PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

(18 pt)

Corrosive. Harmful or fatal if swallowed. Causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid contamination of food. Remove and wash contaminated clothing.

Statement of Practical Treatment

If swallowed: Drink [redacted] egg whites, gelatin solution or, if these are not available, drink large quantities of water. Call a physician.

If on skin: Flush skin with plenty of water for at least 15 minutes.

If in eyes: Flush eye with plenty of water for 15 minutes and call a physician.

If on clothing: Remove and wash all contaminated clothing before reuse.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

Storage and Disposal

(12 pt)

Do not contaminate water, food or feed by storage or disposal.
Open dumping is Prohibited.
Do Not Reuse Empty Container.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

Directions For Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ALGAE-GONE is effective against ALGAE

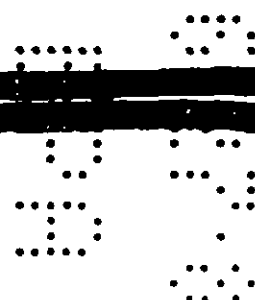

[REDACTED]

ALGAE-GONE is a clear liquid that mixes readily in water and will not separate.

[REDACTED]

With a little experience, you will quickly recognize algae contamination as it starts. Algae should be killed immediately! REMEMBER-algae can double or quadruple in growth every day.

[REDACTED]

TREATMENT

1. Remove floating type algae [REDACTED] by raking; dragging with cable or chain; skimming - or any other suitable method.

It is more economical to remove floating type algae [REDACTED] (if possible) before the water is treated.

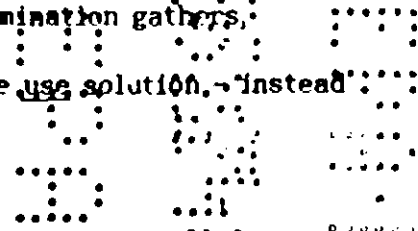

2. Treat water by 'dribbling' ALGAE-GONE solution (1 part ALGAE-GONE added to 3 parts water*) around the edges [REDACTED] where algae first grows.
of the site

[REDACTED]

The use solution need be applied only where algae growth is evident.
visible

This use solution is often 'dribbled' liberally along the windward side to float across the water - also along the leeward side where contamination gathers.

Where a spray rig is available - it may be used to apply the use solution. Instead of the hand 'dribbling' method.

[REDACTED]

[REDACTED] nd

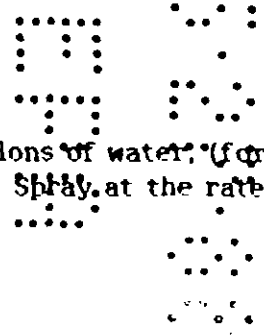

[REDACTED] er.

Algae is generally dead when it does not feel slick to the touch, and the color has changed. However, algae does not always change color when killed.

NOTE: Algae does not usually grow in water that is 5 feet or more in depth. However, floating type algae may grow on pond weeds that grow on the surface of the water.

ALGAE and ODORS in TURF [REDACTED]

Spray with a solution of 1.5 quarts ALGAE-GONE in 100 gallons of water. (for smaller quantities, use: 1 oz. ALGAE-GONE to 2 gallons water). Spray at the rate of approximately 4 gallons solution per 1,000 square feet.

[REDACTED]

[REDACTED] line for

[REDACTED]

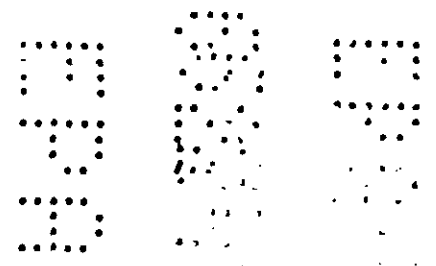

Note: Do not use with fish. ALGAE-GONE may cause fish to suffocate and die.
