**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS  
(& DOMESTIC ANIMALS)**

**DANGER**

Harmful if swallowed, inhaled, or absorbed through the skin. Avoid contact with eyes, skin, or clothing. Handle only with protective gloves, clothing, and face mask, or respirator. Wash hands with soap and water after handling.

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to birds. Do not expose in areas accessible to waterfowl, poultry, and other non-target birds. Keep out of lakes, ponds, streams, tidal marshes, and estuaries. Do not apply where runoff is likely to occur. Do not contaminate water by the cleaning of equipment or disposal of waste.

**ENDANGERED SPECIES  
CONSIDERATIONS**

Before undertaking any control operations with the product, consult with local, State, and Federal wildlife authorities to ensure the use of this product presents no hazard to any endangered species.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**USE RESTRICTIONS**

A slow acting avicide for the control of starlings and blackbirds.

**DIRECTIONS:** Mixing—10 lbs. of 1339 pelleted starling bait, grains, or other applicable bird foods may be prepared as follows: Dissolve 45 grams of 1339 concentrate in 600 ml. of water or an edible oil (amount can be adjusted to get uniform coverage). Pour mixture over 10 lbs. of bait, mix or tumble slowly until mixture is evenly distributed.

Poultry pellets number approximately 7,000 per lb. Larger pellets require less 1339, smaller pellets require more. When using bait of different size, amount of 1339 must be adjusted to make one particle lethal

**APPLICATION:** Starlings ingesting treated bait die one to three days later. Application of bait should be made only after careful observation of starling and blackbird habits on the problem area to establish preferred feeding sites, best timing for application, and hazards of application to desirable or protected birds.

**RESTRICTED USE PESTICIDE**

For retail sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification.

For use only by U. S. Fish and Wildlife Personnel trained in Bird Control or persons under their Direct Supervision.

**COMPOUND DRC-1339  
98% CONCENTRATE**

**FOR REFORMULATING PURPOSES ONLY**

**Active Ingredient:**

3-Chloro-p-to-luidine hydrochloride..... 98.0%

Inert Ingredients ..... 2.0%

TOTAL 100.0%

**KEEP OUT OF REACH OF CHILDREN**

**DANGER—POISON**

**STATEMENT OF PRACTICAL TREATMENT**

**IF SWALLOWED:** Induce vomiting and immediately call a physician.

**IF INHALED:** Move patient from contaminated area and immediately call a physician.

**IF ON SKIN OR IN EYES:** Immediately flush eyes or skin with large quantities of water. Call a physician immediately.

**DIRECTIONS FOR USE**

(Continued)

**FOR CATTLE FEEDLOTS:** Place in feeding stations or scatter 1339 bait thinly and uniformly over dry or frozen areas of the pens and alleyways before starlings arrive for first meal in the morning. Pens occupied by cattle are particularly attractive to feeding starlings. Pre-baiting may be necessary for successful use of this bait.

Dilution of 1339 baits with 5 to 10 parts of other feeds (poultry pellets and crumbles, grains or silage) is recommended as it allows more uniform distribution of toxic bait and gives more birds an opportunity to consume a lethal dose.

**FOR POULTRY AND HOG FEEDLOTS:** Place in feeding stations or scatter 1339 bait thinly and uniformly over dry and frozen areas on the perimeter of the lot OUTSIDE the pens. Baiting time, rates, and dilution with other feeds recommended for cattle feedlots.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**STORAGE:** Store only in original container, in a dry place inaccessible to children, pets and domestic animals.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Completely empty by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bags in a sanitary landfill or by incineration if allowed by State and local authorities. If burned, stay out of smoke.

**ACCEPTED**

NOV 26 1985

Under the Federal Insecticide, Fungicide, and Herbicide Act, as amended, for the pesticide registered under EPA Reg. No. 6704-56
