Subject: Label Amendment –to update the directions for use and product descriptions throughout the label.
Product Name: Sani-King P-Max VIII Cartridge
EPA Registration Number: 53735-2
Application Date: June 7, 2016
Decision Number: 518675

Dear Ms. Wacek:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. “To distribute or sell” is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

Page 2 of 2
EPA Reg. No. 53735-2
Decision No. 518675

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Srinivas Gowda by phone at 703-308-6354, or via email at gowda.srinivas@epa.gov.

Sincerely,

Demson Fuller

FIRST AID: If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **If Swallowed:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. **If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

{Directions to be used for pool cartridge}

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION:

This [chamber] [pac] is a disinfectant that is part of an advanced system that uniformly feeds chlorine, efficiently kills bacteria and controls algae continuously for weeks under normal conditions in a stabilized pool. The conveniently disposable [chamber] [pac] lets you control the rate of chlorine delivery to meet changing conditions in your pool, by simply adjusting the control dial on the chlorine delivery system. You never have to touch the chlorinating tablets.

USE DIRECTIONS:

1. Adjust pH level to 7.2-7.8.
2. Bring Free Available Chlorine (FAC) residual to 1.0-1.5 ppm using a chlorine shock. Follow Manufacturer's Label Directions.
3. Stabilize the pool with cyanuric acid stabilizer. Follow Manufacturer's Label Directions.
4. **To install [chamber] [pac]:** Take feeder cap off. Remove [chamber] [pac] [colored caps] [cut offs]. Hold [chamber] [pac] so the open end faces down. Insert into feeder. The end of the [chamber] [pac] must align with the key located inside the feeder at the bottom. **DO NOT FORCE.** Replace feeder cap and set the control dial to the appropriate setting. For a guideline, using a 13,500 gallon pool with a pump running 8 hours per day, begin with the control dial set on #3. For a 18,000 gallon pool, start at setting #4. To achieve the proper FAC, turn the control dial to the next higher setting to increase the FAC and turn it to the next lower setting to decrease the FAC. Operate the pool for 1 day. Check the FAC residual and increase/decrease one setting per day until you achieve 1.0-1.5 ppm. Do not enter the pool until the chlorine residual is 1.0-1.5 ppm.
5. Once you have determined the proper setting for your pool, you do not have to re-adjust the setting under normal conditions. If conditions change (i.e. weather, rain, pool use, bather load, etc.) the control dial can be easily adjusted to increase or decrease the chlorine feed.
6. Superchlorinate if needed. Do not add shock treatment to the skimmer. Turn control dial to [Setting 0 or] [Minimum] before super-chlorinating. Once desired FAC has been obtained, return the control dial to the normal operating setting.
7. Periodically check the [chamber] [pac] and replace with a new one when empty. Do not attempt to open or refill this [chamber] [pac]. **DO NOT REUSE.**

{Directions to be used with Pool Frog Mineral Reservoir EPA Reg. No. 53735-11}

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION:

This [chamber] [pac] [pack] is a disinfectant that is part of an advanced pool care system that uses the Pool Frog Mineral Reservoir (EPA Reg. No. 53735-11) with low levels of chlorine to destroy bacteria continuously for weeks under normal conditions in a stabilized pool. The conveniently disposable [chamber] [pac] [pack] lets you control the rate of chlorine delivery to meet changing conditions in your pool, by simply adjusting the control dial on the chlorine delivery system. You never have to touch the chlorinating tablets.

USE DIRECTIONS:

1. Adjust pH level to 7.2-7.8.
2. Bring Free Available Chlorine (FAC) residual to 1.0 ppm using a chlorine shock. Follow Manufacturer's Label Directions.
3. Stabilize the pool with cyanuric acid stabilizer. Follow Manufacturer's Label Directions.
4. **To install [chamber] [pac] [pack]:** Take feeder cap off. Remove [chamber] [pac] [pack] [colored caps] [cut offs]. Hold [chamber] [pac] [pack] so the open end faces down. Insert into feeder. The end of the [chamber] [pac] [pack] must align with the key located inside the feeder at the bottom. **DO NOT FORCE.** Replace feeder cap and set the control dial per the size and pump run time of your pool according to the chart in the manual included with the Mineral Reservoir. Monitor chlorine level daily for the first week to determine correct dial setting. Turn the control dial to the next higher setting to increase the FAC and turn it to the next lower setting to decrease the FAC. Check the FAC residual [with Frog brand Test Strips] and increase/decrease one setting per day until you achieve at least 0.5 ppm. Do not enter the pool until the chlorine residual is at least 0.5 ppm.
5. Once you have determined the proper setting for your pool, you do not have to re-adjust the setting under normal conditions. If conditions change (i.e. weather, rain, pool use, bather load, etc.) the control dial can be easily adjusted to increase or decrease the chlorine feed.
6. Superchlorinate if needed. Do not add shock treatment to the skimmer. Turn control dial to [Setting 0 or] [Minimum] before super-chlorinating. Once desired FAC has been obtained, return the control dial to the normal operating setting.
7. Periodically check the [chamber] [pac] [pack] and replace with a new one when empty. Do not attempt to open or refill this [chamber] [pac] [pack]. **DO NOT REUSE.**

{Directions for use for floating pool cartridge to be used with Pool Frog Mineral Reservoir EPA Reg. No. 53735-11}

Product Description:

This cartridge is a disinfectant that is one part of the Frog Splash System that uses the Pool Frog Mineral Cartridge (EPA Reg. No. 53735-11) with 1.0 ppm of chlorine to destroy bacteria continuously for weeks under normal conditions. The conveniently disposable cartridge lets you control the rate of chlorine delivery to meet changing conditions in your pool by simply adjusting the setting. You never have to touch the chlorinating tablets. When used as directed, pool care is easy and pool water is crystal clear.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Directions For Use:

For use in small above ground pools up to 4000 gallons. Ensure all equipment is working properly according to the pool manufacturer. For best results, balance pH to between 7.2 and 7.8.

Setting Pool Frog Chlorine Cartridge:

While holding the bottom of the cartridge, turn the top until the appropriate setting number is displayed. For pools 1000 gallons or less, begin on setting 1 or 2. For larger pools begin on setting 3. Initially monitor chlorine levels daily until at least 1.0 ppm is maintained. Adjusting to a higher setting will increase chlorine output while a lower setting will decrease it. NOTE: If the setting is too high, bleaching of pool liners may occur in smaller pools.

Using the Frog Splash System:

Push the Pool Frog Chlorine Cartridge into the bottom opening of the floating Frog Splash System. For best results, insert the Pool Frog Mineral Cartridge (EPA Reg. No. 53735-11) into the other opening. Set entire system in the pool water.

{Directions to be used for spa cartridge}

PRODUCT DESCRIPTION:

Use this cartridge as a disinfectant in either the In-line Spa System, the Floating Spa System or as a free-floating sanitizer. When the cartridge is used as directed, [spa] [hot tub] care is easy and [spa] [hot tub] water is crystal clear.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label to use strictly in accordance with precautionary statements and directions.

Ensure all [spa] [hot tub] equipment is working properly. Operate the pump and filter for at least 3 hours per day. Clean filter following manufacture's directions. Adjust pH to between 7.2 – 7.8 and total alkalinity to 80-120 ppm. When using other products as outlined in directions for this product, always follow directions on those products. [Spa] [Hot Tub] temperature not to exceed 104°. Keep the [spa] [hot tub] free of leaves and debris. Drain residential [spas] [hot tubs] and hot tubs and fill with fresh water periodically. See your [spa] [hot tub] manufacturer's directions.

Using the In-line Spa System: Set the cartridge at #1 by holding the bottom and turning the top until the number 1 appears in the setting window. To install: open cap on In-Line System and turn cartridge holder counter-clockwise to unlock. Pull holder out. Snap cartridge into "lower" section. Make sure to line up indent on cartridge with raised line on holder. After cartridge is snapped in, replace holder by lining up arrow on holder with arrow on system lip, push down and lock in place. Replace cap. Initially monitor chlorine levels daily until a 1.0-1.5 ppm residual is achieved. Remove and adjust cartridge to maintain a chlorine level depending on [spa] [hot tub] size and use.

Using the Floating Spa System: Set the cartridge at #1 by holding the bottom and turning the top until the number 1 appears in the setting window. To install: push the cartridge into the bottom opening of the Floating Spa System. Set entire system in the [spa] [hot tub] water. Initially monitor chlorine levels daily until a 1.0 - 1.5 ppm is achieved. Then adjust to maintain a chlorine level depending on [spa] [hot tub] size and use.

Using as a Free Floating Sanitizer: Set cartridge as described for the Floating Spa System and allow to free float in [spa] [hot tub].

FOR ALL USES: Adjusting to a higher setting will increase the chlorine output while a lower setting will decrease it. When empty follow disposal instructions and replace with a new cartridge.

{Directions for use for Floating Pool Cartridge to be used with Pool Frog Mineral Reservoir EPA Reg. No. 53735-11}

Product Description: The Sani-King P-Max VIII Cartridge is a disinfectant that is part of [a complete pool care system] [mineral sanitizing pool care] [pool care with sanitizing minerals] [sanitizing mineral pool care] [for [pop-up] [splasher] [small above ground] [easy set] [quick set] [metal frame] [oval frame] [ultra frame] [frame] [set] pools] that [uses the] [utilizes a] patented mineral [technology] [formula] of the Pool Frog Mineral Reservoir [(EPA Reg. No.: 53735-11)] with [low(er)] [reduced] levels of chlorine to destroy bacteria, help control algae and restore water clarity. Simply [connect,] [turn] [twist] [to] set [the dial] [and] [then] [toss into] [plop in] [tether to] the pool. Everything is prefilled and contained [[for] no mess, no guess [and] no stress [pool care]]. [The best part is it flips over when [empty] [out] [time to replace a [chlorine] cartridge.] [Hey! Less Work Hey! Less Chlorine Hey! Less Money].

Directions for Use:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For use in [above ground] [or] [in ground] pools [up to [12'] [15'] [16'] [18'] [20] [21] in diameter] [or] [approximately [3000] [4000] [5000] [6000] [8000] [10,000] gallons] [between [1000] [2000] [5000] and [5000] [6000] [10,000] gallons]. [Not recommended for pools under [1000] [2000] [5000] gallons]. [Use one per [5000] [10,000] gallons.] [Check the package to ensure you have the right Pool Frog Mineral [Reservoir] [System] [or] [chlorine recharge] [cartridge] for your size pool.] Ensure all pool equipment is working properly with adequate circulation per the pool manufacturer. Balance the water's pH to between 7.2 and 7.8. Shock pool to remove contaminants (follow manufacturer's directions).

{Assembly Option #1}

[To assemble: Remove the outer packaging [before using [the Pool Frog Mineral [Reservoir] [System] [or] [chlorine recharge] [this cartridge]]. Bring the [insert color] mineral and [insert color] chlorine [halves] [hemispheres] [cartridges] [pacs] [pieces] [sections] together [with [arrows] [alignment marks] [tick marks] [icons] [water drops] [snaps] aligned along the edge of both [halves] [cartridges]]. [with the arrow on the chlorine cartridge lined up with the [unlock symbol] [catches] on the mineral cartridge] [(see Figure A)]. [Push together and twist [the bottom cartridge x degrees] to [lock] [the lock [symbol] [position]]. [Rotate the two cartridges until you hear the [safety] [locking] tab click into place.] [Rotate the two [halves] [hemispheres] [cartridges] [pacs] [pieces] [sections] opposite of each other [(see Figure B)] until the initial setting for your pool size [appears in the setting window] [is lined up with the [arrow] [alignment mark] [tick mark] [icon] [water drop]] [(see Figure C)] [(see chart in [FROG System] manual)]. [For example, the] most common pool size [of] 15' [diameter], 4000 gallons [would start on] setting #5.]

[Assembly Option #1A]

[Align the bottom [chlorine] cartridge with [marks] [arrows] [symbols] [tab guides] on the top [mineral] cartridge. Push in until you hear [it [click] [snap] into place] [the tab guides engage].] [Line up the [features] [snaps] [marks] [tab guides] on the two cartridges and push together until you hear the cartridge click into place.] [Twist the dial on the [bottom] [chlorine] cartridge to the setting [number] for your pool size (see chart).] [Start with the [factory] [middle] [medium] [center] setting. If you find less chlorine is needed turn the dial to [the] [a] lower setting –if more is needed turn it to [the] [a] higher setting.] Even at the lowest setting [of 0] there will be some chlorine released into the pool.

Once set, place directly in the pool. [With the cord provided] [Tether it to the pool [side] or ladder [with [a string] [the cord] [provided] through the [loop] [hole] in the product].] Initially test [the] water [daily] for chlorine [using] [with] FROG [Brand] Test Strips [or a recognized swimming pool test kit or a testing device]. Adjust the [system up or down by one setting per day] [setting if necessary] until the ideal free available chlorine (FAC) range of 0.5 to 1.0 ppm is maintained. [You may remove] product from pool when in use]]

{Assembly Option #2}

[To assemble: Remove outer packaging

- Align arrows on [insert color] mineral and [insert color] chlorine cartridges (see Figure # [below])
- Push together and rotate to connect (see Figure # [below])
- Find setting from initial setting chart (see Figure # [below])
- Lock in setting and place in pool (see Figure # [below])
- [Attach cord and tether to pool or ladder]
- Maintain 0.5 to 1.0 ppm free chlorine level
- Initially test water with [Frog] Test Strips daily
- Adjust setting if needed one number per day
- [Product may be removed when pool is in use] [Remove product when pool is in use]]
- Shock pool as needed to maintain water clarity

When the [complete Frog System] [Pool Frog Mineral Reservoir] [flips] [rolls] over the chlorine [half] [cartridge] is empty and must be replaced. To remove, [rotate the two [halves] [hemispheres] [cartridges] [pacs] [pieces] [sections] until the [arrows] [alignment marks] [tick marks] [icons] [water drops] align along the edge of both [halves] [cartridges] (see Figure A) and pull apart.] [To remove the [bottom] [chlorine] cartridge, release the [safety] [locking] tab by pulling or pushing the release with your finger.] [To release the [bottom] [chlorine] cartridge, squeeze the tabs and pull the empty cartridge out.]

[If the Pool Frog Mineral Reservoir has not been used for 6 months or one pool season whichever is shorter, simply attach a new chlorine [brand] [half] [hemisphere] [replacement] [cartridge] [pac] [recharge] and set the complete system back in the water.] Do not allow chlorine cartridge to sink to the bottom or pool bleaching may occur.

If the chlorine [brand] [half] [hemisphere] [replacement] [cartridge] [pac] [recharge] still contains a small amount of chlorine after the system has [flipped] [rolled] over, [place in pool until completely empty] [hang on the tether via the [hook] [loop] on the side of the cartridge] [until completely empty].

[Once the Pool Frog Mineral Reservoir has been used for 6 months or one pool season whichever is shorter, the minerals are no longer active. Replace the entire Pool Frog Mineral [Reservoir] [System] and discard the mineral [half] [hemisphere] [cartridge] [pac] [piece] [section] in the trash.]

{Directions for Use for Cartridge for Bulk Chlorinator to be used with Pool Frog Mineral Reservoir EPA Reg. No. 53735-11}

Product Description: The Sani-King P-Max VIII Cartridge is a disinfectant that is part of a complete pool care system that works inside an [Hayward®] [Rainbow®] chlorinator along with a patented mineral formula to destroy bacteria, help maintain pH and restore water clarity. Simply use with the Pool Frog Mineral Reservoir (EPA Reg. No. 53735-11) by [attaching] [connecting] [latching] the two pacs together and inserting in the center of a [Hayward®] [Rainbow®] chlorinator. Everything is prefilled and contained for no mess, no guess and no stress pool care.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Directions For Use: For use inside [Hayward®] chlorinator models CL200 and CL220] [Rainbow®] chlorinator models 300 and 320] [or equivalent chlorinator] for pools up to [10,000] [15,000] [20,000] [25,000] [30,000] [35,000] [40,000] gallons. Pool Frog Mineral Reservoir must be used with the Sani-King P-Max VIII Cartridge. Before using, balance the pH to between 7.2 and 7.8 and total alkalinity between 80-120 ppm and shock the pool with a [chlorine shock per the manufacturer's directions.] [shock pac per its label directions.] Make sure the chlorinator is completely empty of chemical. Never mix chemicals. If used previously with a chemical other than Trichlor, clean inside of chlorinator thoroughly. Then follow the directions below:

1. [Remove [tape] [foil] covering the water holes on the bottom [and side] of] [Remove plug from side of] the chlorine pac.
2. Connect the Pool Frog Mineral Reservoir to the Sani-King P-Max VIII Cartridge by bringing the two pieces together, lining up the arrows and turning the chlorine pac clockwise until locked in place.
3. Turn circulation pump off, turn the [Hayward®] [Rainbow®] chlorinator dial to off and remove its cap.
4. [Lift] [Use] handle [and] [to] insert the complete system into the [Hayward®] [Rainbow®] chlorinator by lining up the short square channel on the Pool Frog Mineral Reservoir with the dial side of the chlorinator. Lower until seated. The cap will not close properly if the product is not seated correctly. Lift up and reinsert until seated properly.
5. Replace the cap on the [Hayward®] [Rainbow®] chlorinator and turn pump back on. Set the control dial according to the chart in the manual. When using the Pool Frog Mineral Reservoir maintain a free available chlorine (FAC) level of 0.5 ppm to 1.0 ppm. Adjust the chlorinator dial to increase or decrease chlorine output.
6. [If using Algaecide Pac. Before attaching the Sani-King P-Max VIII Cartridge (step 2) [push] [screw] [affix] algaecide [pac] [container] [bottle] [on] [in] to the [adapter that attaches to the] [Pool Frog Mineral Reservoir] [while inside the chlorinator] [then insert into chlorinator]. Replace cap, turn dial full open and run for 90 minutes. Remove algaecide bottle and discard or recycle.]

REENTRY into treated [spas] [hot tubs] is prohibited above levels of 3 ppm chlorine.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: CORROSIVE: If product is removed from its prefilled container, causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Follow directions for use carefully. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS: Corrosive: Strong oxidizing agent. Non-refillable container. Do not attempt to refill empty [chamber] [pac] [pack] [cartridge]. Place only into water or installed equipment made for this product. Contamination with moisture, dirt, organic matter or other chemicals (including other [pool] [spa] [hot tub] chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire and explosion. Avoid any contact with flaming or burning material such as a lighted cigarette. Do not use this product in any [chlorinating] [dispensing] device, which has been used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

{(Environmental hazards statement for end-use products of less than 5 gallons (liquid) or less than 50 pounds (solid, dry weight).)}

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL:

Do not contaminate food or feed with this product.

Product Storage: Store [delivery] [chamber] [pac] [pack] [cartridge] [hemisphere] [replacement] in original container in a cold, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container and flood area with large amounts of water to dissolve all material before discarding this [chamber] [pac] [pack] [cartridge] [hemisphere] [replacement].

PESTICIDE DISPOSAL: Product or rinsates that cannot be used must be diluted with water before disposal in a sanitary sewer.

{Disposal directions for pool cartridge}

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this [container] [chamber] [pac] [pack] [hemisphere] [replacement] [cartridge]. Shake the [container] [pac] [cartridge] over the pool and away from your face to ensure it is empty before offering for recycling if available or dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

{Disposal directions for spa cartridge}

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this [container] [chamber] [pac] [pack] [hemisphere] [replacement] [cartridge]. Shake the [container] [pac] [cartridge] over the pool and away from your face to ensure it is empty before offering for recycling if available or dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

{Operating instructions for Floating Pool Cartridge} {All text is optional}

Operation Manual

This is not a toy. For sanitizing [pop-up] [soft sided] [Intex style] pools only! [Tether to pool with enclosed cord.]

[Welcome to pool care courtesy of FROG. The FROG [Mineral [Water] System+] [Mineral Sanitizing Pool Care System] [pool care with sanitizing minerals] [sanitizing mineral pool care] [will help] destroy[s] bacteria to keep your pool clean with less work and up to 50% less chlorine.* It is super easy to use and will keep you enjoying a clean, clear swimming pool for weeks at a time. Here's all you do:]

[The FROG Mineral Reservoir is [part of] a complete pool care system for [pop-up] [soft sided] [Intex style] pools up to [5,000] [10,000] gallons. It [uses] [utilizes] [the] [our] patented mineral formula [in the top cartridge] [of the FROG Mineral Reservoir] with [low[er]] [reduced] levels of chlorine from the [bottom] chlorine cartridge to destroy bacteria, help maintain pH and restore water clarity. Simply [connect,] [turn] [twist] to set [the dial] and [toss into] [tether to] [plop in] the pool. Everything is prefilled and contained [[for] no mess, no guess [and] no stress [pool care.]] [The best part is it flips over when [empty] [out] [it's time to replace [a] [the] [chlorine] cartridge.] [Hey! Less Work Hey! Less Chlorine Hey! Less Money]

Register your FROG Mineral Reservoir at kingtechnology.com

[Pool] [Start-up] [Step One: Preparing the Pool]

1. [Use test strips or a test kit to] balance your water according to the water balance guidelines. The Frog Mineral [Reservoir] [System] [controls] [maintains] the free chlorine level [only]. pH is affected by weather and the make-up of your source water. For help in balancing follow steps a through e in order. **IMPORTANT:** Always follow printed instructions on the balancing chemical packages. Add balancing chemicals in small increments one at a time with circulation running and wait 8-12 hours before testing again and adding any additional balancing chemicals.
 - a. Take a water sample from the pool and dip a FROG Test Strip into it.
 - b. Look at the Total Alkalinity reading first. Adjustments should be made to bring the Total Alkalinity in the range of 80 – 120 ppm prior to making any adjustments to pH even if it throws pH off further.
 - c. After Total Alkalinity is in range, test for pH. It should be between 7.2 and 7.8. If higher or lower, add a pH adjuster.
 - d. Then test for Calcium Hardness. It should be between 200 and 400 ppm. If higher, partially drain the pool and refill with water low in calcium. If lower, add Calcium Increaser.
 - e. Lastly test for stabilizer or conditioner levels. Add conditioner if the level is below 20 ppm. This will prevent chlorine burn off.

[If balancing takes longer than 2 days shock the water and maintain a chlorine level while continuing balancing.]

WATER BALANCE GUIDELINES	
pH	7.2-7.8
Total Alkalinity	80-120 ppm
[Calcium Hardness	200-400 ppm]
[Total Dissolved Solids	<1500]
Stabilizer (Cyanuric Acid) / Conditioner	20-80 ppm
Free Chlorine	0.5-1.0 ppm

1. Shock pool to remove contaminants (follow manufacturer's directions).

- Remove [the] [outer] packaging from both the mineral and chlorine [halves] [hemispheres] [cartridges] [pacs] [pieces] [sections] of the FROG Mineral System. NOTE: Small mineral particles may have dislodged from the cartridge in shipping. Simply discard [particles] in trash. Bring the two [halves] [cartridges] together and line up the [arrows] [alignment marks] [tick marks] [icons] [water drops] [snaps] [arrows on the chlorine cartridge with the [unlock symbol] [catches] on the mineral cartridge]. [Push together and twist [the bottom cartridge x degrees] to [lock] [the lock [symbol] [position]]]. [Rotate the two cartridges until you hear the [safety] [locking] tab click into place.]. [Do not twist past setting #x or damage to the product could result.] [Align the bottom [chlorine] cartridge with [marks] [arrows] [symbols] [tab guides] on the top [mineral] cartridge. Push in until you hear [it [click] [snap] into place] [the tab guides engage].] [Line up the [features] [snaps] [marks] [tab guides] on the two cartridges and push together until you hear the cartridge click into place.]

[If using the [algaecide] [clarifier] [scent] [shock] pac, attach [to] [complete system] [mineral half] [between the mineral and chlorine halves]. Follow the instructions on that product for proper use.]

[Setting the FROG Mineral System]

- [Twist the mineral [half] [hemisphere] [replacement] [cartridge] [pac] opposite of the chlorine [half] [hemisphere] [replacement] [cartridge] [pac] until the setting number for your pool size is lined up with the [arrow] [alignment mark] [tick mark] [icon] [water drop] [on the chlorine cartridge] (see chart below).] [Twist the dial on the [bottom] [chlorine] cartridge to the setting [number] for your pool size (see chart).] [Start with the [factory] [middle] [center] [medium] setting. If you find less chlorine is needed turn the dial to [the] [a] lower setting –if more is needed turn it to [the] [a] higher setting.] Even at the lowest setting [of 0] there will be some chlorine released into the pool.
- [Then simply toss it into the pool or] [tether it to the pool [side] [frame] [or ladder] [with the cord provided,] away from the skimmer or a return jet]. [Use [the enclosed cord] [a string] tied to the [loop] [hole] in the product.]

{graphic callouts;} [insert color] mineral cartridge, [insert color] chlorine cartridge, setting [#] on mineral cartridge, Twist [mineral opposite of chlorine] [dial on bottom of chlorine cartridge]

- Test the water periodically and [adjust the setting until the chlorine level is] maintain[ed] at [least a] 0.5 ppm to 1.0 ppm [chlorine level]. Use the precise FROG [Brand] Test Strips to help measure the ideal chlorine range when used with FROG minerals. Based on average pool usage, chlorine will last [on average] [about] [up to] [4-6 weeks for pools up to [3000] [4000] gallons or] [[2] [3]-4 weeks for pools up to [5000] [6000] [10,000] gallons.] [3-4 weeks] except during times of hot water temperatures and heavy pool use.

[Pool Frog Mineral Reservoir] Initial Setting Chart [For [2000] [5000] to [5000] [10,000] gallons]					
Diameter	[Pool Gallon Size] [Gallons]	Setting #	Diameter	[Pool Gallon Size] [Gallons]	Setting #
8'-10'	[1000]	#	18'	[5000]	[#] [Low] [Less] [Small Pool]
10'	[1500]	#	18'	[5500]	[#][Low] [Less] [Small Pool]
12'	[2000]	#	18'	[6000]	[#] [Medium]
12'	[2500]	#	18'	6500	[#] [Medium]
15'	[3000]	#	20'	7000	[#] [Medium]
15'	[3500]	#	20'	8000	[#] [High] [More]

					<i>[Large Pool]</i>
15'	[4000]	#	21'	9000	[#][High] [More] [Large Pool]
15'-16'	[4500]	#	21'	10000	[#][High] [More] [Large Pool]

[Most common pool size] [For example, pools 15' in diameter or 4000 gallons would use setting x]
NOTE: [See the information that came with your pool or] calculate pool gallons by multiplying diameter x diameter x water height x 5.9 or visit our pool volume calculator at kingtechnology.com

Replacing the Chlorine [Brand] [Half] [Hemisphere] [Replacement] [Cartridge] [Pac] [Recharge]

When the product is almost empty it will [begin to] slowly [flip] [roll] over giving you [a day or two] notice that it's about time to replace. If it stays on its side longer than a day or two, pull unit out of the water and let it drain. Reset it in the water to see if it flips completely. [If it does] [When it completely [flips] [rolls] over replace by [rotating the two [halves] [hemispheres] [cartridges] [pacs] [pieces] [sections] until the [arrows] [alignment marks] [tick marks] [icons] [water drops] align along the edge of both [halves] [cartridges] and pull apart] [arrow on the chlorine cartridge aligns with the unlock symbol on the mineral cartridge and pull apart]. [To remove the [bottom] [chlorine] cartridge, release the [safety] [locking] tab by pulling or pushing the release with your finger.] [To release the [bottom] [chlorine] cartridge, squeeze the tabs and pull the empty cartridge out.] Follow the start-up procedures [above for attaching a filled chlorine [brand] [half] [hemisphere] [replacement] [cartridge] [pac] [recharge]].

Do not remove the chlorine cartridge until the system has completely flipped. If the chlorine [half] [hemisphere] [replacement] [cartridge] [pac] [recharge] [still] contains a small amount of chlorine after the system has [flipped] [rolled] over, [place in pool to float by itself] [hang on the tether via the [hook] [loop] on the side of the almost empty chlorine cartridge] [until completely empty]. Do not allow chlorine cartridge to sink to the bottom or pool bleaching may occur. When completely empty discard in trash [or offer for recycling].

Regular Pool Care

1. Run pump and filter at least 8 hours per day [but ideally 24 hours per day]. Clean or replace your filter cartridge weekly. Lack of circulation may cause bleaching of pool surface and improper sanitization levels.
2. [Regularly] skim the surface of any debris and remove [anything] [debris] collected on the return fitting to your pump.
3. Regularly test water for pH, total alkalinity and chlorine levels. Adjust your pH when it rains or when adding fresh water to the pool. Maintain [a] [at least] 0.5 [to 1.0] ppm chlorine level at all times.
4. Replace [the] chlorine [cartridge] when [the FROG Mineral System completely] [flips] [flipped] [rolls] over.
5. Shock the pool [at least] [weekly if the pool is being used often and every few days when the water temperature is 90 degrees or more] [in the heat of the season and [as needed] to maintain water clarity. Follow label directions on the shock treatment used.
6. Replace the complete Frog Mineral [Reservoir] [System] every 6 months or after one pool season whichever is shorter. If the pool is drained and refilled prior to six months or one pool season, the [minerals] [system] must be replaced at that time.

NOTE: [This product may be removed from the pool when in use [or if the pool has over chlorinated]. Lift out of the water and let drain into the pool. Then hang over the outside of the pool [on [the cord provided] [a string]] or place on the ground or surface that is not susceptible to bleaching from the chlorine. Remember to replace the product once exiting the pool [or when the chlorine levels return to normal.]

Troubleshooting

Cloudy Water or Low Chlorine Levels

- Check water balance. Ensure pH, Total Alkalinity, Calcium Hardness and Stabilizer levels are correct.
- Check chlorine cartridge. If empty, replace following directions on the label.
- Make sure your Mineral Cartridge is not older than 6 months as it will be ineffective and more chlorine will be required to maintain the pool until you replace the minerals.
- Shock the pool [with a chlorine or non-chlorine shock] to regain clarity.

High Chlorine Levels

- Remove the FROG System from the pool until the chlorine level is down to 1.0 ppm.
- Lower the dial setting on the FROG System by 1 number and replace in the pool.
- Test in 24 hours. Repeat process until chlorine level stays within 0.5 to 1.0 ppm.

Algae

- Use an algaecide following manufacturer's directions carefully. This may involve more than one dose.
- Run circulation 24 hours a day and brush the sides of the pool often
- When clarity starts to return shock the pool

{Operational Instructions for Cartridge for Bulk Chlorinator} {All text is optional}

FROG Mineral System Operation Manual

Welcome to pool care courtesy of FROG. The FROG Mineral System will destroy bacteria to keep your pool clean with less work and up to 50% less chlorine. It is super easy to use because it fits inside your current [Hayward®] [Rainbow®] [or equivalent] chlorinator. You simply enjoy a clean, clear swimming pool without touching or counting chlorine [tablets] [pucks] again. Here's all you do:

Swimming Pool Tips

1. Make sure the pool has adequate circulation. The pool water must completely circulate through the pump and filter at least 1 to 2 times per day. This usually requires 8 to 12 hours. Check with your dealer for the proper circulation time for your pool.
2. Before beginning with any pool care program, you must first balance your pool water. Take a water sample to your local pool professional [or use a complete test kit] that will test for the following important elements.

Water Balance Guidelines	
pH:	7.2-7.8
Total Alkalinity:	80-120 ppm
Calcium Hardness:	200-400 ppm
Total Dissolved Solids:	<1500
Stabilizer/Conditioner:	20-80 ppm
Free Chlorine:	0.5-1.0 ppm

3. If your fill water is high in metals, use a sequestering agent or metal out product at start up only before using the mineral reservoir. See your local dealer for details on using these products and always follow manufacturer's directions carefully.
4. After your pool is up and running smoothly, continue to test your water for pH, total alkalinity and chlorine [with FROG Brand Test Strips] and maintain its balance by adding any necessary adjustment products (see you dealer for details).
5. Check the pool's filter gauge often and periodically clean filter per the manufacturer's directions. A dirty filter will slow the flow of water which could hamper proper circulation.

[How to replace the Pool Frog components]

[Replacing] [Using] a Pool Frog Mineral Reservoir and Chlorine Pac

1. Check the [top] [front] of the box [and [back] label of product] to make sure you have the correct Pool Frog Mineral Reservoir to fit your [Hayward®] [Rainbow®] chlorinator.

THE POOL FROG MINERAL RESERVOIR MUST BE REPLACED EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.

2. Remove the material covering the holes on the bottom [and side] of [remove the plug from the side of] the Chlorine Pac.
3. [If using Algaecide Pac. [push] [screw] [affix] algaecide [pac] [container] [bottle] [on] [in] to the [chlorinator] [adapter that attaches to the] [Pool Frog Mineral Reservoir] [while inside the

chlorinator] [then insert into chlorinator]. Replace cap, turn dial full open and run for 90 minutes. Remove algaecide [pac] [container] [bottle] and discard or recycle.]

4. Connect the Pool Frog Mineral Reservoir to the Chlorine Pac by bringing the two together, lining up the arrows and turning the chlorine pac clockwise to lock.
5. Turn off pump, turn chlorinator dial closed or off and open the cap.
6. [Lift up] [Use] the handle [and] [to] lower the complete system into the [Hayward®] [Rainbow®] chlorinator by lining up the square channel on the side of the Pool Frog Mineral Reservoir and Chlorine Pac with the dial side of the [Hayward®] [Rainbow®] chlorinator.
7. Replace the chlorinator cap. If the system is not seated properly the cap will not close. Pull up, check alignment and re-lower into chlorinator.

Channel in Pool Frog Mineral Reservoir
Dial side of [Hayward®] [Rainbow®] chlorinator

Replacing the Chlorine Pac

Chlorine Pacs will help ensure a reduction of up to 50%* in chlorine use. *Pacs sold separately.* (EPA Reg. No. 53735-2)

**Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.*

Avoid sparks, open flame or smoking when handling the pac.

1. When the chlorine pac is empty remove the entire [system] [product] from the chlorinator. Turn the chlorine pac counter clockwise to unlock it from the Pool Frog Mineral Reservoir. Simply connect a new Chlorine Pac by lining up the arrows and turning the chlorine pac clockwise until it locks.
Alignment arrows
Turn clockwise
2. [Lift up] [Use] the handle [and] [or] lower the complete system into the [Hayward®] [Rainbow®] chlorinator by lining up the square channel on the side of the Pool Frog Mineral Reservoir and Chlorine Pac with the dial side of the [Hayward®] [Rainbow®] chlorinator.

The chlorine pacs are made of HDPE plastic. Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Rinse thoroughly before recycling or discarding in trash.

Mark your calendar for the six month replacement of the Pool Frog Mineral Reservoir and approximate replacement times for the Chlorine Pacs. Once wetted, the time released mineral coating of this product is effective up to 6 consecutive months or one pool season whichever is shorter. After that time, even if you hear the spent media inside, it is no longer effective and must be replaced.

Start-up and Operation

1. Add a stabilizer or conditioner to the pool at the beginning of the season if the stabilizer level is below 20 ppm. This will prevent chlorine burn off. Follow manufacturer's directions carefully.
2. [Shock the pool with [an EPA registered chlorine shock] [a shock pac] to rid the water of all contaminants before beginning. Follow manufacturer's directions carefully.]

Do not add shock in or near the skimmer or into the chlorinator as it could damage equipment, risk potential explosion or discolor your pool surface.

THIS STEP IS VERY IMPORTANT TO START-UP. USE CHLORINE SHOCK ONLY.

3. [If using the Algaecide [pac] [container] [bottle], follow the directions for use on that product now.]
4. Install Pool Frog Mineral Reservoir and Chlorine Pac into the [Hayward®] [Rainbow®] chlorinator. See page 1 for directions.

REPLACE THE POOL FROG MINERAL RESERVOIR EVERY 6 MONTHS OR AFTER ONE POOL SEASON WHICHEVER IS SHORTER.

5. **SETTING CONTROL DIAL** Set control dial by matching up the parameters of your pool on the charts below. THIS IS A STARTING POINT ONLY and may need to be adjusted to fit your individual pool needs. See # [x] for directions.

Initial Setting Chart	
Pool Gallon Size	Setting #
10,000	#
15,000	#
20,000	#
25,000	#
30,000	#
35,000	#
40,000	#

6. For the first week test the pool water daily for free chlorine [with Frog Brand Test Strips] to ensure correct dial setting. Continue to test weekly throughout the season. After testing, adjust the dial up by ½ increment if the free chlorine reading has dropped below 0.5 ppm or down by ½ increment if the reading has risen above 1.0 ppm. Continue this process each day until the [reading stabilizes to at least 0.5 ppm.] [color on the test strip matches the ideal Frog range of 0.5 ppm to 1.0 ppm free available chlorine (FAC).] Remember to adjust dial by ½ increments only, in order to prevent over chlorination which may bleach pool surfaces.
7. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the chlorine shock treatment used.

The Sani-King P-Max VIII [Cartridge] [Pac] [Chamber] is:

Pre-filled with chlorine

Pre-filled

Pre-filled chlorine replacement [cartridges] [pacs] [chambers].

Easy to Use

Lightweight

Less Odors

Reduced odors and no touching or measuring chlorine

The easier alternative to bulk chlorine

Automatic Pool Care System

The no-hassle way to a clean pool

Now for use with P-Max VIII Cyclor Series [100 or 200] [400 or 600]

Model # [##-##-####]

The Sani-King P-Max VIII Cyclor uses pre-filled chlorine replacement [cartridges] [pacs] [chambers].

The Automatic Pool Care System uses pre-filled chlorine replacement [cartridges] [pacs] [chambers].

Saves time – chlorine lasts longer

No hassles – no contact with chlorine – the [cartridge] [pac] [chamber] contains the odor

Automatic Water Treatment Pac/Chamber

Cyclor Pac or Replacement Chamber

Replacement Pacs/Chambers

What makes this pool care system better than the rest?

- 1) Convenient: Pre-filled [cartridge] [cyclor pac] [chamber] eliminates exposure to chlorine for greater safety and convenience.
- 2) Precise: The control dial precisely meters out just the right amount of sanitation for each pool.
- 3) Longer Lasting: Trapped air in [cartridge] [pac] [chamber] keeps chlorine dry so it lasts longer with less consumed per season.
- 4) Reliable: Water cycles through only a small amount of chlorine for more uniform and reliable output.

Store in a cool, dry place

See Product Label for Directions for Use and Precautionary Statements

- Stays clean with consistent low-levels of chlorine
- [Tells you] [Let's you know] when it's empty
- Complete pool care system
- Conditions the water for spa-like softness
- Top half lasts up to 6 months (or one season)
- [Bottom half] [Chlorine] lasts about 4-6 weeks in pools up to [3000] [4000] gallons with average use or 2-4 weeks in pools up to [5000] [6000] gallons.
- Additional replacement [chlorine] cartridges sold separately
- Keeping the Pool clean has never been so easy
- Align arrows, twist and set for your pool size. [Set the cartridge per the] [See chart in] manual
- Tie off in pool away from skimmer. Product will tip over when empty.
- When empty, twist off chlorine cartridge (and recycle). Attach replacement cartridge.
- Attach new [insert color] chlorine cartridge to [insert color] mineral cartridge and set back in pool.

{All text on this page is optional copy for marketing to use in conjunction with the Pool Frog Mineral Reservoir EPA Reg. No: 53735-11}

- Low Chlorine vs. Too Much Chlorine
- Chlorine is by far the leading sanitizer used to kill bacteria in swimming pools because it works.
- But it needs to be controlled as chlorine in too high a dose can be a problem.

- Keeping the right amount of chlorine in the pool promotes comfort and enjoyment.
- The Pool Frog Mineral Reservoir's patented design manages chlorine levels in two ways.
- First, it combines low-levels of chlorine with another anti-bacteria agent – [silver ion] minerals. Together, they destroy bacteria.
- Secondly, the patented interior design of the System controls the flow of chlorine to eliminate the too-high, too-low situations.
- The result is consistent sanitation with up to half the chlorine.

- [Click] [Twist] on [to replace], [click] [twist] off [chlorine] [cartridge] [when empty]
- Easy to twist off the empty cartridge and twist on a new one
- Simply twist off the old [insert color] cartridge and replace
- [This] [Replacement] [Chlorine] [Cartridge][s] [designed for] [fits] Pool Frog Mineral Reservoir
- [Clean] [Clear] water the easy way!

- It's FROG but a leap ahead
- Mineral pool care that's a leap ahead

[Frog] [Minerals] [This] [Mineral Water] Makes Chlorine... *Better?*

Chlorine is great because, well... it works! But, sometimes there really can be too much of a good thing. Too much chlorine can be **harsh**, **fading** swimming suits and **damaging** pool equipment. So we came up with a clever (and fun) alternative – *Flippin' FROG!*

We all know chlorine does the job of keeping water clean but it's not always fun to swim in. It fades suits and pool surfaces. It smells to high heaven at times and it certainly doesn't leave your skin feeling soft. That's why we invented FROG fresh mineral water.

Flippin' FROG [uses minerals in addition to] {and/or} [creates mineral water along with] a small dose of chlorine to kill off unwanted bacteria. So, you get the benefits of chlorine, without all the negative [effects] [drawbacks]! Oh, and the minerals leave your water (and your skin) feeling soft and silky.

And no more yo-yo pH because too much chlorine can drive your pH down. A low level of chlorine [will have less effect] [keeps the pH more stable].

You probably know that chlorine is used to keep your pool clean, but [use] [put] too much [in] and it can fade bathing suits, damage pool equipment, leave a harsh smell and ruin your summer! That's why we [put minerals in] [create mineral water with] Pool Frog Mineral Reservoir. [Minerals] [Mineral water] allow[s] us to use a much smaller amount of chlorine and still kill the unwanted bacteria. You'll love the way Pool Frog Mineral Reservoir keeps your water silky soft and crystal clear all summer!

Without the [right treatment] [proper amount of the right stuff], all pools [and spas] [and hot tubs] are subject to nasty bacteria growth that causes murky water and harsh smells. But, Pool Frog Mineral Reservoir's [one-two] [combo] [punch] of minerals and low levels of chlorine [mineral water with far less chlorine] deliver a knockout blow that destroys bacteria in its tracks.

{All text on this page is optional copy for marketing to use in conjunction with the Pool Frog Mineral Reservoir EPA Reg. No: 53735-11}

On the other hand, if you treat your pool with too much chlorine, it won't be long before the kids are complaining that the water doesn't feel good and it stinks! And to add insult to injury, uncontrollable variables like outdoor temperature, swim usage, the length of the season, and rainy weather mean varying pH levels that need constant balancing.

But, we're guessing you didn't buy an [above ground] [pool] [spa] [hot tub] to become an expert in pool chemistry. You just want clean, clear water without all the fuss. We intimately know this because we're pool owners, too! That's why we invented Pool Frog Mineral Reservoir [Frog] [fresh] [mineral water].

Pool boys have been really getting fresh lately.
Refresh yourself.

{All text on this page is optional copy for marketing to use in conjunction with the Pool Frog Mineral Reservoir EPA Reg. No: 53735-11}

Get refreshed

Good clean fun - with a splash.

Why have a chlorine pool when you can swim in fresh mineral water.

Get fresh in your pool with fresh mineral water

Refreshingly [easy] [clean] [clear] [comfortable] [enjoyable]

Nice [pool] [spa] [hot tub]! Can we freshen that up for you?

Buying the pool was easy. Shouldn't taking care of the pool water be just as easy?

"Don't you hate it when you're all ready to have some fun in your pool – it's a beautiful sunny day, and the kids are all set to jump in – only to find that bacteria and algae have taken over, leaving the pool green, cloudy and too dirty to swim in. Talk about a kill joy."

We have two words to share with you – Flip Plop - the "almost too easy" way to keep your water crystal clear all summer long – from *Hey! Cool Pool*. How easy is it you ask? Well, you simply plop it in the pool and it goes to work on nasty bacteria and other things that make water cloudy, murky or worse. When it flips over it's time to replace the bottom cartridge. Then plop it back in.

Where most pool floaters use 100% chlorine, Flip Plop uses minerals, leaving you with fresh mineral water that feels softer without fading swimsuits, damaging pool surfaces or creating smelly odors. Having a mineral water pool means you're not swimming in a [chlorine] [chemical] bath like most pools. Mineral water also maintains its balance better meaning less work and greater comfort for swimmers.

This EPA registered product for water care, without all that chlorine, has been sold in larger pools for over 15 years. Now, pools as small as [1000] [2000] gallons can experience the mineral water difference.

Here's how it works. There are two cartridges. The top [insert color] cartridge provides mineral water all summer long. The [insert color] cartridge will deplete every 3-4 weeks. Simply connect the two cartridges by lining up the arrow with the unlock symbol. Then you twist to the setting that's right for your pool. There's a helpful chart in the manual with a setting for every pool size. Then plop it in the pool.

You'll know when to replace the bottom cartridge when the product flips over and the [insert color] side is up. Simply twist the top back to the unlock symbol and pull apart. Recycle the empty cartridge and lock in a new one. At the end of the summer, if the bottom cartridge still contains some ingredient, wrap in a plastic bag and store in a cool dry place for the winter. Discard the top cartridge as it is spent once removed from water (or after six months whichever comes first). Start fresh with a new system next summer.

With thousands of pool owners enjoying the benefits of fresh mineral water, we want to encourage you to take the [Flip Plop] [Flippin' FROG] challenge. Try it in your pool for 30 days and see if you don't experience softer, clearer water with less work! Then you too will be a believer in mineral water!

Enjoy clearer water with less work

Flip Plop is available at most Walmart stores around the country. Visit our website at HeyCoolPool.com to learn more and find a retailer in your area.

Fresh-Water Fun!
Keeps water looking and feeling fresh!
[Using] [Uses] minerals to keep water looking [sparkling clean] and feeling fresh
If you just bought a[n] [above ground] pool, you NEED [this] [Pool Frog Mineral Reservoir] to make it work properly.

Chlorine is chlorine is chlorine. Everyone knows what it is and what it does. That doesn't mean everyone loves it! It's like taking medicine when you're sick. You want to get better so you take it but you hold your nose and swallow quickly in an effort to just to get it over with. Using chlorine is a little like that. It's assumed that's what you do if you own a pool or [spa] [hot tub]. You put gloves on before using then hold your breath and hope you don't spill any on your clothes! Each time you ask yourself, is there another way to do this?

There is another way. It's called fresh mineral water and it will change the way you feel about your pool or [spa] [hot tub]. Mineral water is easy on [skin] [suits] , helps protect surfaces and equipment and makes smelly pool or [spa] [hot tub] odors a thing of the past. Mineral water is refreshing and inviting because the level of chlorine in the water is greatly reduced.

Instead of a chlorine only treatment method, mineral water is a chlorine [enhancement] [alternative]. It takes what chlorine does like kill bacteria and provides what chlorine can't – soft water that's more enjoyable to swim and soak in

While chlorine has been a proven disinfectant in swimming pools and hot tubs since the 1920s, if left unchecked, it has a reputation for harshness. Anyone who has ever taken a dip in overly chlorinated water can tell you a few things about how it leaves their skin, their suits and the damage it can cause to surfaces or equipment. Most people say, "Oh well, that's just what you have to do, right?"

Wrong! There is [an alternative] [a better way] [an easier way] that cuts chlorine use up to 50% so water feels silky soft without bleaching swimming suits and with far less of those smelly odors! We call it mineral water because it uses minerals to keep the water fresh and clean. The end result is sparkling water that feels as good as it looks with far less chlorine!

Water feels silky soft without bleaching swimsuits or damaging surfaces

We call it a chlorine [enhancement] [alternative] because when used with the EPA registered mineral formula, a low level of chlorine finishes the job without all the drawbacks. Your pool or [spa] [hot tub] experience is enhanced [with] [through] water that's clean and fresh with up to 50% less chlorine!

Fresh mineral water is only available in FROG brand products by King Technology, Inc. For [more than 15] [many] [years] [decades] we have [been helping] [helped] hundreds of thousands of people relax and enjoy their pool or [spa] [hot tub].

Your Grand Mother thought using [all] [only] [just] chlorine was good
Frog Fresh Mineral Water is better than [all] [only] [just] chlorine
[Nothing but] [Just] [All] chlorine used to be the best thing but now there's Frog Fresh mineral water

Your Grandmother used [all] [only] [just] Chlorine. We know you love her, but [it's] time for a change

Using chlorine alone has its drawbacks like faded swimsuits and smelly odors but not with Fresh Mineral Water
Time for the [all] [just] chlorine [only] challenge
Why not go Frog Fresh Mineral Water for a change
Replace your all chlorine pool with a Fresh Mineral Pool
Replace your "all chlorine pool" with Fresh Mineral Water

Water starts out fresh. Minerals help keep it fresh by destroying bacteria along with a low level of chlorine or bromine. This fresh approach [to water care] [is mineral water that] creates a pool or [spa] [hot tub] experience of relaxation and fun. Your skin feels fresh and clean – not sanitized. Your suits stay bright and fresh and your pool or [spa] [hot tub] investment lasts longer by maintaining its fresh new look. Refresh your thinking about [pool] [or] [spa] [hot tub] water [care] with the proven, problem-free, EPA registered mineral water systems from FROG.

Flippin' FROG – Fresh Mineral Water for pools up to [3000] [4000] [5000] [6000] [8000] [10,000] gallons. Simply floats in the pool and flips over when empty. Another repeat sale opportunity from FROG!

FROG Test Strips – The only way to ensure [fresh mineral water with lower] [the proper] chlorine or bromine levels [for FROG mineral water products] with the ease of Dip and Read! Tests for pH and Total Alkalinity too!

Mineral Water Test Strips
Fresh [mineral] water – clean, clear
Fresh feeling – soft not harsh
Fresh ingredients – not the same old chlorine but minerals

Fresh ideas – why use chlorine alone when minerals and 1/2 the chlorine is so much better
Fresh approach - no touching, smelling or measuring chlorine
Fresh thinking – Frog's got it covered. I can relax and enjoy

Amazing product helps you get in (and out) of your above ground pool with ease.
This system takes cleaning your pool or [spa] [hot tub] to a whole new level
Responsible moms use FROG
It's mom friendly

[The] [An] "All" chlorine alternative [that works]
Say no way to "All" chlorine
Say no to "All" Chlorine

For [above ground] [in ground] pools [15' to 21' in diameter] (5000 to 10,000 gallons)

Simply [pull] [snap] off the old cartridge and replace
Easy to replace chlorine cartridge – snap in, push the tabs to release

This mineral water solution has worked on big pools for over 15 years
Now you can get this proven effective pool care method for Intex style pools as small as 2000 gallons
Mineral water helps reduce the monitoring and adjusting you need to do to keep your water at the right balance.

It is not your old fashioned chlorine floater. Flippin' Frog provides a tested and EPA registered alternative to chlorine alone.
Mineral water cuts back on the use of and exposure to chlorine because everything is pre-measured and pre-filled. No daily fussing with adding chlorine by hand.

The [key] [secret] [to Frog's success] is fresh mineral water that handles tough bacteria, creates a soft feel and a crystal clear shine – all with a minimal amount of chlorine added.
Mineral water has far less chlorine in it than standard pools
Experience refreshing mineral water that's easy on skin, helps maintain pool surfaces and makes pool care easy!

It all adds up to more fun for you and your family.
Mineral water feels as good as it looks because it's fresh not harsh
It eliminates bacteria a whole different way – with a lot less chlorine

It's easy on your clothes and easy on your nose.
Hey! When your water smells like chlorine you smell like chlorine
And unlike salt pools, it doesn't corrode metal or eat stone

{All text on this page is optional copy for marketing to use in conjunction with the Pool Frog Mineral Reservoir EPA Reg. No: 53735-11}

Why settle for ordinary water when you can have fresh mineral water – easy.

Mineral water protects your pool or [spa] [hot tub] investment because it's easier on surfaces

Just fresh mineral water – soft and crystal clear as a mountain stream

A strong chlorine odor does not smell fresh

Frog Leap Pool Wake Up! / Pool Hibernation is a 3 step convenience pack for opening pools [in the spring] or closing pools [in the fall].

- Depth Charge is a non-chlorine shock that rids the water of contaminants
- Reveille is a chlorine shock that sets the chlorine residual in the pool
- All-Out is a 90 day algae preventative that is guaranteed to protect the pool against algae

Start by describing Fresh Mineral Water and the benefit of more fun times because:

Fresh Mineral Water feels softer and looks crystal clear.

Fresh Mineral Water doesn't fade suits or damage pool surfaces.

Fresh Mineral Water keeps the pH in line with less monitoring.

Fresh Mineral Water uses far less chlorine than standard pools.-

And Fresh Mineral Water is not corrosive like salt systems.

In short, Frog Fresh Mineral Water is less hassle, allowing you to spend more time with family and friends.
