DIRECTIONS FOR USE

It is a violation of Federal law to use this pesticide inconsistent with its labeling.

BIO GARD-200 is used in recirculating commercial and industrial water systems must be cleaned to remove algal growth and other deposits. An initial slug addition of 6.5 BIO GARD-200 per 1000 gallons is recommended. Repeat initial dosage until control is effected. Subsequent slug additions of 2.3 BIO GARD-200 per 1000 gallons every 1 to 5 days, or as needed. The frequency and relative amount of bleed-off and the severity of the additions should be made in the sump of water.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **STORAGE:** Do not expose to extreme temperatures. Do not store in five drums high. Drums should be opened in well-ventilated areas. Damaged drums should be placed in overpack and should be absorbed in sawdust or sand and disposed of in a container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely toxic. Excess pesticide, spray mixture, or rinsate is a valuable commodity. Wastes cannot be disposed of by use according to local, State, or Federal laws. Contact your State Pesticide or Environmental Control Agency representative at your EPA Regional Office for disposal instructions.
