U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Biopesticides and Pollution Prevention Division (7511C)
1200 Pennsylvania Avenue NW
Washington, DC 20460

EPA Reg. Number:

53575-28

Date of Issuance:

5/6/04

Term of Issuance:

Unconditional

Name of Pesticide Product:

Isomate OmLR

NOTICE OF PESTICIDE:

- Registration
- Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Pacific Biocontrol Corporation
14615 NE 13th Court
Suite A
Vancouver, WA

Note: Changes in labeling differing in substance from that accepted in connection with the registration of this pesticide by the Biopesticides and Pollution Prevention Division prior to use of the label must be approved by the Agency above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This registration does not eliminate the need for continual reassessment of the pesticide. If EPA determines at any time, that additional data are required to maintain in effect an existing registration, the Agency will require submission of such data under section 3(c)(2)(B) of FIFRA.

This product is registered in accordance with FIFRA section 3(c)(5) and is subject to the following terms and conditions:

1. Modify your label by inserting the new EPA Reg. No.53575-28 before the release of your product for shipment.
2. Submit five (5) copies of the revised final printed labeling before you release the product for shipment.

Signature of Approving Official:

Robert L. Anderson

Date:

5/6/04

EPA Form 8570-6

ACCEPTED

MAY - 6 2004

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 53575-28

BIOCONTROL

ISOMATE®-OmLR

ACTIVE INGREDIENTS:

E-11-Tetradecan-1-yl Acetate 73.62 %

Z-11-Tetradecan-1-yl Acetate 22.85 %

OTHER INGREDIENTS 6.53 %

TOTAL 100.00 %

84.05 mg active ingredients per dispenser

Keep out of reach of children

CAUTION

FIRST AID

If on Skin or Clothing

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in Eyes

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-999-8805 for further questions.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of this product.

Telephone (360) 571-2247 or 1-800-999-8805

MADE IN JAPAN
EPA Est. No: 47265-JP-01
EPA Reg. No: 53575-

NET CONTENTS: 500 Dispenser Units
One dispenser contains 0.003 fl oz or 87.28 mg
Total content of package: 1.53 fl oz or 43.64 gm

ISOMATE® is a registered Trademark of Pacific Biocontrol Corporation.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal

Pesticide Storage Store in original unopened package at temperatures below 40°F in a dry location. Only unopened or unbroken dispenser packages may be stored in cold storage facilities used for food storage. Care must be taken to avoid contamination of food or feed items.

Pesticide Disposal Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal Dispose of empty foil packet in the trash.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. It is critical that ISOMATE-OmLR is applied as directed.

1. Crop Peaches, plums, nectarines, cherries and other stone fruit; apples and other pome fruit; almonds and other tree nut crops; peppers and other vegetable crops; kiwifruit, avocado, grapes, pineapples, raspberries and roses.

2. Pest Omnivorous leafroller (*Platynota stultana*).

3. Rate Minimum of 100 dispensers per acre (0.29 fl oz or 8.41 gm a.i. per acre). Maximum of 200 dispensers per acre (0.59 fl oz or 16.81 gm a.i. per acre). Apply double rate of dispensers to edges of field. Do not exceed 150 gm a.i. per acre per year.

4. Application Apply dispensers securely to lateral branches in the top third of tree canopy (dispensers twisted too tightly may girdle branches). Or twist dispensers loosely around the main stem or cane of the plant or to stakes placed uniformly throughout the treated field (avoid contact with soil). Apply dispensers uniformly throughout the treated acreage to obtain a reduction in mating.

5. Timing Apply prior to leafroller emergence in the spring. In late crop varieties with high pest population, a second application is necessary. If a second application is required, consult your local pest control advisor for proper timing.

6. Note Isomate-OmLR suppresses the omnivorous leafroller from mating. However, if a major source of mated female moths of this species is present adjacent to the treated field, migration of these moths may significantly reduce the level of control achieved. Sources are likely to be unsprayed host species within 300 yards of the treated field. This can be reduced by:
a. Treatment of entire blocks and not just sections of large conventionally treated fields that frequently serve as sources of mated females.
b. Treatment of infestation sources with Isomate-OmLR (i.e., a strip at least 50 yards wide nearest the treated field).
c. Treatment of infestation source with an effective insecticide.
d. Treatment of 4-6 rows along border of pheromone treated orchard with insecticide.
Supplementary applications of insecticide are advised when Isomate-OmLR is used to control high populations of leafrollers. All pests must be monitored so that timely intervention with insecticides is possible.

WARRANTY AND LIMITATION OF DAMAGES

All statements concerning the use of this product apply only when used as directed. The Manufacturer makes no warranties, expressed or implied, concerning this product or its use, which extend beyond the description on the label. Read all directions carefully.
