CHECKMATE® OLR

Active Ingredients

(E)-11-Tetradecen-l-yl Acetate (Z)-11-Tetradecen-l-yl Acetate 0.61% Inert Ingredients 95.70% 100.00%

Net Weight: 60 mg active ingredients per dispenser.

ACCEPTED

DEC | 1997

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 56336-16

A BIOCHEMICAL PESTICIDE FOR MATING DISRUPTION OF THE OMNIVOROUS LEAFROLLER (Playtonia stultana)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS Keep Out Of Reach Of Children

CAUTION

Causes eye irritation. Avoid contact with eyes, skin or clothing. Avoid contact of pheromone reservoir inside dispenser with skin or clothing. Wash thoroughly with soap and water after handling.

STATEMENT OF PRACTICAL TREATMENT

IF ON SKIN: In case of contact, flush area with water and wash thoroughly with soap and water. Obtain medical attention if irritation persists. IF IN EYES: Flush with plenty of water. Call a physician if irritation persists.

ENVIRONMENTAL HAZARDS

Keep out of lakes, ponds or streams. Do not contaminate water by disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

CheckMate® OLR is a behavior modifying biochemical product (pheromone) which functions by mating disruption. It is to be used for control of the Omnivorous Leafroller (*Playtonia stultana*).

RECOMMENDED APPLICATION: For use on peaches, nectarines, apricots, plums, prunes, cherries and other stone fruits; apples, quinces, and other pome fruits; almonds and other tree nut crops; and grapes, wine grapes, and raisins. The recommended rate of application of CheckMate OLR is 100-400 dispensers per acre. [Alternate: single numbers or ranges of numbers of dispensers per acre between 100 to 400 (250 to 600 per hectare) may be used, e.g. 150, 200, 150-300, 100-400, etc.] Apply the first application early in the season, after the first moth is detected with a BioLure® trap. Follow the BioLure Technical Bulletin for trap placement. Monitor insect infestation with traps and by visual inspection of trees and fruit. Re-apply CheckMate OLR as needed, based on monitoring results and field scouting. Do not exceed a total of 150 grams a.i./acre/year.

METHOD OF APPLICATION: Apply dispensers by hand to thumb-size limbs to secure placement. Place dispensers in the upper one-third of the tree, or higher. If there is a persistent and prevalent wind, apply one dispenser to every tree on the upwind side of the orchard/arbor and then evenly distribute the remaining dispensers in the block.

Wash hands after application. Do not handle other types of insect lures before or after lure placement without thoroughly washing hands. Place monitoring traps in the orchard before handling CheckMate OLR. Monitor treatments carefully, especially for secondary pests such as peach twig borer.

Reseal containers immediately after use. Store unused product in a refrigerator or freezer not used for food storage. Do not use CheckMate OLR from damaged, punctured or unsealed containers.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal PESTICIDE STORAGE; Store container in cool place until used. PESTICIDE DISPOSAL: Wastes resulting from use of this product may be disposed of on-site or at an approved disposal facility. CONTAINER DISPOSAL: Do not reuse container. Discard in trash.
