1101 17th Street N.W. Suite 500
Washington D.C. 20036

SUBJECT: June 22, 2005 Amendment
Spa Bromine Disinfectant
EPA Registration 53735-10

Dear Ms. Bjornson:

The application for amendment referred to above, submitted in connection with registration of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable with the following conditions:

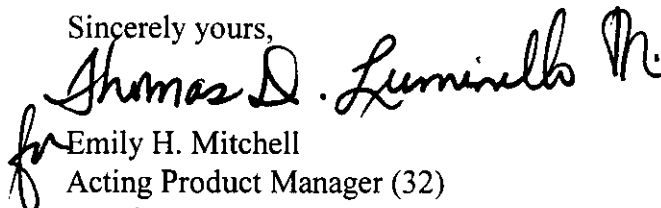

- You must line up the decimal points for the percentages of ingredients. In addition, the active ingredient and other ingredients must be given equal prominence. Therefore, you must remove the underline on active ingredient or add one to other ingredients.
- At the bottom paragraph of page 2, revise the second sentence to read "Spa water temperature not to exceed 102°.
- At the second to last sentence of third paragraph on page 3, revise the sentence to read "Spa water temperature not to exceed 102°".
- Modify the requested changes on page 3 to read "establish a bromine residual of 1.0 to 2.0 ppm in the spa by following the directions of that product before using cartridges."
- Certification regarding Child-Resistant Packaging and Compliance with the standards of 40 CFR 157.32 including the revised effectiveness standards in 16 CFR 1700.15(b), and the revised testing procedures in 16 CFR 1700.20 as published in 60 FR 37710 (July 21, 1995) must be submitted for your 200 grams package. Your certifications must include a statement describing the type of packaging used and its designation using the American Society for Testing and Materials (ASTM) Standard D3475-95 "Standard Classification of Child-Resistant Packages".

2/7

Your request to add certain language to the label has been modified in accordance with the source product. Your request to add the Evaporative Cooler use is approved.

A stamped copy of the conditional label is enclosed. You must submit a finished copy of this revised label for our files. Please submit the requested materials with 60 days of your receipt of this letter. If you have any questions regarding this letter, please contact Tom Luminello of my staff at (703) 308-8075.

Sincerely yours,

Thomas D. Luminello

FIRST AID: If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advise. If Swallowed: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

Product Description: {Canister} When used as directed SPA BROMINE DISINFECTANT is effective as a residential spa and hot tub water sanitizer and disinfectant.

AUG - 9 2005

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No.

Directions For Use: {Canister}

It is a violation of federal law to use this product in a manner inconsistent with it's labeling. Read entire label to use strictly in accordance with precautionary statements and directions.

53735-10

Ensure all spa equipment is working properly. Clean filter following manufacturer's directions. Adjust pH between 7.2 – 7.8 and total alkalinity to 60 – 120 ppm. When using other products as outlined in directions for this product, always follow directions on those products.

Place this product in spa and let it float freely in spa or hot tub. Under normal use conditions, use one dispenser per 350 gallons of spa or hot tub water. However, under heavy bather loading or reduced water circulation, additional dispensers may be used to maintain constant active bromine residuals of 2-4 ppm in residential spas or hot tubs. To increase the bromine residual, turn the rotating cap to a higher number located in the flow indicator window. To decrease the bromine residual, turn the rotating cap to a lower number in the flow indicator window.

To a freshly filled spa or hot tub, begin with an indicator setting of # 5. Check bromine residuals frequently. When 2-4 ppm bromine residual is obtained, lower the indicator setting to maintain constant recommended bromine residuals.

water

The pump and filter should be operated for at least three hours a day. Spa temperature recommended at 102° but not to exceed 104°. Keep the spa free of leaves and debris.

5/7

Residential spas and hot tubs should be drained and filled with fresh water periodically. See your spa manufacturer's directions.

Product Description: {Cartridge} Use this SPA BROMINE DISINFECTANT Cartridge in either the Inline Spa System, the Floating Spa System or as a free-floating sanitizer. When the SPA BROMINE DISINFECTANT Cartridge is used as directed, spa care is easy and spa water is crystal clear and odor free.

Directions for Use: {Cartridge} It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label to use strictly in accordance with precautionary statements and directions.

Ensure all spa equipment is working properly. The pump and filter should be operated for at least 3 hours per day. Clean filter following manufacturer's directions. Adjust pH to between 7.2 – 7.8 and total alkalinity to 60 – 120 ppm. When using other products as outlined in directions for this product, always follow directions on those products. Spa temperature ~~recommended at 102°~~ but not to exceed 104°. Keep the spa free of leaves and debris. *water X*

{One of the following statements will appear on the label}
[Residential spas and hot tubs should be drained and filled with fresh water periodically. See your spa manufacturer's directions.] [To maintain clear, clean water and insure performance of your spa or hot tub chemicals, water should be drained and spa or hot tub refilled with fresh water periodically or as per spa manufacturer's instructions.] [Residential spas and hot tubs should be drained and refilled with fresh water every 60 days or as per spa manufacturer's instructions.]

Using the Inline Spa System: *by following directions of that product* With a freshly filled spa establish a bromine or chlorine residual of 1.0-2.0 ppm in the spa before using cartridges. For the first 24 hours, set the SPA BROMINE DISINFECTANT Cartridge at #3 by holding the bottom and turning the top until the number 3 appears in the setting window. To install: open cap of Inline System, push down and turn cartridge holder counter-clockwise to unlock. Pull holder out. Snap cartridge into "Bromine Only" section. Make sure to line up indent on cartridge with raised line on holder. After cartridge is snapped in, replace holder by lining up arrow on holder with arrow on system lip, push down and lock in place. Replace cap. Initially monitor bromine levels daily until a 2-4 ppm residual is achieved. Remove and adjust cartridge to maintain bromine levels depending on spa size and use. ***

Using the Floating Spa System: *by following directions of that product* With a freshly filled spa establish a bromine or ~~chlorine~~ residual of 1.0-2.0 ppm in the spa before using cartridges. For the first 24 hours, set the SPA BROMINE DISINFECTANT Cartridge at #5 by holding the bottom and turning the top until the number 5 appears in the setting window. To install: push the cartridge into the bottom opening of the Floating Spa System. Set entire system in the spa water. Initially monitor bromine levels daily until a 2-4 ppm residual is achieved. Then adjust to maintain bromine levels depending on spa size and use. ***

Using as a Free Floating Sanitizer: Set cartridge as described for the Floating Spa System and allow to free float in spa.

FOR ALL USES: Adjusting to a higher setting will increase the bromine output while a lower setting will decrease it. When empty follow disposal instructions and replace with a new Spa Bromine Disinfectant Cartridge.

REENTRY into treated spas is prohibited above levels of 5 ppm available bromine as measured by a suitable test kit due to risk of bodily injury.

{Optional language for 200-gram cartridge}

[For in-Line System Use Only]

[Use this Spa Bromine Disinfectant Cartridge in the In-line Spa System ~~ONLY~~]
[DO NOT use this cartridge with the Floating Spa System.]

53735-10

Product Description: {Evaporative Cooler}. When used as directed, this product effectively controls algal, bacterial and fungal slimes in evaporative coolers.

Directions for Use: {Evaporative Cooler} It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label to use strictly in accordance with precautionary statements and directions.

Shut off water to evaporative cooler. Secure new Bromine Disinfectant Cartridge to water supply line leaving the preset output window at setting #1. Make sure the water supply is attached at the top of the Bromine Disinfectant Cartridge and that both water delivery lines are attached at the base of the container. Turn water on and ensure there are no leaks.

Maintain a 1-3 ppm bromine residual for at least four hours treatment. Repeat throughout the cooling season. A new Bromine Disinfectant Cartridge should be inserted at the beginning of the cooling season and replaced when empty thereafter. See Evaporative Cooler manufactures directions on adjusting amount of drainage water and water cycle times for the Evaporative Cooler.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve material before discarding this container. Do not contaminate food or feed by storage and disposal.

CONTAINER DISPOSAL: Do not reuse container, but place in trash collection. Rinse thoroughly before discarding in trash.

7/7

{Clear Child Resistant Outer Sleeve}

EASY DIRECTIONS: {Canister}

- 1) Twist cap to setting #5.
- 2) Put chemical dispenser in spa water.
- 3) Test bromine residual frequently (approx. every 2 hours).
- 4) Upon achieving 2-4 ppm REDUCE TO MAINTENANCE SETTING #1-#2 for maximum longevity.

TO ADJUST SETTING: {Canister}

- 1) For ease of adjustment place in water.
- 2) Grip cap firmly in one hand.
- 3) With other hand, grip below windows firmly. (Fingers should grip only bottom of canister.)
- 4) Turn cap and outer sleeve in opposite directions.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Highly Corrosive. Causes eye and skin damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses and rubber gloves when handling product. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

Note: Buyer assumes all responsibility for safety and use not in accordance with directions.
