EPA Reg. No.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

3. The basic Confidential Statement of Formula dated March 19, 1996 is acceptable with the following comment: You must delete Anethol from your formulation. This inert ingredient has not been cleared by the Agency for use in pesticides that are applied to animals used as food. The .05% by weight that will be lost in the formulation from the deletion of anethol can be made up only in the feed ingredients, not the active ingredient. Consult 40 CFR 180.1001 for more information.

4. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
