US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20460 NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	EPA REGISTRATION 56387-1	DATE OF ISSUANCE
	TERM OF ISSUANCE Until Reregistration	
	NAME OF PESTICIDE PRODUCT Pyrinyl Liquid	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

161/20701
18/2

Barre-National, Inc.
 7205 Windsor Boulevard
 Baltimore, MD 21207-2642

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. 56387-1."
 - b. The Ingredient Statement is required on the front panel of the label and box.
 - c. 
 - d.

- e. A Statement of Practical Treatment must be added to the labeling. We suggest the following statement; however, if your toxicological data suggest otherwise, please submit a draft Statement of Practical Treatment for prior approval.

If Swallowed - Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching the back of throat with a finger. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person.

If Inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.

If On Skin - Remove contaminated clothing and wash affected areas with soap and water.

If In Eyes - Flush eyes with plenty of water. Call a physician if irritation persists.

- f. Add the headings:

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

- g. Change DIRECTIONS to DIRECTIONS FOR USE.
- h. Add the statement "It is a violation of Federal law to use this product in a manner inconsistent with its labeling" to the beginning of the use directions.
- i. Add an appropriate Storage and Disposal statement. See PR Notices 83-3 and 84-1.
- j. Storage Stability-the formulated product must be analyzed for its active ingredient at time zero and during a year of storage.

In the submitted storage stability study, you reported "fragrance" but it does not appear on the Confidential Statement of Formula. Please add it to the total inerts.

Note that the same container used in marketing the product must be used in the storage stability study.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

SIDE PANEL LABEL

ACTIVE INGREDIENTS:

Fyrethrins	0.3 percent
Piperonyl Butoxide technical	3.0 percent
(equivalent to 2.40 percent (butylcarbityl) (6-propylpiperonyl) ether and 0.60 percent related compounds)	
Petroleum Distillate	1.20 percent
Benzyl Alcohol	2.40 percent
INERT INGREDIENTS	93.1 percent
TOTAL	100.0 percent

CAUTION: Harmful if swallowed. Do not inhale. Keep out of eyes and avoid contact with mucous membranes. If product should get into eyes, immediately flush with plenty of water. If skin irritation or infection is present or develops, discontinue use and consult a doctor. Consult a doctor if infestation of eyebrows and eyelashes occurs. Avoid contamination of feed or foodstuffs. Not to be used by persons allergic to ragweed.
Do not store below 32°F (0°C).

SIDE PANEL LABEL

FOR EXTERNAL USE ONLY

CAUTION: In order to prevent reinfestation with body lice, all clothing must be sterilized concurrent with the application of this preparation.

DIRECTIONS: SHAKE WELL BEFORE USING. Apply to infected area until hair is thoroughly wet with product. Allow product to remain on area for 10 minutes but no longer. Wash area thoroughly with warm water and soap, or shampoo. A fine toothed comb may be used to help remove dead lice and their eggs (nits) from hair. A second treatment must be made in 7 to 10 days to kill any newly hatched lice. Use no more than two times in 24 hours.

DRAFT COPY INSERT

IMPORTANT INFORMATION - PLEASE READ

Lice are tiny parasitic insects the size of a pinhead. People at all social levels can become infested with lice; no one is immune. The 3 types of lice which infest humans are:

1) HEAD LICE: Head lice live on the scalp and lay small white eggs (nits) on the hair shaft close to the scalp. The nits are most easily found on the nape of the neck or behind the ears. All personal headgear, scarfs, coats, and bed linen should be disinfected by machine washing in hot water and drying, using the hot cycle of a dryer for at least 20 minutes. Personal articles of clothing or bedding that cannot be washed may be dry-cleaned or sealed in a plastic bag for a period of about 2 weeks. Personal combs and brushes may be disinfected by soaking in hot water (above 130°F) for 5 to 10 minutes. Thorough vacuuming of rooms inhabited by infested patients is recommended.

2) PUBIC (CRAB) LICE: Pubic lice may be transmitted by sexual contact; therefore sexual partners should be treated simultaneously to avoid reinfestation. The lice are very small and look almost like brown or grey dots on the skin. Pubic lice usually cause intense itching and lay small white eggs (nits) on the hair shaft generally close to the skin surface. In hairy individuals, pubic lice may be present on the short hairs of the thighs and trunk, underarms, and occasionally on the beard and mustache. Underwear should be disinfected by machine washing in hot water; then drying, using the hot cycle for at least 20 minutes.

3) BODY LICE: Body lice and their eggs are generally found in the seams of clothing, particularly in the waistline and armpit area. They move to the skin to feed, then return to the seams of the clothing where they lay their eggs. Clothing worn and not laundered before treatment should be disinfected by the same procedure as outlined for head lice, except that sealing clothing in a plastic bag is not recommended for body lice because the nits (eggs) from these lice can remain dormant for a period of up to 30 days.
