UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

2X 11 1996

Nortech Water & Energy, Inc.
35 Connecticut Avenue
Norwich, CT 06360

Attention: Linda S. Allen
Registration Specialist

Subject: TB-64
EPA Registration Number 56244-3
Your Submission Dated September 27, 1995
EPA Receive Date September 28, 1995

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, to update your label will be acceptable provided that you make the labeling changes listed below before you release the product for shipment bearing the amended label.

Under the heading "Environmental Hazards" add the following statements:

"This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA."

A stamped copy of your labeling is enclosed for your records. Submit one (1) copy of the final printed label prior to release of the product for shipment.

TB-64

with CHLORINE
EPA Letter Date: 11/1/94

MAR 11 1996

ACTIVE INGREDIENT:

Potassium dimethyldithiocarbamate 20.0%

INERT INGREDIENTS 80.0%

This product contains 1.81 lb. of active ingredient per gallon and weighs 9.05 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN
DANGER**

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes eye and skin damage. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT: *In case of skin contact*, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. *If product gets in the eyes*, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. *If product is swallowed*, promptly drink 1 or 2 glasses of water. Contact a physician or Poison Control Center immediately. **DO NOT INDUCE VOMITING.**

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

TB-64 is used in industrial and/or commercial recirculating and industrial air-washing systems to control microbial growth. Recirculating and industrial air-washing systems should be cleaned to remove algal growth, mineral deposits. Then make an initial slug addition of 5.7 to 8.6 fl. oz. of TB-64 per 1000 gal. of water to provide 50 to 75 ppm of TB-64 based on total water. Repeat initial dosage until control is evident. Make subsequent slug additions of 10.0 to 17.2 fl. oz. of TB-64 per 1000 gal. of water (25 to 75 ppm) or as needed. The frequency of addition depends upon the bleedoff and the severity of the microbiological problem. TB-64 is used in industrial air-washing systems to eliminate bacterial slime and other deposits. An initial slug dosage of 5.7 to 8.6 fl. oz. of TB-64 per 1000 gal. of water is recommended. Repeat slug additions of 10.0 to 17.2 fl. oz. of TB-64 per 1000 gal. of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the problem. Slug additions may be made to the sump or the water being treated.

TB-64 is used in industrial air-washing systems to eliminate bacterial slime and other deposits. An initial slug dosage of 5.7 to 8.6 fl. oz. of TB-64 per 1000 gal. of water is recommended. Repeat slug additions of 10.0 to 17.2 fl. oz. of TB-64 per 1000 gal. of water should be employed every 1 to 5 days, or as needed. STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Do not expose to extreme temperatures. Do not stack or damaged drums should be placed in overpack drums for disposal or sand and disposed of in a sanitary landfill. Keep container closed.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. If a spray mixture, or rinseate is a violation of Federal Law. If these wastes are not disposed of according to label instructions, contact your State Pesticide or Environmental Hazardous Waste representative at your EPA Regional Office for disposal.

CONTAINER DISPOSAL:

- PLASTIC:** Triple rinse (or equivalent). Then offer for recycling or dispose of in a sanitary landfill, by incineration, or, if allowed by law, by other procedures approved by the local authority. If burned, stay out of smoke.
- METAL:** Triple rinse (or equivalent). Then offer for recycling or dispose of in a sanitary landfill, or by other procedures approved by the local authority.
