

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS. DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL. AVOID CONTAMINATION OF FOOD.

DANGER. Corrosive. Causes eye and skin damage. Do not get in eyes, on skin, or on clothing. Harmful or fatal if swallowed. Do not breathe vapors. Wear goggles or face shield and rubber gloves when handling.

STATEMENT OF PRACTICAL TREATMENT

If in Eyes: Flush with plenty of water for at least 15 minutes. Get medical attention.

If on Skin: Flush with plenty of water for at least 15 minutes. Get medical attention if skin is severely irritated.

If Swallowed: Promptly drink a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

Strong oxidizing agent. Do not use in concentrated form. Mix concentrate only with water; never bring concentrate in contact with other sanitizers, cleaners or organic substances.

Dispense directly from original container. Use only clean synthetic hoses made of materials such as Teflon, polyethylene, or polystyrene. Do not use rubber hoses. If concentrate must be transferred to another container use only clean polyethylene containers made of synthetic materials such as Teflon, polyethylene or polystyrene.

CHEMTREC EMERGENCY NUMBER 1-800-424-9300

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

P3 Oxonia Active sanitizer is recommended for use on pre-cleaned surfaces of closed systems such as pipes, tanks, fillers, evaporators, pasteurizers, and aseptic equipment in dairies, breweries, wineries, and beverage plants. The product is effective as a sanitizer when solution is prepared in water of up to 500 ppm hardness as CaCO₃.

SANITIZATION OF FOOD-CONTACT SURFACES

Prior to use of this product, remove gross food particles and soil by a pre-rinse, or pre-scrape and, when necessary, pre-soak treatment from all surfaces, then wash with detergent or other cleaning solution followed by a thorough potable water rinse.

Prepare sanitizing solution by diluting 1½-2½ fluid ounces P3 Oxonia Active concentrate per 5 gallons of water (0.25-0.4% v/v concentration). This will provide 100-200 ppm Peroxyacetic Acid and 840-1200 ppm of Hydrogen Peroxide. Fill closed systems such as piping, tanks, fillers, evaporators, and pasteurizers with the sanitizing solution at a temperature range of 5°C (45°F) to 40°C (104°F) for a contact time of at least 1 minute. Allow surfaces to drain thoroughly before resuming food processing operations. No potable rinse is required if used at 0.4% P3 Oxonia Active or less.

A fresh sanitizing solution should be prepared for manual operations at least daily or more often if it becomes soiled. The prepared use solution for automated operations must not be reused.

Refer to Technical Information Bulletin for methods to determine concentration.

STORAGE AND DISPOSAL

Store in original container in a cool place. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

PLASTIC CONTAINER DISPOSAL

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

PESTICIDE DISPOSAL

Product or residue that cannot be used should be diluted with water, neutralized with sodium carbonate and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
