## KLEEN POOL ALGICIDE

Kleen Pool Algicide will maintain your pool free of most algae for periods up to six months. One simple application will free you from the problems caused by algae blooms, discolouration and hazes which can affect the appearance of your pool. When your pool is not being used for swimming such as holiday times and winter lay-ups, Kleen Pool will keep your pool clear and free of most algae without the use of other chemicals.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DOSE RATES:** One six month treatment: 1 pint of Kleen Pool Algicide per 2,500 gallons of pool water. To calculate pool volume for rectangular pools, multiply length x width x average depth x 7.5. For round pools, multiply diameter x diameter x average depth x 5.89.

When algae reappears, then a further treatment is necessary. A Kleen Pool test kit is available from your Kleen Pool supplier.

Kleen Pool Algicide level should be maintained between 0.2 and 1.0 Units measured by the test kit.

**APPLICATION:** Kleen Pool Algicide comes concentrated. Dilute with at least nine parts of water in a bucket and spread around pool. Maintain continuous pool circulation for at least 2 hours after application.

**IMPORTANT:** Before adding Kleen Pool Algicide adjust the pool pH to 7.2 and maintain the pool pH in the range of 7.2 to 7.6 to ensure maximum effectiveness. Kleen Pool Algicide is not recommended for use in pools where the pool pH cannot be maintained in the 7.2 - 7.6 range. This product may not be compatible with other algicides — check with manufacturer before use. Kleen Pool Algicide should not be mixed with other chemicals and should be added directly to the pool water.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

## DANGER

**CORROSIVE:** Causes irreversible eye damage and burns. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles, face shield, or safety glasses, protective clothing and rubber gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. *Wash before reuse. Skin sensitization in certain individuals.*

**STATEMENT OF PRACTICAL TREATMENT:** If in eyes, hold eyelids open and flush with a steady stream of water for 15 minutes. If on skin, wash with plenty of soap and water. Get medical attention. If swallowed, drink promptly a large quantity of milk, egg white, gelatin solution, or if these are not available, large quantities of water.

**Note to Physician:** Probably mucosal damage may contraindicate the use of gastric lavage.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Treated effluent should not be discharged in lakes, ponds or public water.

**DISPOSAL:** Security wrap original container in several layers of newspaper and discard in trash.
