Dear Ms. Bosarge:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. ### **APPLICATION INSTRUCTIONS**

**WASPS AND HORNETS:** Hold container in upright position. Stand at a safe distance, 6 - 15 ft from the nest, and not directly underneath. Align [nozzle valve][value actuator] opening with the mark on the valve cup. Aim the [nozzle valve][value actuator] opening toward the nest with the wind at your back. Treat the nest until thoroughly wet. Contact wasps and hornets on the nest with spray when possible. The best time of day to treat is in evening or early morning, since wasps and hornets congregate on or in the nest at night.

**YELLOWJACKETS AND BEES:** Locate nest. Align [nozzle valve][value actuator] opening directly opposite the mark on the valve cup. Press down on the actuator and apply, using a sweeping motion, contacting any

stimulated or stirred-up yellowjackets and bees around the nest opening. Then move forward to the nest opening and apply for 6 - 8 sec directly into the nest hole.

**SPIDERS (including Black Widow and Brown Recluse):** Apply directly to spiders and/or webbing. Before applying, consider the surfaces that spray may contact if concerned about potential staining.
