U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Biopesticides and Pollution Prevention Division (7511W)
401 M Street, S.W.
Washington, DC 20460

EPA Reg. Number:

56336-8

Date of Issuance:

OCT 7 1997

NOTICE OF PESTICIDE:

- Registration
- Reregistration

(under FIFRA, as amended)

Term of Issuance: Unconditional

Name of Pesticide Product:

Surefire Japanese Beetle Trap

Name and Address of Registrant (include ZIP Code):

CONSEP, Inc.
213 SW Columbia Street
Bend, Oregon 97702-1013

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The Food Quality Protection Act (FQPA) was signed into law on August 3, 1996. Although full implementation of FQPA has not been achieved, the Agency has no reason to believe that the registration of this product will, in any way, violate the terms of the Act. If EPA determines, as a result of the FQPA implementation process, that the decision to register this product is no longer appropriate, the Agency will consider itself free to pursue whatever action may be appropriate, including, but not limited to, reconsideration of the registration decision.

This product is unconditionally registered in accordance with FIFRA Sec. 3(c)(5) provided you:

1. Submit and /or cite all data required for registration/reregistration of your product under FIFRA Sec.3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA Sec.4.
- 2.. Submit five (5) copies of the final printed label for the record.

Signature of Approving Official: See page 2 for signature of approving official

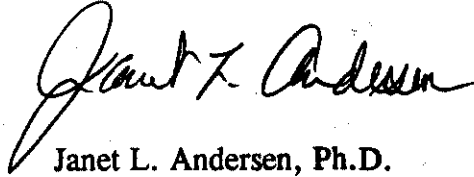

Date:

BACK PANEL

ACTIVE INGREDIENTS:

(R,Z)-5-(1-Decenyl) dihydro-2(3H)-furanone: Japanese Beetle Sex Pheromone:.....	0.017%
Eugenol: Japanese Beetle Floral Lure.....	25.233%
Geraniol: Japanese Beetle Floral Lure.....	10.698%
2-Phenethyl Propionate: Japanese Beetle Floral Lure.....	10.698%
INERT INGREDIENTS:	53.354%
Total:	100.000%

This product contains 1.5 mg of the Japanese Beetle Sex Pheromone and a total of 4.2 grams of the Floral Attractant per Lure.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

TRAP ASSEMBLY:

1. Slide vanes together at the slots to form a cross.
2. Attach the twist tie by inserting about 4" through the holes in the top vane assembly as shown in the diagram and twist to secure the trap.

3. Attach one of the disposable collection bags to the vane assembly by gently sliding the holes in the bag over the cutout hooks on the lower end of the trap vanes.

BAIT PLACEMENT

4. Remove the bait from its protective package. Peel the protective cover (marked "peel") from the SureFire Japanese Beetle Trap Lure.
5. Peel the paper from the adhesive strip on the back of the sex/floral lure (bait) and stick the bait onto the trap vane. **DO NOT ATTEMPT TO PEEL APART THE BAIT.** Best results are obtained by attaching the bait to the lower third of the trap vane.

TRAP PLACEMENT, APPLICATION RATE AND USE

1. Place traps as beetles emerge or in mid-May to early June in Georgia and South Carolina; early June to mid-June in North Carolina and Tennessee; mid-June to early July in Kentucky, Delaware, Washington DC, Virginia and West Virginia; early July to mid-July in Illinois, Indiana, Ohio, Pennsylvania and New Jersey; Mid-July in New York, Connecticut, New Hampshire, Rhode Island, Vermont and Maine.
2. Place traps on the generally upwind side of vegetable gardens, flower gardens, ornamental shrub plantings and other outside landscape plantings attacked by the beetles. Apply traps at the rate of one trap per 50 linear feet along two sides of plant perimeters. For example, if the site is 1-50 linear feet place only one trap on each of the two sides; if the site is 51-100 linear feet place two traps on each of the two sides, etc. Do not enclose the treated sites with traps.
3. Hang traps from any suitable post or stand in sunny areas 3 to 5 feet above the ground.
4. Place traps at least 10 feet away from the plantings as they may attract beetles to the foliage if placed closer.
5. Replace bags when full. If trap catches decline and beetles are still present replace pheromone/floral dispensers. Remove traps from site when beetles are no longer present.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Store unopened pheromone/floral dispensers in a cool dry place or refrigerate until ready to use.

PESTICIDE DISPOSAL: Securely wrap used dispenser in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Crush cardboard box and offer for recycling or discard in trash.

BACK PANEL (continued):

**PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN**

CAUTION

Avoid skin, eye or clothing contact with circular pheromone/floral release areas of dispenser.

STATEMENT OF PRACTICAL TREATMENT

IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.
