HOME SPRING™

**BACTERIOSTATIC WATER FILTER,
COUNTER TOP UNIT (MODEL HS 100)
PROVIDES GOOD, FRESH-TASTING DRINKING WATER**

Improves Taste

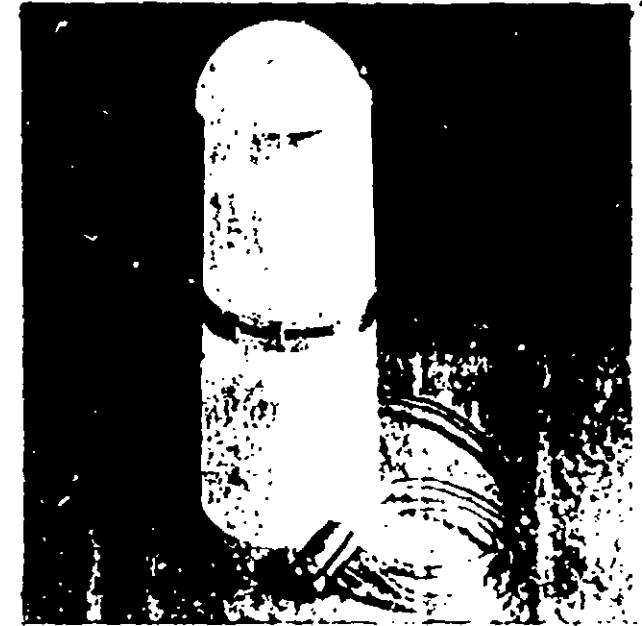

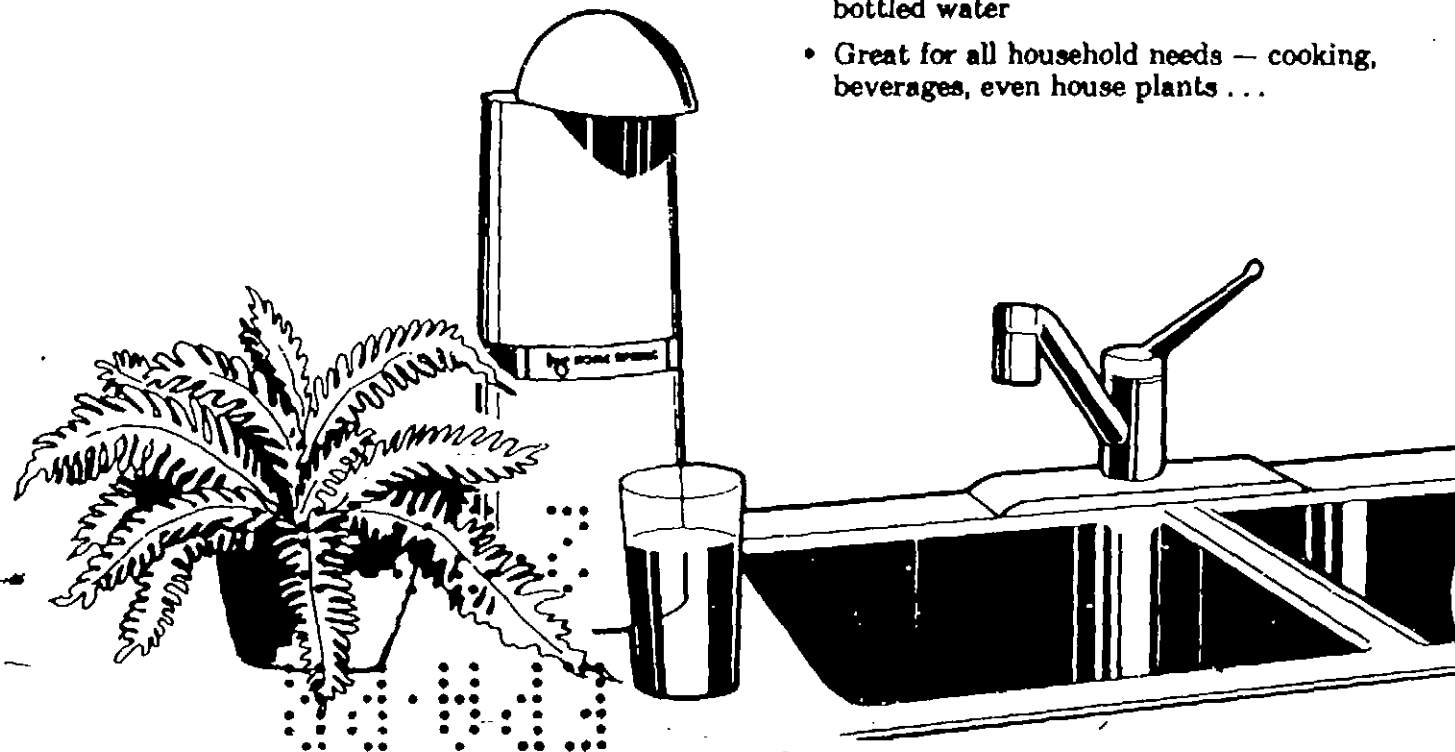

- Removes the unpleasant taste and odor of chlorine and other pollutants which give tap water a "medicinal" smell.
- Foreign materials make water cloudy; Home Spring Bacteriostatic Water Filter — Counter Top Unit (Model HS 100) removes them and gives you crystal clear, fresh-tasting water.
- The natural flavor of coffee and foods come through.

Provides Convenience

- Finger tip control at your faucet
- No cartridge to change
- Easy installation
- No heavy bottles to lift

Saves Money

- Engineered for years of reliable service
- Costs pennies a gallon — far less than bottled water
- Great for all household needs — cooking, beverages, even house plants . . .

Patent Pending

HOME SPRING

**How to Install and Use Your
Home Spring Bacteriostatic Water Filter
Counter Top Unit (Model HS 100)**

"It is a violation of Federal law to use this product in a manner inconsistent with its labeling."

A. How to Install your water filter —

1. Unpack contents:
 - a. Counter top water filter
 - b. Diverter valve assembly with plastic tubing
 - c. Universal adapter (This adapter fits 90% of kitchen faucets; additional adapters are available at any hardware store.)
2. Unscrew aerator from faucet. (Place a rubber washer on faucet, screw on adapter if needed), then screw on diverter valve.
3. Before drinking any water from the unit, turn on the cold tap, then push button on diverter valve. Allow water to flow for approximately 30 minutes or 10 gallons. This water has purged carbon fines and entrapped air from the unit and should be disposed of.

B. How to use your water filter —

1. Once the Home Spring Bacteriostatic Water Filter-Counter Top Unit (Model HS 100) has been installed, it will be maintenance free, with no filter replacement required.
2. The water filters have been tested by a licensed laboratory to last for 10,000 gallons of municipally treated water. Studies show that the average family of four will use approximately 2,000 gallons of water per year for drinking and cooking. This filter provides good tasting water for five years.
3. Flow rate: 1/2 gallon per minute.
Maximum water temperature: 85°F
Maximum water pressure: 125 psi

Use only for municipally treated tap water in the home.

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

[Faint, mostly illegible text, likely bleed-through from the reverse side of the page. Some words like "The above named pesticide" and "777-66" are faintly visible.]
