TERM OF ISSUANCE

NOTICE OF PESTICIDE:

REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Chlorinating Care Sticks

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Carefree Chemical Company
A Division of Nautilus Industries, Inc.
15041 Computer Lane
Burlington Beach, CA 92604

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A), provided that you:

1. Submit to the Agency the data required for registration, for registration of your product in a FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 53892-8" to your label before you release the product for shipment.
3. Submit to the Agency (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 3(c). Your release for shipment of the product constitutes acceptance of these conditions.

A copy of the final label is enclosed for your records.

CHLORINATING CARE STICKS™

Active Ingredient
Trichloro-s- Triazinetrione 89%
Inert Ingredients 15%
Available Chlorine 89%

**KEEP OUT OF REACH OF CHILDREN
DANGER:**

See First Aid Statement and Additional
Precautions on back panel.

Net Weight  lbs.

For use in swimming pools and hot tubs. Do
not add directly into pool. Avoid metal
objects. Use only in summer or heater
which has been thoroughly cleaned. Do
not mix with other chemicals in summer
or heater.

DIRECTIONS FOR POOL USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
"Constant Chlor" concentrated pool chlorinating sticks containing 89% available chlorine, are designed
to dissolve slowly and provide a steady source of available chlorine in swimming pools. Sticks control
growth of algae and effectively kill many bacteria, thus helping to keep the pool in a sanitary condition.
One stick weighs approximately 8 ounces. If any chlorine residual is present, it is possible to increase the
residual in pool water by approx. 5 ppm by using one stick per 10,000 gallons of water.

For best results, place "Constant Chlor" sticks in the feeder following the manufacturer's directions or into
a dissolving bucket, floating container or the plastic leaf strainer of the surface skimmer. Do not permit
sticks to contact plastic pool lining or metal objects. Do not throw sticks directly into pool.

START UP

In a clean pool with no visible algae, bring chlorine residual to a 1.0-1.5 parts per million (ppm) as follows:

1. For each 10,000 gallons of water, put one "Constant Chlor" stick (approx. 8 oz.) in a plastic leaf strainer
in the surface skimmer.
2. Run pump and filter until totally dissolved (approx. 4 days). An alternate method is to use "Constant
Chlor" Super Chlorinator and Shock Treatment for start up. Follow label directions.
3. Test for chlorine residual using a suitable test kit.
4. If chlorine residual is below 1.0 ppm, add one "Constant Chlor" stick per 10,000 gallons. Wait until
dissolved and check residual. Pool can be used when residual is between 1.3-3.0 ppm.
5. The day after the pool's chlorine residual reaches 1.0-1.5 ppm use dynamic pool maintenance routine. Follow
label directions. Adjust pH to the ideal range of 7.2-7.6.

An alternate procedure is to use "Constant Chlor" concentrated pool chlorinating granules to achieve
an initial chlorine residual of 1.0-1.5 ppm. Follow label directions for start up and then follow Step
5 above.

REGULAR CARE

Place "Constant Chlor" concentrated pool sticks in feeder following feeder manufacturer's directions.
Alternatively, place one "Constant Chlor" stick (approx. 8 oz.) in a summer or heater for each 10,000
gallons of water each week, or as needed to maintain the pool's chlorine residual from 1.0-1.5 ppm.
Run pool pump until sticks are completely dissolved.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a
cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Use
empty container thoroughly with water to dissolve all material before discarding. Place in trash can
or dispose in approved landfill area or bury in a safe place. **EMERGENCY HANDLING:** In case
of contamination or decomposition, do not reuse container. If possible, isolate container in open and
well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an ap-
proved landfill area or bury in a safe place.

HUNTINGTON BEACH, CA 92649

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get wet or
on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves
and only thoroughly clean, dry utensils when handling. Inhaling to nose and throat. Avoid breathing
and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID - (PRACTICAL TREATMENT):

If swallowed, Feed large amounts of milk and/or water and induce vomiting. Call a physician immediately.
If on Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation
persists, get medical attention.

If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.

If inhaled: Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS:

DANGER: Strong oxidizing agent. Use only clean, dry utensils. Mix only into water. Contamination with
moisture, dirt, organic matter or other chemicals (including other pool chemicals) or other foreign matter
may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation
of fire and explosion. Avoid any contact with flammable or burning material, such as a lit cigarette. Do
not use "Constant Chlor" sticks in any chlorinating device which has been used with any inorganic or unsta-
bilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion. Do
not permit sticks to contact plastic pool linings or metal objects. Do not throw sticks directly into pool.

ENVIRONMENTAL HAZARD:

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in
accordance with an NPDES Permit. For guidance contact the regional office of EPA.

ADDITIONAL POOL CARE RECOMMENDATIONS:

pH - Maintaining pH in ideal range of 7.2-7.6 is extremely important to the efficacy of your chlorine and
swimming comfort. Test for pH often with a suitable test kit. Adjust pH as necessary.

Superchlorination - Superchlorination with "Constant Chlor" pool care products such as "Constant Chlor" Super
Chlorinator & Shock Treatment is recommended to burn out algae and bacteria. Your filter can't handle
and keep your water sparkling clear. Use as directed on the label, especially during excessive heat. After
bathing loads are high, when water becomes dull, cloudy or hazy, when there is a "chlorine" like smell or
excessive eye irritation, or after heavy rain.

Shock Treatment - If a green algae appears, shock (treat) your pool with a calcium hypochlorite product such as
"Constant Chlor" Super Chlorinator & Shock Treatment. Follow label directions. An alternate method
is to put two "Constant Chlor" sticks (approx. 16 oz.) in the summer for each 10,000 gallons of water. Run
pump and filter until totally dissolved (approx. 4 days). Thoroughly clean pool by scrubbing surface of
algae growth, vacuum and cycle through filter. Pool should not be used until chlorine residual drops to
1.0-3.0 ppm.

10 DETERMINE POOL CAPACITY

Rectangular Pool: Multiply length x width x average depth x 7.5 = pool capacity (U.S. gallons)
Round Pool: Multiply radius (to diameter) x radius x average depth x 2.5 = pool capacity (U.S. gallons)
