## BROM-AID

BROM-AID is a solution of bromide salts which is activated by the addition of ENERGIZE.  
Bromine is released by the regular addition of ENERGIZE into the Spa/Hot Tub water containing BROM-AID.  
BROM-AID alone has no disinfectant properties but requires ENERGIZE to release the bromine. It is a two step process. Follow the directions on the ENERGIZE label.

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labelling.

Initial Treatment:

- 1) Turn on filtration system to circulate the water.
- 2) Treat Spa/Hot Tub with Prevent II before the addition of BROM-AID or ENERGIZE. Let water circulate for 30 minutes.
- 3) Add 5 ounces of BROM-AID per 250 gallons of water directly into the Spa/Hot Tub.
- 4) Add ENERGIZE as directed.

Weekly Treatment:

Add one ounce of BROM-AID per 250 gallons of water.  
Due to varying bathing loads and frequency of use, Spa/Hot Tub water should be tested to maintain a bromine residual level of 2-3 PPM. During heavy use, increase the addition of BROM-AID and ENERGIZE to maintain this level.

### PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS. Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

### STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

Avoid contact with skin, eyes or clothing. IF ON SKIN: Wash with plenty of soap and water. Seek medical attention if irritation persists. IF IN EYES: Flush eyes immediately with gentle, steady stream of water for 15 minutes. Get medical attention if irritation persists. IF SWALLOWED: Drink large quantities of water. Do not induce vomiting. Avoid alcohol. Get prompt medical attention or call the poison control center.

**Environmental Hazards:** This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

### STORAGE AND DISPOSAL

**STORAGE:** Store in original container placed in a locked storage area. Do not contaminate water, food, or feed by storage or disposal.  
**DISPOSAL:** Do not re-use empty container. Triple rinse (or equivalent) and offer for recycling or, securely wrap container in several layers of newspaper and discard in trash.
