Dear Ms. Bolan:

The amendments referred to above submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c)(5), are acceptable provided that you:

- 1) Submit and/or cite all data required for registration/re-registration of your products under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
- 2) Submit two (2) copies of your final printed labeling before you release the products for shipment. Final printed labeling means the label or labeling of the products when distributed or sold. Clearly legible reproductions or photo reductions will be accepted for unusual labels, such as those silk-screened directly onto glass or metal containers or large bags or drum labels.

If these conditions are not complied with, the registrations will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the products bearing the amended labeling constitutes acceptance of these conditions. Stamped copies of the labels are enclosed for your records.

Should you have any questions, you may contact Mr. Colin Walsh directly at (703) 308-0298 or via email at walsh.colin@epa.gov.

Sincerely,

 Cheryl K. Reilly for

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.
It is CRITICAL that ISOMATE PTB DUAL is applied as directed.

Crops	Peaches, nectarines, apricots, plums, cherries and other stone fruits; almonds and other tree nut crops; ornamental nursery crops.
Target Pests	Lesser peachtree borer (<i>Synanthedon pictipes</i>), greater peachtree borer (<i>Synanthedon exitiosa</i>).
Rate	150 dispensers per acre (0.51 fl oz or 13.45 gm a.i. per acre). Use higher rate up to 250 dispensers per acre (0.85 fl. oz. or 22.42 gm a.i. per acre) when pest pressure is high. Do not exceed 150 gm a.i. (or 1,673 dispensers) per acre per year.
Application	Place dispensers on lateral branches in mid point of tree canopy. Apply dispensers uniformly in the treated area.

Timing
Apply prior to moth emergence in the spring. Consult your local pest control advisor or Pacific Biocontrol representative for proper timing or estimated dispenser longevity in your area.

Note
Isomate PTB Dual suppresses mating of target pests. Immigration of mated female moths of these species from adjacent external sources of infestation will reduce the level of control. Manage by:

- a. Treatment of external sources of infestation with Isomate PTB Dual.
 - b. Treatment of external sources of infestation with an effective insecticide.
 - c. Treatment of pheromone treated orchard with insecticide.
- Areawide application is most effective. Supplementary applications of insecticide are advised when Isomate PTB Dual is used in orchards with high pest populations. All pests must be monitored so that timely intervention with insecticides is possible.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage Store in original unopened package in a dry location at temperatures below 40°F. To prevent contamination with food or feed, store only unopened product packages in cold storage facilities that are used for food or feed.

Pesticide Disposal Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal Nonrefillable container. Do not reuse or refill this container. Dispose of empty foil packet in the trash.
