Buyer and user acknowledge and assume all risks and liabilities resulting from the handling, storage and use of this material that is contrary to this label.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

CheckMate® SPM Dispenser is a behavior modifying biochemical product (pheromone) which functions by mating disruption. It is to be used in pest management programs for control of Indian Meal Moth (*Plodia interpunctella*) also Mediterranean flour moth (*Ephestia kuehniella*), Raisin moth (*Cadra figulilella*) and Tobacco moth (*Ephestia elutella*)

METHOD OF APPLICATION: For Indoor Use Only. For use in food/feed storage areas of silos, warehouses, food processing plants, storage areas within retail stores and other storage area facilities where Indian Meal Moth is a problem. The rate of application of **CheckMate SPM Dispenser** is one (1) dispenser per 100 square feet of area [ten (10) dispensers per 1,000 square feet of area]. For best results apply at the time or shortly before moths begin to emerge, or when moths are detected in pheromone traps such as BioLure®. This product only affects adult male moths and will have no effect on female moths, eggs or larvae. If application occurs following detection of moths treatment with an approved insecticide that will effectively control hatching larvae until egg laying by previously mated female moths has ceased to occur is required. In moderate to high insect pressure situations, supplemental insecticide applications during the season to provide adequate protection must be made based on trap monitoring, scouting, and appropriate degree-day models for the specified area and must be timed to control emerging larvae. Monitor insect infestation with traps and by visual inspection of commodities. Re-apply **CheckMate SPM Dispensers** as needed, based on monitoring results and field scouting. **Do not exceed a total of 70 dispensers /1000 sq. feet/year [equal to 3.5 grams of active ingredient per 1,000 sq. ft. per year].**

Apply dispensers by hand to machinery pallets, shelves or other suitable stationary structures at the recommended rate.

Wash hands after application. Do not handle other types of insect lures before or after dispenser placement without thoroughly washing hands. Place monitoring traps in the facility before handling **CheckMate SPM dispensers**. Monitor treatments carefully, especially for secondary pests such as grain and flour beetles

Do not use **CheckMate SPM Dispensers** from damaged, punctured or unsealed containers.

STORAGE AND DISPOSAL

DO NOT contaminate water, food or feed by storage or disposal

PESTICIDE STORAGE: Store container in cool place until used. Reseal containers immediately after use. Store unused product in a refrigerator or freezer not used for food storage.

PESTICIDE DISPOSAL: Wastes resulting from use of this product may be disposed of on-site or at an approved disposal facility.

CONTAINER DISPOSAL: Plastic Containers: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned stay out of smoke. Bag/Cardboard Box: Dispose of empty bag/cardboard box in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned stay out of smoke.
