Optional Statements for pool use.

One capful holds approximately 5 oz.

Also: Optional Marketing Statement for 2 lb size overcap

Optional Marketing Statements for 1 lb pouch.

Optional Marketing Statement for 2 lb. size

Optional Statements for superchlorination use

Optional Statements for Spa Use.

GRANULAR

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

DANGER; CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

FIRST AID

| | |
|--------------------------------|---|
| If swallowed: | <ul style="list-style-type: none"> • Call a poison control center, or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person. |
| If in eyes: | <ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes then continue rinsing eye. • Call a poison control center or doctor for treatment advice. |
| If on skin or clothing: | <ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice. |
| If inhaled: | <ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice. |
| NOTE TO PHYSICIAN | <ul style="list-style-type: none"> • Probable mucosal damage may contraindicate the use of gastric lavage. |

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Use entire contents of bag after opening.

CONTAINER POOLS

One capful holds approximately 1 oz. Bathers should not enter the treated water until the chlorine level has dropped to 3 ppm or less. Every day, add 2 oz. of GRANULAR per 10,000 gallons of pool water. Disperse into deep end of the pool in early morning or late evening. Maintain a reading on test kit of 1.0 - 1.5 ppm of available chlorine. Keep pH between 7.2 and 7.6. Use pH UP or pH DOWN as required.

This product restores water sparkle and comfort by destroying harmful bacteria and algae and non-filterable swimmer wastes such as perspiration and suntan oils. These wastes can cause cloudy, dull water, eye irritation and strong odors. Regular use of this product in chlorine-water.

With the pool pump in operation, broadcast 1 lb. of this product per 10,000 gallons directly into the water in the deep end of the pool. To prevent damage to pool surfaces, use a pool brush to disperse any granules that may have settled to the bottom of the pool. NEVER ALLOW UNDISSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES.

Apply every other week when the pool is not in use (preferably at night). Reapply after heavy rain or following heavy bather loads.

SPA AND HOT TUBS

Entry into the treated spa is prohibited above levels of 5 ppm chlorine due to risk of body injury. When used as directed, this product is effective as a spa and hot tub water sanitizing agent.

Ensure all spa and hot tub equipment is working properly. Backwash/clean the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6.

When using other products as outlined in the directions for this product, always follow directions on those products.

With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3-5 ppm of available chlorine is established as determined by test kit or test strips. Testing must be performed regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3-5 ppm.

SUPERCHLORINATION: Use one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons). Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as once a week in a moderately used spa.

STORAGE AND DISPOSAL: Store in original container in locked storage area. Keep this product dry in a tightly closed container when not in use. Store in a cool, dry and well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood with large amounts of water to dissolve all material before discarding. Do not reuse container. Rinse thoroughly before discarding. Securely wrap original container in several layers of newspaper and discard in trash.
