X-100 NATURAL SEAL

Used by professionals for Building Restoration & Preservation

X-100 Natural Seal is a waterproof coating formulated with fungicide. Protects against fungal attack, mold & mildew. Termites avoid it. For use on cedar wood, wood surfaces, vertical wood and other surfaces susceptible to moisture damage. **DO NOT USE ON WOOD THAT WILL BE IN DIRECT CONTACT WITH SOIL. TEST FOR COLOR COMPATIBILITY BEFORE APPLYING TO BRICK, MASONRY, CONCRETE OR LIMESTONE. ALLOW TEST SAMPLE TO DRY, THEN INSPECT.** Hair-line cracks are sealed by the solids which penetrate deep and actually plug these problem areas. As Natural Seal ages, it migrates inward to create a lasting protective seal. **PROTECTS** by eliminating moisture penetration which causes costly damage and repairs. **PRESERVES** by retarding disintegration from moisture freeze-thaw cycles which cause surface damage. **BEAUTIFIES** by helping protect against efflorescences and surface stains. **INSULATES** by sealing out moisture, making it possible to retain the full insulation value of the wood. Provides excellent protection after restoration from acid rain, water damage, ultra-violet rays, sulphuric acid, salt, fungus, and wood rot.

FINISH	CLEAR	SUGGESTIONS:
AVERAGE COVERAGE	Depending on density of surface 25 to 50 Sq Ft per Qt	• When spraying near vegetation cover any plant life in case of overspray
DRY TIME	24-48 hours for a single coat. Allow to dry at least 48 hours before applying second coat	• Before treating surface make sure surface or material is thoroughly dry
THINNER	None required	• If Natural Seal should get on surfaces such as glass, metal or paint remove with Paint Thinner
APPLICATION	Brush, roller or spray	
PRIMER	None	
CLEAN UP	Paint Thinner	

USE ONLY WITH ADEQUATE VENTILATION

ACTIVE INGREDIENTS:

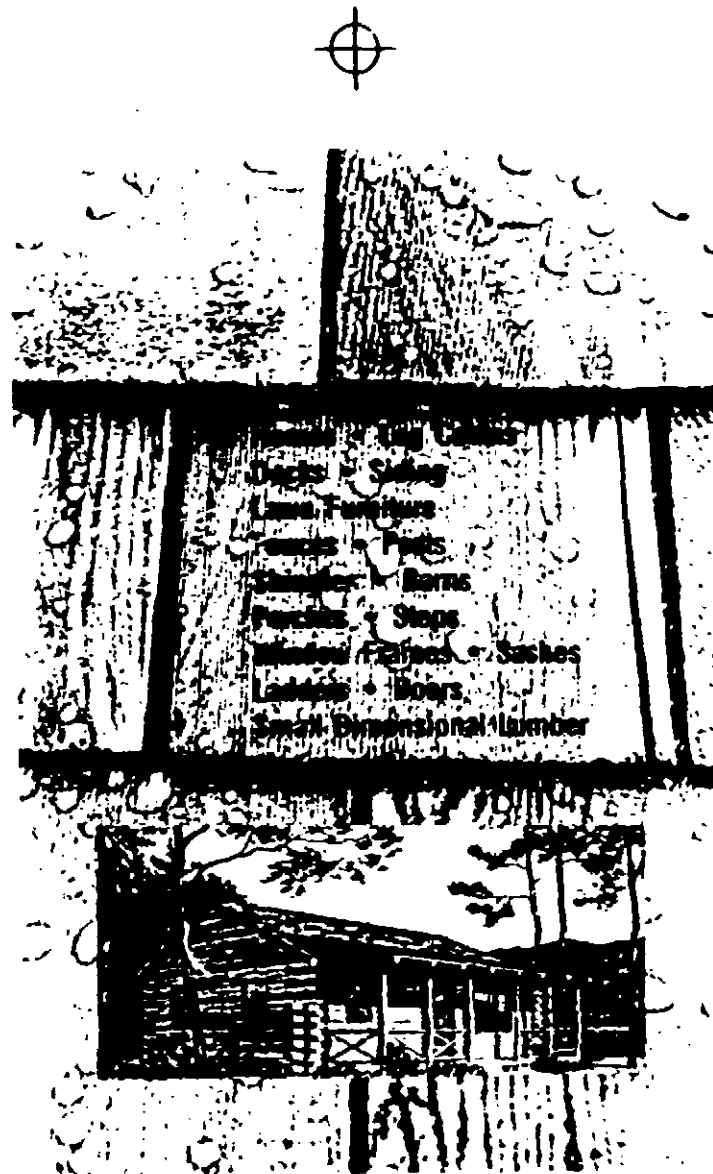

Methylene bis (thiocyanate)	5%
2-(Thiocyanomethylthio) benzothiazole	5%
INERT INGREDIENTS	99%

This product weighs 8 pounds per gallon
