PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Harmful if swallowed. Wear protective eyewear (goggles or face shield). Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present after the first 5 minutes, then continue rinsing eye.

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN: Probably mucosal damage may contraindicate the use of a gastric lavage.

MISC: Chlorinated pool water can cause discoloration to blonde, bleached or damaged hair. Kleen Pool™ Algacide in pool water may further highlight this discoloration should it occur.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Treated effluent should not be discharged in lakes, ponds or public water.
DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

4100 Maverick Court, Sanford, FL 32771

WARNING - DANGER
KEEP OUT OF REACH OF CHILDREN
(See First Aid statement and other precautions on back panel)

EPA REG. NO. 54564-2 EPA EST. NO. 54564-FL-1

KLEEN POOL® Algicide

Kleen Pool Algicide will maintain your pool free of most algae for periods up to six months. One simple application will free you from the problems caused by algae blooms, discoloration and hazes which can affect the appearance of your pool. When your pool is not being used for swimming, such as vacation times and winter lay-ups, Kleen Pool will keep your pool clear and free of most algae without the use of other chemicals.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DOSAGE RATES: One six month treatment: 1 Quart of Kleen Pool Algicide per 5,000 gallons of pool water. To calculate volume for rectangular pools, multiply length x width x average depth x 7.5. For oval pools, multiply long diameter x short diameter x average depth x 5.9. For round pools, multiply diameter x diameter x average depth x 5.9.

When algae reappears, then a further treatment is necessary. Kleen Pool Algicide Level should be maintained between 0.2 and 2.0 units as measured by a copper test kit. These test kits are available from your pool supplier.

APPLICATION: Kleen Pool Algicide comes concentrated. Pour Kleen Pool directly into pool. Maintain continuous pool circulation for at least eight hours after application.

IMPORTANT: Adjust your pool pH level to 7.2 before adding Kleen Pool. Maintain the pH level in the range of 7.2 to 7.6 to ensure maximum effectiveness. Kleen Pool Algicide is not recommended for use in pools where the pH cannot be maintained in the 7.2 to 7.6 range. Badly scaled pools may cause elevated pH conditions above the recommended range. Pools with scale should be de-scaled before using Kleen Pool. This product may not be compatible with other algicides-check with manufacturer before use. Kleen Pool Algicide should not be mixed with other chemicals and should be added directly to the pool water as instructed above. Refer to the 'Understanding Pool' booklet for more detailed information.
