PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

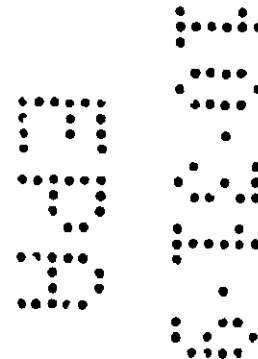

CAUTION: Harmful if swallowed. Avoid breathing spray mist. Avoid contact with skin and eyes. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water. If irritation persists, get medical attention. Wear gloves for protection when handling and long-sleeved shirt when spraying. For use on horses only as directed.

PHYSICAL AND CHEMICAL HAZARDS

Do not use or store near heat or open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Store in original container above 32°F. Do not reuse container. Disposal: Triple rinse or equivalent. Then dispose of container in a sanitary landfill or by other approved state and local procedures. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Horse SPRAY-N-WIPE is a ready-to-use combination of insecticides and repellents that can be applied either as a wipe-on or spray. Prior to application, brush away dirt and dust from the animal's hair coat. To apply as a WIPE-ON, pour a small amount of insecticide/repellent evenly onto a piece of cloth or insecticide applicator or mitt and wipe on the hair coat, first against the hair and then with the hair. Apply from 1-2 oz. of material per animal. To apply as a SPRAY, pour the insecticide/repellent into a spray applicator and apply from 1-2 fluid oz. of solution as a fine mist to the areas of the horse's body needing insect protection.

NOTE: It is not necessary to exceed 2 fluid oz. per mature horse, slightly less for younger animals and ponies. It may be desirable to repeat the application after the horse has been ridden hard or because of weather conditions. For insect protection around the horse's head, the WIPE-ON method is preferred.

Insect Problem	Remarks
Face Flies House Flies	Apply as a wipe-on, preferably, to the head area. Pay particular attention to around the nostrils and eyes but avoid direct contact with the eye itself.
Stable Flies	Apply as a wipe-on or spray to the legs and flanks, leaving no unprotected area. More frequent applications may be necessary if the legs are exposed to high grass or water.
Biting Gnats	Apply as a wipe-on, preferably, to the head, neck, belly and forelegs. Be sure to apply the insecticide/repellent to the inside surfaces of the ears.
Mosquitoes Horse Flies House Flies Deer Flies Horn Flies	Apply as a wipe-on or spray to evenly cover the flanks, belly and back of the horse or pony.
