NOTICE OF PESTICIDE:

**Reregistration**

Name and Address of Registrant (include ZIP Code):

Caltech Industries, Inc.
2420 Schuette Road
Midland, MI 48642-5974

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the following label changes:

   a. Revise the EPA Registration Number to read, "EPA Reg. No. 56392-10."

   b. The percentage of "available chlorine" must be declared on the label below the ingredient statement.

   c. On the front panel, change the word "Net" to read: "Net Weight" or "Net Content."

Signature of Approving Official:

Emily H. Mitchell, Product Manager

Date: JUN 7 2005

EPA Form 8570-6
d. You must add special instructions for cleaning and decontaminating against Human immunodeficiency virus type 1 and the Hepatitis B virus on pre-cleaned surfaces or objects previously soiled with blood/body fluids.

e. The acceptance of the data to support a label claim for human coronavirus does not in any way support a label claim for the product as an effective disinfectant against the causative agent of Severe Acute Respiratory Syndrome (SARS).

3. The following alternate brand names: ChlorAssure Decontaminant and Surface Cleaner Disinfectant, Compel with Bleach Decontaminant Surface Cleaner Disinfectant, Dispel with Bleach Decontaminant and Surface Cleaner Disinfectant, ChlorAssure Surface Cleaner Disinfectant, Compel with Bleach Surface Cleaner Disinfectant, and Dispel with Bleach Surface Cleaner Disinfectant are acceptable and have been made a part of the file for this product.

4. You must submit a five-batch preliminary analysis and one-year storage stability and corrosion characteristics study done under Good Laboratory Practices (GLP) to the Agency for review within one year [June 7, 2006] from the date of this letter.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
Decontaminant and Surface Cleaner Disinfectant

- Ready to use Bleach Solution (5500 ppm) with Biodegradeable Cleaning Agents
- For Hospital, Veterinary, & Food Contact Hard Non-Porous Surfaces
  - Cleans & Disinfects in One Step
  - Effective against Bacteria & Viruses in 2 minutes
  - *Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella choleraesuis, Methicillin resistant Staphylococcus aureus (MRSA), Vancomycin resistant Enterococcus faecalis (VRE), Vancomycin Intermediate/Resistant Staphylococcus aureus (VISA), Clostridium difficile (vegetative), HIV-1 (AIDS Virus), Hepatitis B Virus (HBV), Human coronavirus*
- For Instrument Precleaning & Decontamination
- See Directions for Use for Each Type of Application

Pre-mixed ready-to-use solution contains at least 1:10 dilution (0.55% or 5500 ppm) of NaOCl (bleach) [at expiration] with Proper Storage*

Active Ingredient: Sodium Hypochlorite......0.62%
Other Ingredients........................................99.38%
Total......................................................100.00%

KEEP OUT OF REACH OF CHILDREN
CAUTION
Read Complete Directions and Precautions on Side Panel

Net 32 FL. OZ. (1 Quart)
Net 128 FL. OZ. (1 Gallon)

ACCEPTED with COMMENTS
EPA Letter Dated:
JUN 7 2005

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No.
56392-10
DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

To Clean: Hold bottle 6-8” from the surface. Direct gentle spray to soiled area or apply with a damp applicator. Wipe clean with a cloth or paper towel. No rising needed. If streaking is observed, rinse with water and wipe with dry cloth.

To Clean and Disinfect in One Step: Gross soil must be removed prior to cleaning and disinfecting. Spray surface thoroughly until completely wet. Allow surface to remain wet for 2 minutes at room temperature (68-77°F) to disinfect. Wipe clean with a cloth or paper towel. No rinsing needed.

To Disinfect Food Contact Surfaces: Gross soil must be removed prior to cleaning and disinfecting. Hold bottle 6-8” from the surface and spray until completely wet. Allow surface to remain wet for 2 minutes at room temperature (68-77°F). Wipe off with a clean cloth or sponge, and thoroughly rinse all surfaces in the area with potable water.

To Clean and Disinfect in a Veterinary Application: Use to clean and disinfect hard, non-porous surfaces such as feeding and watering equipment, cages, utensils, instruments, kennels, stables, catteries, etc. Remove all animals and feed from premises, animal transportation vehicles, crates, etc. Remove all litter, droppings, and manure from walls, floors, and surfaces of facilities occupied or traversed by animals. Pre-clean all surfaces with soap or detergent and rinse with water. Saturate surfaces with undiluted SWAT 200 9B and allow to remain wet for 2 minutes. Rinse all surfaces with potable water. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treated surfaces have been thoroughly rinsed with water and allowed to dry. Thoroughly scrub all treated feeding and watering appliances with soap or detergent, and rinse with potable water before reuse.

Instruments: For use as an immersion pre-cleaning instrument decontaminant solution – Fill appropriate size container with a sufficient amount of undiluted SWAT 200 9B to completely submerge instruments. Place instruments into the container of SWAT 200 9B, cover, and allow to soak for 10 minutes. Remove and rinse. Follow with an appropriate cleaning and disinfection process. Change solution daily or more often as needed when solution becomes diluted or visibly soiled. Critical and semi-critical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.

For use as an instrument pre-clean decontamination spray: Place instruments into a suitable container. Thoroughly spray SWAT 200 9B onto instruments so as to thoroughly wet all surfaces. Rinse instruments, and follow with an appropriate cleaning and disinfecting process. Critical and semi-critical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.

For use as an instrument ultrasonic cleaner – Thoroughly pre-rinse instruments under running water to remove visible, gross debris. Immerse pre-rinsed instruments into SWAT 200 9B and activate unit for 5 minutes or longer, if necessary. Remove instruments and rinse thoroughly. Change solution daily, or more often as needed when solution becomes diluted or visibly soiled. Follow with an appropriate disinfection process. Critical and semi-critical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.

For use as a manual instrument cleaner – Thoroughly pre-rinse dirty instruments under running water to remove visible, gross debris. Immerse pre-rinsed instruments into an appropriate size container filled with SWAT 200 9B. Scrub instruments using a stiff bristle brush until visibly clean. Submerge instruments while scrubbing. Rinse instruments thoroughly. Change solution daily, or as needed when solution becomes diluted or visibly soiled. Follow with an appropriate disinfection process. Critical and semi-critical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.

For disinfection of non-critical pre-cleaned instruments – Instruments must be thoroughly pre-cleaned to remove excess organic debris, rinsed, and rough dried. (Clean and rinse lumens of hollow instruments before filling with SWAT 200 9B or before immersion.) Using a soaking tray or ultrasonic unit, immerse instruments into undiluted SWAT 200 9B and allow to remain submerged for 3 minutes at room temperature (68-77°F). Remove and rinse, or wipe dry prior to use. Change solution daily, or more often as needed if solution becomes diluted or visibly soiled. Critical and semi-critical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.
KILLS HIV and HBV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in healthcare settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV).

Special Instructions for Cleaning and Decontamination Against HIV-1 (AIDS Virus) and Hepatitis B Virus (HBV) on Surfaces/Objects Soiled with Blood/Body Fluids •Personal Protection: When handling items soiled with blood/body fluids, personal protective equipment such as disposable gloves, gowns, masks, or eye coverings should be used. •Cleaning Procedure: Blood/body fluids must be thoroughly cleaned from surfaces and objects before disinfecting. •Contact Time: Leave surfaces wet for 2 minutes. •Disposal of Infectious Materials: Blood, body fluids, and cleaning materials should be autoclaved and disposed according to federal, state, and local regulations for infectious waste disposal.

SWAT 200 9B is a multi-purpose, broad spectrum and fast acting cleaner disinfectant for use on inanimate objects. It may be used on hard non-porous surfaces such as stainless steel, glazed ceramic tile, hard plastics, non-porous vinyl, painted surfaces, Pyrexglas, and glass. It is useful in clinical treatment areas where environmental control of cross contamination is important such as operating rooms, emergency rooms, nursing homes, dental operators, isolation units, physical therapy and radiology treatment areas, central service, and laboratories. It is acceptable for veterinary applications including veterinary hospitals, animal laboratories, zoos, and kennels. It may also be used in institutional kitchens and food service areas on both food and non-food contact surfaces. A rinse with potable water is required for surfaces in direct contact with food or animals. See Directions for Use for each type of application.

*STORAGE AND DISPOSAL: Store this product in a cool, dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood area with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Refill empty container only with SWAT 200 9B Refill. (For 1 Gallon Container: Do not reuse empty container.) When discarding container, place in trash collection. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

PRECAUTIONARY STATEMENTS: Hazards to Humans and Domestic Animals. CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. FIRST AID: If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rising eye. Call a poison control center or doctor for further treatment advice. PHYSICAL AND CHEMICAL HAZARDS: Do not use this product with ammonia or acids such as vinegar, rust removers, or toilet bowl cleaners. This product not intended for use on fabrics.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.
