DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labelling.

Bathers should not enter the treated pool until the chlorine level has dropped to 3 ppm or less.

One capful contains 7 ounces. Premix the SHOCK in a pail of water, and pour the solution in the deep end of the pool. Discard the undissolved material in the bottom of the pail. Always add the chemical to water; never add water to the chemical. Add SHOCK at the rate of 2 lbs. per 20,000 gallons of pool water. Treat pool with SHOCK every two weeks during the heavy swimming pool periods.

For visible algae, treat pool with SHOCK daily until algae is killed and turns brown. Vacuum dead algae from bottom of pool.
