

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS: This product may only be used to control pocket gophers (*Geomys spp.*, *Thomomys spp.*, and *Pappogeomys spp.*) in subterranean applications only in rangelands, pastures, croplands, and no-crop areas. Do not apply this product by use of a mechanical burrow builder. Do not apply this product above ground over agricultural crops or anywhere else. Do not apply directly to food or feed crops.

BAITING: Remove burrow plug from flat side of the burrow fan or locate the main runway by probing with a metal rod or wooden stick. Resistance on the probe will decrease when you are in the main runway. Insert one tablespoon of bait into the burrow system, using a long-handled spoon if necessary. Close the tunnel with soil. Do not permit soil to cover the bait. One pound of bait will treat 1-8 acres, depending on the number of burrow systems to be treated. Retreat according to above directions if new gopher activity is noticed.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in original container in a dry place. Store in a locked area out of reach of children.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Do not reuse empty container. Empty container through use according to label instructions. Then dispose of container in a sanitary landfill or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Convulsive Poison! Poisonous if swallowed. Do not breathe dust. Do not contaminate feed and food stuffs. Keep away from children, pets and domestic animals. Wash thoroughly with soap and water after handling and before eating or smoking. Clean clothing should be used daily. Do not touch bait with bare hands. Applicators and other handlers must wear a long-sleeved shirt and long pants, water-resistant gloves, shoes plus socks, and dust mask. This product is to be used only for subsoil application as directed.

FIRST AID

If swallowed, CALL A PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY. If less than ten (10) minutes have passed since the poison was taken, give 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Have patient lie down in quiet, darkened room and keep warm and quiet. Do not induce vomiting or give anything by mouth to an unconscious person. If inhaled, remove victim to fresh air. Apply artificial respiration if indicated. If on skin, remove contaminated clothing and wash affected areas with soap and water. If in eyes, flush eyes with plenty of water. Get medical attention if irritation persists.

NOTE TO PHYSICIAN:

- A. Administer 100% Oxygen by positive pressure to provide as much pulmonary gas exchange as possible despite seizures.
- B. Administer ANTICONVULSANT DRUGS intravenously to control convulsions.

NOTICE: It may be difficult or impossible to stop the seizure activity without stopping respiration. Be prepared to maintain pulmonary ventilation mechanically. Tracheotomy may be necessary if seizures are prolonged.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Do not allow bait to be exposed on soil surface. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes.

ENDANGERED SPECIES CONSIDERATIONS - Notice: The killing of a member of an endangered species during strychnine baiting operations may result in a fine under the Endangered Species Act. Before baiting, the user is advised to contact the Regional U.S. Fish and Wildlife Service (Endangered Species Specialist) of the local Fish and Game Office for specific information on endangered species. Strychnine baits should not be used in the geographic ranges of the following species except under the programs and procedures approved by the U.S. EPA: California Condor, San Joaquin Kit Fox, Aleutian Canada Goose, Morro Bay Kangaroo Rat, Salt Marsh Harvest Mouse, Gray Wolf, and Grizzly Bear.
