Subject: Notification per PRN 98-10 – Adding Optional Marketing Claims
Product Name: CSI 19-313H2 Glufosinate + Imazapyr Low Load
EPA Registration Number: 53883-504
Application Date: 09/29/2023
Case Number: 486678

Dear Lisa Adamson:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

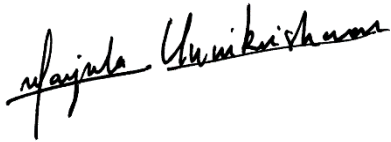

The label submitted with the application has been stamped “NOTIFICATION” and placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to plants. Drift and run-off may be hazardous to plants in water adjacent to treated areas. **DO NOT** apply to water except as specified on the label. Treatment of aquatic weeds may result in oxygen depletion or loss due to decomposition of dead plants. **DO NOT** treat more than one half the surface area of the water in a single operation and wait at least 10 to 14 days between treatments. Begin treatment along the shore and proceed outward in bands to allow aquatic organisms to move into untreated areas. **DO NOT** contaminate water when disposing of equipment, washwater, or rinsate. See Directions for Use for additional precautions and requirements.

User Safety Recommendations

Users should:

- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

NON AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. The application for trimming and edging, industrial, recreational and public areas, and farmsteads are not within the scope of the WPS.

What does the product do?

[This product] kills and prevents regrowth of unwanted weeds, grasses and plants for up to one year. Use this product to kill unwanted vegetation on driveways, walkways, parking areas, sidewalks, patios, gravel areas, rock landscapes, under fences and around curbs. Use in areas where no vegetation growth is desired for up to 1/one year. {Note to reviewer: at final printing one or the other (1/one) will be used} [Product name] [This product] starts working as soon as it contacts the plant and weeds begin to turn yellow and wilt within 3-5 days. Complete kill occurs in 1 to 2 weeks.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Shake well before use.

USE RESTRICTIONS

- **DO NOT** enter or allow others to enter treated areas until spray has dried.
- Keep people and pets out of the area during application.
- Only the person applying this product may be in the area during application.
- **DO NOT** (mix, store or) apply with (in) a galvanized or unlined steel (except stainless steel) sprayer, or apply through any irrigation system.
- Only apply to areas where no vegetation is desired for 1/one year. {Note to reviewer: at final printing one or the other (1/one) will be used}
- **DO NOT** apply to or allow product to drift onto desirable vegetation.
- **DO NOT** use on lawns, on or around vegetables, fruits, flowers, shrubs, trees, or over root zone of shrubs or trees.
- **DO NOT** apply next to a fence if desirable vegetation is growing on the other side, or if future planting is intended.

- **DO NOT** apply over or around the root zone of desirable plants.
- **DO NOT** apply over their root systems.
- For shrubs and trees, **DO NOT** apply closer than twice the distance from the trunk to the drip line as roots may be within this area.
- **DO NOT** attempt to treat more than 300 sq ft.
- **DO NOT** apply near bodies of water; including, fish pools, ponds, lakes or streams.
- **DO NOT** apply this product by aerial application.
- **DO NOT** apply to sloped areas as movement on soil surfaces may damage desirable plants down slope.
- **DO NOT** apply before planting any desirable plant because this product remains active in the soil for up to 1[one] year.
- **DO NOT** allow grazing of vegetation treated with this product.
- **DO NOT** apply to powdery, dry or light sandy soils when the soil may be blown by wind. If necessary soil surface must be settled by rain or irrigation.
- In the State of New York only: Not for use in Nassau and Suffolk counties.
- **DO NOT** exceed 7.2 fl.oz. (0.0264 lbs. glufosinate-ammonium, 0.0018 lbs imazapyr) per 300 sq.ft. per single application / per year .
- **DO NOT** apply more than once a year per 300 sq. ft.
- **DO NOT** apply this product to residential areas as other than a spot or directed spray.
- **DO NOT** apply near bodies of water including, fish pools, ponds, lakes or streams.

WHERE TO USE

Use outdoors on residential driveways, walkways, parking areas, sidewalks, patios, gravel areas, rock landscapes, under fences and around curbs.

AMOUNT TO USE:

For General Annual Weed Control:

- Add 3-6 fl. oz. (0.011-0.022 lbs. glufosinate-ammonium, 0.00075-0.0015 lbs imazapyr) (6 to 12 TBS) per gallon of water over a total of 300 ft² applied as spot or directed spray applications. Use the higher rate for larger weeds. Use lower rate for easy to kill weeds for example (small) seedlings.

For Brush, Vines, Woody Plants, Perennials and other tough established weeds:

- Add 6-7 fl. oz. (0.022-0.029 lbs. glufosinate-ammonium, 0.0015-0.002 lbs imazapyr) (12 to 16 TBS) per gallon of water over a total of 300 ft² applied as spot or directed spray applications. Use the higher rate for larger, well established vegetation.
- Vines: If vines are growing up poles, fences or tree trunks with mature bark, cut vines to a height of 3 to 4 feet and spray vines thoroughly. If vines are climbing shrubs or trees with green bark, cut vines at base and treat as directed for stumps or spray regrowth. Shield shrubs and tree trunks from spray drift with a sheet [piece] of cardboard or plastic.
- Poison Ivy & Poison Oak: Spray anytime plants are actively growing, but at least 4 weeks before the first killing frost in the fall. Handle dead plants with rubber gloves.
- Kudzu: For best results, apply in mid to late summer when vines are mature and actively growing.
- Wild Blackberry: Spray anytime plants are actively growing. Dead canes need to be cut down and removed.
- Stumps: Cut living stump close to ground. Drive [drill] 4 to 5 holes into freshly cut stump. Immediately pour undiluted product into holes.

- No agitation is needed.
- Spray to thoroughly cover foliage, but avoid spray run-off.
- For best results, apply on warm days in bright sunlight.

MIXING INSTRUCTIONS

Pump-Up Sprayer:

Use a plastic, fiberglass, plastic-lined steel or stainless steel sprayer. **DO NOT** mix, store or apply in a galvanized or unlined steel sprayer/container.

Add specified amount of product to the sprayer then add water to make 1 gallon.

1 gallon of finished spray treats up to 300 sq ft of area.

Clean sprayer after use. Rinse sprayer and all sprayer parts with water 3 [three] times. Spray rinse water on bare soil or gravel.

HOW TO SPRAY

- Apply as a spot or directed spray application to weeds, grasses and any undesirable vegetation.
- Spray the plants you want to kill until they are thoroughly wet.
- If desirable plants are accidentally sprayed, rinse off immediately with water [or cut off treated area].

IMPORTANT: DO NOT spray plants or grasses you like because they will die. Not advised for spot weed control in lawns since this product kills lawn grasses, for up to 1/one year *{Note to reviewer: at final printing one or the other (1/one) will be used}*.

WHEN TO APPLY

Apply when weeds are actively growing. [Use anytime weeds and grasses are actively growing.] For best [fastest visual] results, apply during warm, sunny weather [above 60° F] [to accelerate systemic movement of the product from foliage to roots.]

Apply when air is calm to prevent drift to desirable plants.

RAINPROOF Protection: Rain or watering 4 hours after application will NOT wash away effectiveness. [Apply when weeds are small and before seeds form. Established (Hard to kill) weeds may require a repeat application.]
