DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation to use this product in a manner inconsistent with its labeling.

Mix 1/3 tablespoon per gallon of water. Shake sprayer occasionally during spraying. Apply spray thoroughly to cover both upper and under sides of foliage as insects must eat THURICIDE to be controlled.* Use of a spreader-sticker in the spray helps keep THURICIDE on the foliage to maintain effectiveness where heavy dew or light rains occur. Respray after heavy rains. Apply at first sign of infestation and repeat at weekly intervals as necessary.

*The following table indicates the number of plants which can be adequately covered with one gallon of spray mixture. For annual crops, the number of plants indicated is based on young seedlings. As they grow and mature, the number of plants which can be adequately covered will have to be reduced from 2 to 5 times.

NUMBER OF PLANTS COVERED/GALLON OF SPRAY MIXTURE	PLANT TYPE
200	• Clustered Cole Crops: Broccoli, Brussels Sprouts, Cabbage, Cauliflower
300	• Leafy Cole Crops: Collards, Kale, Mustard Greens, Turnip Greens
500	• Celery
100	• Beans or Spinach
160	• Cucumbers or Melons
30	• Tomato Plants
1 to 4	• Grapevines
16	• Average size trees (ornamental fruit or shade)
35	• Dwarf ornamental trees
	• Shrubs

HOW THURICIDE WORKS

THURICIDE causes paralysis of the digestive tract of the insects listed on this label when they eat it, literally causing them to starve to death. They stop feeding, but may otherwise appear unaffected for several days.

STORAGE AND DISPOSAL

CONTAINER DISPOSAL: Do not reuse container. Wrap and place in trash collection.

STORAGE: Store in a cool place.
