added as a slug dose of 24 to 48 ppm (2.9 to 5.8 fl. oz. per 100 gal. of water treated). This should be followed by a continuous addition of TR-7150 employing a chemical concentration of 24 ppm, based on total weight of water. Additions should be continuous and continuous addition of TR-7150 to heater-treater dump, gathering lines, or receiving tanks upstream to the filter. TR-7150 is also used to control bacteria in water-based drilling fluids, completion fluids, and based drilling fluids containing starch, gums, sugars, or other additives. TR-7150 is added to gal. per 100 barrels of fluid (0.05 to 0.25 by

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. STORAGE: Do not expose to extreme temperatures. Do not stack more than 10 drums. Drums should be placed in overpack drums for disposal. Spills should be cleaned up and disposed of in a sanitary landfill. Keep container closed when not in use. PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal is a violation of Federal Law. If these wastes cannot be disposed of by other procedures approved by state and local officials, contact your State Pesticide or Environmental Control Agency, or the Regional Office for guidance. CONTAINER DISPOSAL: PLASTIC: Triple rinse (or equivalent). Then offer for recycling or reuse, or for incineration, or if allowed by state and local officials, by other procedures approved by state and local officials. METAL: Triple rinse (or equivalent). Then offer for recycling or reuse, or for incineration, or if allowed by state and local officials, by other procedures approved by state and local officials.
