**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Observe all precautions listed under "Precautionary Statements" when handling and using this product. Concorde P-960 is a micromilled powder. Use Concorde P-960 at rates of 0.025% to 1.6% (wt/wt) depending upon the product to be protected, the fungal potential, and the duration of protection desired. It is the responsibility of the formulator to test Concorde P-960 for optimum dosage levels and to determine compatibility and suitability for the intended use. This product must not be formulated into a product intended as a mildewicidal paint additive designed for direct sale to retail consumers, e.g., in a 'pillow pack' or other small volume or one-use package.

This product may only be added to paint products that are labeled: A) with product specific instructions for the use of a respirator during application, or B) as follows "When applying with a sprayer, wear a dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C), or a NIOSH approved respirator with any R, P, or HE filter. If oil is not present in the paint product or recommended for use as an additive in the paint product add "N" as an additional respirator type."

**LATEX EMULSION PAINTS, STAINS AND COATINGS**

For exterior paints, stains, and coatings: 4 to 10 pounds of Concorde P-960 per 100 gallons will normally provide sufficient surface protection against mold and mildew growth.

Interior paints, stains and coatings: 2.5 to 5 pounds of Concorde P-960 per 100 gallons will normally provide sufficient surface protection against mold and mildew growth.

Use higher dosage rates in areas more favorable to mildew growth. Dispersion is readily accomplished during the pigment grinding operation. Concorde P-960 may be used in coatings containing zinc oxide. Concorde P-960 **MAY NOT** be used for food grade coatings.

**SOLVENT-BASED EXTERIOR PAINTS, STAINS, AND COATINGS**

**WOOD PRESERVATIVE STAINS**

Use Concorde P-960 the rate of 5 to 12 pounds per 100 gallons, depending upon degree of fungal potential and duration of protection desired. Dispersion is readily accomplished during the pigment grinding operation. It is the responsibility of the formulator to obtain end-use product registrations and to determine suitability of Concorde P-960 for this use.

**GROUTS**

Add Concorde P-960 to dry grout at 0.4 to 1.6% by weight during the dry blending process (e.g. 0.4 to 1.6 pounds of Concorde P-960 per 100 pounds of dry grout blend. Sufficient care should be taken to prevent dusting during the handling and use of this product.
